Young,2014-07-08 This book explores the process of policymaking and implementation in the finance energy and security sectors in the United Arab Emirates It looks at the role of informal advisory networks in a nascent private sector federal politics and historical ties in foreign relations

Secretary General's Annual Report Organization of Arab Petroleum Exporting Countries. General Secretariat,2002

Prospects for the American Age Prof. Jamal Sanad Al-Suwaidi,2014 The introduction Power Structure in the New World Order Argument of the Book highlights the main theme around which the study revolves namely the new world order It presents the hypothesis of the study regarding this new order along with several questions including what are the factors that indicate the coming of a new world order what are the most influential forces in that order how is that order structured and what are the most important and influential factors in the world order The introduction also presents the main premise of the book that the United States of America may be considered the dominant pole in the new world order and that the world will continue to exist in an American age that is expected to extend for at least a further five decades The qualitative supremacy of the United States of America has proven inescapable according to the data statistics and information presented in this book as well as the scales and variables of comparison adopted by the author in terms of economics military advancement energy resources transportation education culture and technological progress According to these standards the structure of the new world order may be described as a hierarchy with the United States of America alone at the top followed by a second tier comprising Russia China and the European Union a third tier consisting of Japan

India and Brazil followed by the rest of world The introduction to this book may be considered a basic foundation for the analysis presented in the following seven chapters which examine the emergence current status and future of the new world order in its various dimensions Under the heading The New World Order Features and Concepts the first chapter of Al Suwaidi s new book presents a theoretical paradigm for the concept of the new world order in its various dimensions It presents two main themes the first deals with concepts relating to the world order drawing on literature that examines the evolution of the world order from the Peace of Westphalia in 1648 to the present day It also presents various different views and arguments concerning the nature of the world order and the distribution of power within it The first theme also explores the political military economic cultural educational technological and energy related dimensions of the world order and their importance in determining the relative powers of actors in the new world order Moreover it explains how the United States of America has succeeded in utilizing all these tools to achieve its ends and how it leads this world order according to a universal strategic vision aimed at maintaining US supremacy vis vis other major powers The first theme also presents an objective assessment of the different frameworks which are employed in analyzing the concept of the new world order The second theme of this chapter discusses the main features of the new world order which play a significant role in the interactions that occur within it and which define it with regard to previous historical eras of the global system Chapter II Factors Influencing the Structure of the New World Order examines the factors and patterns of influence and interaction within the world order These factors include relations among civilizations relative power in international relations economic factors military superiority technological development levels of knowledge challenges and variables and the behavior of major powers Chapter III The World Order Decisive Historic Junctures aims to draw a comprehensive analytical map to help in understanding the historical transformations of the world order and ultimately the nature of contemporary global realities The historical review presented in this chapter features an element that may make it unique it tackles the historical evolution of the world order from the emergence of the Ottoman state in the East through the ages of the Spanish Portuguese and other empires of the West It is an effort to present a balanced scholarly chronicle of the world order without neglecting the influence of the East on international relations throughout history Chapter IV The Economy Trade and Energy in the New World Order focuses on the role of economic factors in deciding the structure of the new world order and the hierarchy of powers within it It reveals that despite the spectacular rise of the Chinese economy during the past two decades it is still about half that of the United States and China still falls within the ranks of developing countries in terms of its average GDP per capita While the US economy is characterized by flexibility and high reliance on innovation and internal forces for growth China depends on foreign investment and employing low cost labor in export oriented industries This could make China more vulnerable to adverse economic shocks in the future The author also expects that developments in the energy sector will greatly affect the ranking of powers in the new world order The United States of America will increasingly become self

