Blue & Gold and Black Robert John Schneller,2008 During the twentieth century the U S Naval Academy evolved from a racist institution to one that ranked equal opportunity among its fundamental tenets This transformation was not without its social cost however and black midshipmen bore the brunt of it Blue Gold and Black is the history of integration of African Americans into the Naval Academy The book examines how civil rights advocates demands for equal opportunity shaped the Naval Academy s evolution Author Robert J Schneller Jr analyzes how changes in the Academy s policies and culture affected the lives of black midshipmen as well as how black midshipmen effected change in the Academy s policies and culture Most institutional history is written from the top down while most social history is written from the bottom up Based on the documentary record as well as on the memories of hundreds of midshipmen and naval officers Blue Gold and Black includes both perspectives By examining both the institution and the individual a much more accurate picture emerges of how racial integration occurred at the Naval Academy Schneller takes a biographical approach to social history Through written correspondence responses to questionnaires memoirs and oral histories African American midshipmen recount their experiences in their own words Rather than setting adrift their humanity and individuality in oceans of statistics Schneller uses their first hand recollections to provide insights into the Academy s culture that cannot be gained from official records Covering the Jim Crow era the civil rights movement and the empowerment of African Americans from the late 1960s through the end of the twentieth century Blue Gold and Black traces the transformation of an institution that produces men and women who lead not only the Navy but also the nation **Against All Odds** Charles E. This book provides readers with an in depth understanding of the professional development of two notable and highly accomplished naval officers and their contributions to the development of the Aegis Weapons System The main argument is

that there was no single career path or set of formal qualifications for achieving excellence in the naval profession as characterized by selection for Flag rank One of the major points is the revelation that a combination of essential personal traits and qualities and important operational and technical experiences fundamental to the nature of naval warfare are critical to developing highly competent and confident officers Such officers are needed to lead major acquisition programs capable of delivering innovative weapons systems for a twenty first t century Navy facing new age threats *Cruising World*,1987-01 **Hearings** United States.
