Animals To Look At:

How Animals See Joanne Mattern, 2018-12-15 An animal's eyes provide it with information about its encounters with other animals and its habitat. This book is filled with important and exciting facts about how animals see such as deer, eagles, dragonflies, cats, and squids. It includes how animal eyes are constructed, how they work in different environments, and how different animals use sight to stay safe, find food, and experience the world around them. Comparisons between animal eyesight and human eyesight are also included. Photographs, diagrams, and maps make this book even more exciting and informative.

How Animals See the World Olga F. Lazareva, Toru Shimizu, Edward A. Wasserman, 2012-04-19 The visual world of animals is highly diverse and often very different from that of humans. This book provides an extensive review of the latest behavioral and neurobiological research on animal vision, detailing fascinating species similarities and differences in visual processing.

How Cats and Other Animals See at Night Christine Honders, 2015-07-15 All cats from mountain lions to housecats have amazing night vision. Why do they need it, and what adaptations in their eyes make it possible? Readers find the answers to these questions as they explore the science behind cats' superpowered night vision. They also discover other animals that can see well in darkness such as owls and giant squids. Fun facts about these animals and a detailed graphic organizer touch on a variety of science curriculum topics, and colorful pictures make learning about these topics engaging for readers.

Animal Encounters Susan Crane, 2012-11-29 Traces of the living animal run across the entire corpus of medieval writing and reveal how pervasively animals mattered in medieval thought and practice. In fascinating scenes of cross-species encounters, a raven offers St. Cuthbert a lump of lard that waterproofs his visitor's boots for a whole year; a scholar finds inspiration for his studies in his cat's perfect focus on killing mice; and a dispossessed knight wins back his heritage only to give it up again in order to save the life of his warhorse. Readers have often taken such encounters to be merely figurative or fanciful, but Susan Crane discovers that these scenes of interaction are firmly grounded in the intimate cohabitation with animals that characterized every medieval milieu, from palace to village. The animal encounters of medieval literature reveal their full meaning only when we recover the living animal's place within the written animal. The grip of a certain humanism was strong in medieval Britain as it is today: the humanism that conceives animals in diametrical opposition to humankind. Yet medieval writing was far from univocal in this regard. Latin and vernacular works abound in other ways of thinking about animals that invite the saint, the scholar, and the knight to explore how bodies and minds interpenetrate across species lines. Crane brings these other ways of thinking to light in her readings of the beast fable, the hunting treatise, the saint's life, the bestiary, and other genres. Her substantial contribution to the field of animal studies investigates how animals and people interact in culture, making how conceiving the animal is integral to conceiving the human and how cross-species encounters transform both their animal and their human participants.

Savages and Beasts Nigel Rothfels,2008-07-14 To modern sensibilities nineteenth century zoos often seem to be unnatural places where animals led miserable lives in cramped wrought iron cages Today zoo animals in at least the better zoos wander in open spaces that resemble natural habitats and are enclosed not by bars but by moats cliffs and other landscape features In Savages and Beasts Nigel Rothfels traces the origins of the modern zoo to the efforts of the German animal entrepreneur Carl Hagenbeck By the late nineteenth century Hagenbeck had emerged as the world s undisputed leader in the capture and transport of exotic animals His business included procuring and exhibiting indigenous peoples in highly profitable spectacles throughout Europe and training exotic animals humanely Hagenbeck

advertised for circuses around the world When in 1907 the Hagenbeck Animal Park opened in a village near Hamburg Germany Hagenbeck brought together all his business interests in a revolutionary zoological park He moved wild animals out of their cages and into natural landscapes alongside primitive peoples from Africa Asia the Americas and the islands of the Pacific Hagenbeck had invented a new way of imagining captivity the animals and people on exhibit appeared to be living in the wilds of their native lands By looking at Hagenbeck's multiple enterprises *Savages and Beasts* demonstrates how seemingly enlightened ideas about the role of zoos and the nature of animal captivity developed within the essentially tawdry business of placing exotic creatures on public display Rothfels provides both fascinating reading and much needed historical perspective on the nature of our relationship with the animal kingdom **Dominion over Wildlife?** Stephen M.

Vantassel, 2009-04-01 For centuries Christians believed that God granted humanity dominion over the animal kingdom meaning that we had a moral right to kill manage and eat animals including wildlife Recently however environmental and animal rights activists have assaulted this traditional perspective They argue that dominion as expressed in meat eating and hunting has resulted in species extinction and environmental degradation Christian Animal Rights CAR activists suggest that the church must reevaluate its traditional beliefs in light of the fact that God's original creation was free of human on animal violence God they argue did not want man's dominion to be expressed through trapping killing and eating of animals These violent activities only came about after the Fall as God condescended to our hardness of heart CAR activists point to Christ's sacrificial work of reconciliation as a model for modern Christian behavior as Christ sacrificed for us we should avoid eating meat and hunting as ways we can participate in Christ's non violent work of reconciling creation to himself In this book Stephen Vantassel investigates the biblical ethical and scientific arguments employed by the CAR movement concerning human wildlife relations In this regard the book engages in practical theology by addressing several important questions How should Christians treat our wildlife neighbors Has the Church been wrong in its understanding of human dominion Does God want Christians to avoid hunting trapping fishing and to adopt a vegetarian lifestyle This book provides answers to these questions by detailing a theology the author calls Shepherdism **Ascent!** Lawrie Ryan, 2003-08-05 This series is focused on
