Resources in Education, 1980 *Stadiums in Calcutta: A New Genre of Sports Culture* Md Abu Nasim, 2021-04-17 Stadiums in Calcutta A new Genre of Sports Culture is set in the format of micro study which deals with different aspects of sports life We know that that sports culture is an important aspect of history which has been borrowed from the West The indigenous people accepted this new culture of games in Bengal The native middle class of Calcutta was showed an eagerness for Western games such as Football and Cricket When they saw the English of white town playing such as an engaging game The adopted game of Cricket and football in course of time introduced new institutions and new avenues the stadium being the most important among them The book reflects on the politics around the stadium Ecology, Sustainable Development and Accounting Seleshi Sisaye, 2015-08-11 Accounting literature has viewed sustainability in terms of social economic and environmental performances There have been concerns that the relationship between sustainability accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour

that chronicle management practices Ecology Sustainable Development and Accounting argues that despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations Drawing examples from international development and federal government organizations this book documents the link between ecology corporate sustainable development and sustainability accounting and reporting It draws together the literature from several disciplines to elaborate the contribution of the ecological approach to sustainable development in the accounting literature This book will be of particular interest to students academics and practitioners in the areas of environmental studies ecological economics sustainable development studies and social and environmental accounting The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature **Social**

Movements Stanford M. Lyman, 2016-07-27 The aim of this book is to bring together classical recent and contemporary analyses of the social movement phenomenon Analysis is represented in several variants of its discursive form the expository essay the critique the general theory the specific case study and the futuristic meditation **Sustainable Value Chain**

Management François Maon, Sankar Sen, 2016-04-01 The way organizations manage their value chain has changed dramatically over the past decade Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues Yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes The social and environmental issues that organizations should address easily can be interpreted as including virtually everything Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity human rights safety philanthropy community and environment However the penetration of social and environmental considerations into value chain management is described as desire lacking reality thereby making the idea a patchy success The objective of this research anthology is to investigate different angles of sustainable value chain management The book's 27 chapters fill holes and explore new fields the chapters are organised in five sections Sustainable value chains context drivers and barriers Sustainable value chains managing activities Sustainable value chains managing networks and collaboration Sustainable value chains integrative perspectives and Sustainable value chains specific sectorial and industry perspectives **New Perspectives on Information**