dependent in terms of energy utilizing its various innovations in the field of shale gas and oil extraction and its gradual shift toward unconventional energy sources from the western hemisphere the Americas giving it a strong comparative advantage in the future Chapter V Public Opinion Regarding the New World Order A Sample Survey of UAE Citizens presents the findings of a public opinion survey in the UAE concerning the new world order The survey focuses on nationality age gender and educational level as explanatory variables of differences in public opinion toward the new world order In Chapter VI Prospective Structural Changes and their Consequences for the New World Order the author discusses the potential structural strategic changes in the new world order in the coming five decades stressing that unipolarity will have a variety of impacts on the world The author anticipates that US influence in international financial institutions will increase and that over the next decade Washington will reduce its dependence on oil from regions plagued by risk and instability such as the Middle East and that this will affect US policy in such regions In Chapter VII The New World Order Future Outlook the author confirms that the new world order will be characterized by a number of features that will be important determinants of the ranking of world powers in the future including the growing importance of technologically advanced and nonconventional systems of production and communication to replace decaying conventional systems and an increasing reliance on genetic engineering cloning and nanotechnology in finding solutions to key issues such as achieving food and water security narrowing down the energy resource gap achieving breakthroughs in medicine and further developing human capabilities Other features also include increasing pressure on the capitalist system to develop in order to sustain itself In the Conclusion to the book the author suggests that the Arab region is a central arena in the world and the focus of a variety of conflicts that are of direct relevance to the prospects for the American age The author cites the Syrian crisis and the recent events in some Arab countries that have toppled long standing political regimes dating back to periods prior to the development of the new world order such as in Egypt Libya Yemen and Tunisia The author believes that in light of the obstacles to development faced by many Arab states it is difficult to say that the near future will herald improvements in these countries circumstances particularly in light of the worsening internal crises in major Arab countries like Egypt Syria and Iraq and the strategic expansion of regional non Arab powers to fill the void left by the declining regional role of conventional Arab powers This comes alongside increasing influence for Israel which is now in the most advantageous strategic position since its creation due to the absence of any significant resistance from Arab countries which are preoccupied with internal crises or threats emanating from neighboring states The conclusion also claims that economics will not simply be a factor in the calculation of states roles and positions in the new world order but rather the central engine of change for small and mid sized powers in the new world order

Islamic Law and International Law Emilia Justyna Powell, 2019 Islamic Law and International Law provides a comprehensive comparison of the Islamic legal tradition and international law especially in the context of dispute settlement Do states of the Islamic milieu avoid international courts

How do they view mediation and arbitration Is Islamic legal tradition incompatible with international law The answer to the Islamic law international law nexus puzzle lies in the diversity of how secular and religious laws fuse in domestic legal systems across the Islamic milieu States are not Islamic to the same degree or in the same way Consequently different international conflict management methods appeal to different states **Globalization and the Environment**, 2006-06-01

What is missing in the mounting literature on globalization is a focused theoretical foundation with parallel empirical examinations of global structures and their environmental consequences The articles in this volume examine how the world economy and related non economic forms of global structuring impact the natural environment and the living conditions of human populations living across the globe Environmental dynamics in areas as diverse as Ancient Egypt and the Modern Amazon are presented for readers who are new to the world systems approach and for others interested in recent efforts to link environmental outcomes and antecedents to global processes **The Gulf** The Emirates Center for Strategic Studies and Research, 2018-06-13 Throughout history the Arabian Gulf has always commanded a strategic and positive significance whether as a hub of world trade or as a major supplier of the world's energy However since 2001 the entire Middle East including the Gulf region has come under negative scrutiny as a potential battleground in the unrelenting war against terrorism After 2003 the region has been exposed to new vulnerabilities stemming from the divisive and deadly war in Iraq Against this disturbing backdrop the Gulf region must deal with diverse challenges the deteriorating regional security environment the sweeping effects of globalization the diversification of oil dependent economies the transition to knowledge based economies burgeoning population levels rising demand for job creation externally induced reform pressures and widening political participation Influential policy makers regional leaders respected scholars and experienced analysts who gathered at the Ninth Annual Conference of The Emirates Center for Strategic Studies and Research held from January 11-13 2004 in Abu Dhabi focused on the subject of The Gulf Challenges of the Future In identifying major hurdles to political economic and social development they also pinpointed effective ways to surmount these difficulties through new and existing frameworks Collectively these conference presentations offer insight on shifting security parameters redefining of government responsibilities initiating political and social change evolving media roles and responsibilities and expanding opportunities for women in the Gulf Particular sections assess the security situations in Iraq and Iran as well as their wider implications while sketching the prospects for greater security cooperation and economic integration in the Gulf region

Globalization and the Gulf John W. Fox, Nada Mourtada-Sabbah, Mohammed Al Mutawa, 2006-09-27 For centuries the Arabian Gulf has been a crossroads where seafaring people and Bedouins alike travelled great distances transacting business Events of the past few years both good and bad have directed the world's attention to the Arabian Peninsula where a rich cultural tradition is rapidly incorporating the latest innovations from around the world This is the process of globalization New economies create enormous potential but it will require great care for the people of the region to steer through a period

of profound change Political and economic interests intent on maintaining the flow of petroleum products on one hand and people in the Gulf region who assess their won interests from quite a different perspective on the other exert pressures from conflicting directions Reconciling these interests in a time of rapid globalization poses enormous challenges This timely volume brings together the work of scholars from both the Middle East and the West who have the expertise to evaluate the interaction of new ideas new technologies and new economies Brought together by the American University of Sharjah and the Sociological Association of the UAE the contributors reflect on both the process of globalism and on the traditions of Gulf society and culture offering views on how these trends interact within the global system *Soaring Beyond Boundaries*

