Documentary History Dominik Ohrem, 2025-11-18 Volume III hones in on the relations between humans and domesticated animals in U.S. society illuminating how these relations were integral to key developments of the long nineteenth century A first section explores the role of domesticated animals in what for most of the nineteenth century remained a predominantly agrarian world albeit one undergoing significant change focussing on the labour and products that could be extracted from animal bodies the education of working animals contemporary attempts at improving animal breeds to increase agricultural productivity and market value the rise of veterinary medicine and other topics The second section demonstrates that the

transportation revolution of the antebellum decades notwithstanding animals remained essential for moving around goods and people in both rural areas and the growing U S cityscapes where horses powered everything from carriages to streetcars as well as in other nineteenth century contexts that relied on equine bovine and sometimes canine traction A third and final section is centred on domesticated animals in entertainment and competitive settings ranging from the prestigious if embattled sport of Thoroughbred horse racing to pigeon fancying and the brutal spectacles of dog and cockfighting which quickly became the target of a spirited post Civil War anticruelty movement