,2007-01-01 Higher education systems in many countries are undergoing significant changes in response to variety of local national and international pressures Among these the shift from elitism to the provision of mass higher education increased impact of internationalization and globalization which are increasingly blurring national boundaries increased competition among universities for limited resources to support higher education sector the impact of technology and the knowledge economy and the continuing quest educational for equity Given what we already know about the position of women in the academy what is so significant about the account of women represented in this book Lessons from colleagues in Western universities provide important models for understanding some aspects of gendered identity of women scholars however a deeper understanding of educational experiences for women in countries such as China Turkey Iran Pakistan may potentially offer innovative insights to our current understanding of gender within education In this age of globalization there are common themes that transcend the experiences of women across very different social cultural economic and political contexts Therefore accounts of women scholars represented in this volume demonstrate that the experiences women scholars are not isolated incidents but global phenomena and may offer alternative approaches to problems that seem insurmountable to women at the bottom of the professional ladder Further the experiences of non Western women scholars are important because it is only through an understanding of their educational conditions that institutions can implement policies and practices to respond effectively and to create work environments that are supportive to professional aspirations of these scholars Effective policies can only be attained when there is a clear understanding of the barriers and challenges female scholars Given that gender concerns especially in non Western countries have historically occupied and to some extent continue to occupy a marginal position in the daily operations of institutions of higher education it is critical to highlight their potentially harmful effects not only on women scholars but on institutions as well Handbook of US-Middle East Relations

Robert Looney,2014-05-22 Divided into three sections the Handbook of US Middle East Relations provides a thorough and up to date overview of contemporary US Middle East relations in historical perspective With chapters contributed by leading experts in the field this Handbook will be of use to academics students and researchers in international relations policy analysts media professionals and government officials Part I Factors Affecting US Relations contains essays including

Globalization Energy Security Wars and Revolution Peace Processes US Foreign Aid Policy to the Middle East and US Relations with Islamic Groups in the Middle East Part II Perceptions of US Relations contains essays on how US policies are viewed including The View from the Arab Street The View from Palestine The View from Pakistan and The View from Kurdistan Part III US Relations at the Country Level comprise essays detailing relations between the USA and countries and areas in the Middle East and North Africa including Saudi Arabia Egypt Israel Tunisia Lebanon Iran Iraq Libya Algeria and Bahrain A comprehensive index completes the volume

Energy Policy and Regulation in the People's Republic of China C. P. Andrews-Speed, 2004-01-01 China is the world's second largest consumer of commercial energy and is therefore a significant contributor to atmospheric pollution It is becoming a major player in global and regional markets for energy products services and investment This book provides an overview of the formulation and implementation of energy policy in China Part One provides background information on China's energy sector Part Two examines the nature of China's energy policy and of the policy making process with examples drawn from the coal and natural gas sectors as well as from the government's drive to promote energy conservation and energy efficiency Part Three focuses on recent efforts to reform the energy sector in China and to regulate it more effectively paying particular attention to the electrical power sector and to small scale coal mines Part Four evaluates from the perspective of the citizen policy relating to the electrical power sector and to the closure of small scale coal mines Part Five addresses the international dimensions of China's energy policy with accounts of both inward and outward investment and of the international political implications About the author Dr Philip Andrews Speed is Director of the Centre for Energy Petroleum and Mineral Law and Policy at the University of Dundee Scotland He spent fourteen years as a geologist in the international mining and petroleum industries before coming to the Centre in 1994 gaining an LLM in Energy Law and Policy and joining the academic staff

OAPEC, Organization of Arab Petroleum Exporting Countries, 2008 *Public Management Reform in the Gulf Cooperation Council and Beyond* Mhamed Biygautane, 2023-05-16 This book offers an understanding of the current state of public management in the Gulf Cooperation Council GCC region highlighting the region's institutional and human capital constraints Drawing on case studies from GCC states and beyond the book provides a policy oriented analysis of these challenges and a set of recommendations on how to address them Public Management Reform in the Gulf Cooperation Council and Beyond utilizes several theoretical frameworks to explore three themes first how the quality of government and efficiency of its bureaucratic machinery can offer a business friendly environment for the private sector second how public private partnerships can foster stronger collaboration and exchange of knowledge and expertise between the public and private sectors and finally how the existing human capital constraints may be addressed through the effective implementation of talent management knowledge management and training programs A comparative approach is taken throughout the book contrasting the performance of GCC states with other Middle East and North Africa MENA countries or the Organization for Economic Cooperation and

Development OECD member countries in key governance public sector performance and business competitiveness indicators to identify what the GCC states need to do to enhance the quality of government and the capacity to deliver services more efficiently This book will appeal to academics practitioners policymakers and private sector consultants as well as those interested more broadly in the Middle East and the Gulf region
