Asian Security Practice Material And Ideational Influences:

Asian Security Practice Muthiah Alagappa, 2022 Despite the end of the Cold War security continues to be a critical concern of Asian states Allocations of state revenues to the security sector continue to be substantial and have in fact increased in several countries As Asian nations construct a new security architecture for the Asia Pacific region Asian security has received increased attention by the scholarly community But most of that scholarship has focused on specific issues or selected countries This book aims to lay the groundwork for a comprehensive in depth understanding of Asian security by investigating conceptions of security in sixteen Asian countries The book undertakes an ethnographic country by country study of how Asian states conceive of their security For each country it identifies and explains the security concerns and behavior of central decision makers asking who or what is to be protected against what potential threats and how security policies have changed over time This inside out or bottom up approach facilitates both identification of similarities and differences in the security thinking and practice of Asian countries and exploration of their consequences The crucial insights into the dynamics of international security in the region provided by this approach can form the basis for further inquiry including debates about the future of the region The book is in three parts Part I critically reviews and appraises the debate over defining security and provides a historical overview of international politics in Asia Part II investigates security practices in sixteen Asian countries the countries selected and grouped on the basis of security independence Based on the findings of the country studies and drawing on other published works Part III compares the national practices with a view to identifying and explaining key characteristics of Asian security practice and conceptualization on the basis of the Asian experiences

International Handbook of War, Torture, and Terrorism Kathleen Malley-Morrison, Sherri McCarthy, Denise Hines, 2012-12-15 Armed conflict on domestic or foreign soil impacts people's daily lives and shapes policy around the world Millions live with the threat of terrorism whether from random sources or known enemies And the acceptability of torture is debated by politicians and public alike The International Handbook of War Torture and Terrorism synthesizes historical backgrounds current trends and findings from the Personal and Institutional Rights to Aggression and Peace Survey PAIRTAPS administered in forty countries over nine global regions Contributors examine the social cognitive and emotional roots of people's thinking on war and national security issues particularly concerning the role of governments in declaring war invading other countries or torturing prisoners By focusing on the cultural traditions and colonial histories of broad regions rather than of individual nations the book demonstrates how context shapes ordinary citizens' views on what is justifiable during times of war as well as more nebulous concepts of patriotism and security The Handbook Introduces the PAIRTAPS and explains the methodology for analyzing responses Defines war related concepts from the unique perspectives of Western Europe U K U S Middle East Gulf States Russia Balkans Africa Latin America South Southeast Asia and East Asia Provides an integrative summary of definitions and points of view Situates results in terms of social engagement

disengagement theory Considers implications for peace and reconciliation As a reflection of the changing global landscape the International Handbook of War Torture and Terrorism deserves to be read by a wide range of researchers in peace psychology political science sociology and anthropology Maritime Security Complexes of the Indo-Pacific Region Dr Vijay Sakhuja, Prof (Dr) W Lawrence S Prabhakar, 2023-03-06 This book seeks to provide a net assessment of regional challenges and opportunities in this study of the Indo Pacific region s security dynamics viewed through the maritime variant of the Regional Security Complex Theory The objective of this volume is to ascertain the regional security dynamics and assess securitization as a driving force It infers the scope of traditional non traditional and transnational security issues and their regional impact with a specific focus on the maritime perspectives of regional security dynamics and also envisages the potential interplay of these factors as they continue to influence and shape future discourse Multilateral Asian Security Architecture See Seng Tan, 2015-07-16 This book provides a comparative assessment of the material and ideational contributions of five countries to the regional architecture of post Cold War Asia In contrast to the usual emphasis placed on the role and centrality of the Association of Southeast Asian Nations ASEAN in Asia s multilateral architecture and its component institutions this book argues that the four non ASEAN countries of interest here 3 4 Australia Japan China and the United States 3 4 and Indonesia have played and continue to play an influential part in determining the shape and substance of Asian multilateralism from its pre inception to the present The work does not contend that existing scholarship overstates ASEAN s significance to the successes and failures of Asia s multilateral enterprise Rather it claims that the impact of non ASEAN stakeholders in innovating multilateral architecture in Asia has been understated Whether ASEAN has fared well or poorly as a custodian of Asia s regional architecture the fact remains that the countries considered here notwithstanding their present discontent over the state of that architecture are key to understanding the evolution of Asian multilateralism This book will be of much interest to students of Asian politics international organisations security studies and IR more generally **National Security, Statecentricity, and Governance in East Asia** Brendan Howe, 2017-10-11 This book assesses the extent to which an emphasis on national security and prioritization of state interests has dominated governance policy making in Northeast and Southeast Asia at the expense of human security human development and human rights The findings are that in many cases there are embedded structural obstacles to achieving human centered governance objectives in the region These relate to the role of the military historical authoritarian legacies and new authoritarian trends Contributors examine not only the most obvious instances of military domination of governance in the region North Korea with its Military First philosophy Thailand since the 2014 coup and Myanmar with its long history of military rule but also less well known examples of the influence of conflict legacies upon governance in Cambodia Timor Leste and Laos as well as the emergence of new reservoirs of power and resources for the forces of authoritarianism **Asia's New Institutional Architecture** Vinod K. Aggarwal, Min Gyo Koo, 2008-02-04 Can regional and interregional mechanisms better institutionalize

the creasing complexity of economic and security ties among states in Nor east Southeast and South Asia As the international state system und goes dramatic changes in both security and trade relations in the wake of the Cold War s end the Asian financial crisis and the attacks of Sept ber 11 2001 this question is now of critical importance to both academics and policymakers Still little research has been done to integrate the ana sis of both regional security and economic dynamics within a broader c text that will give us theoretically informed policy insights Indeed when we began our background research on the origin and e lution of Asia s institutional architecture in trade and security we found that many scholars had focused on individual subregions whether Nor east Southeast or South Asia In some cases scholars examined links tween Northeast and Southeast Asia and the literature often refers to these two subregions collectively as Asia artificially bracketing South Asia Of course we are aware that as products of culture economics history and politics the boundaries of geographic regions change over time Yet the rapid rise of India and its increasing links to East Asia especially those formed in the early 1990s suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions

Human Security in Southeast Asia Yukiko Nishikawa,2010-09-13 There is a growing interest in human security in Southeast Asia This book firstly explores the theoretical and conceptual basis of human security before focusing on the region itself It shows how human security has been taken up as a central part of security policy in individual

states in Southeast Asia as well as in the regional security policy within the Association of Southeast Asian Nations ASEAN. The book discusses domestic challenges for human security including the insurgencies in southern Thailand, the Philippines and Indonesia. Transnational security issues such as terrorism, drugs, human trafficking and the situation in Burma are explored by the author and the ASEAN way of contrasting the values and approaches of Southeast Asian countries with those in the West is assessed. By focusing on the ongoing changes and efforts to achieve human security in Southeast Asia, this book contributes to theoretical debates on human security as well as regional studies on Southeast Asia.

Globalisation and Economic Security in East Asia Helen E. Nesadurai, 2012-09-11. What is the relationship between globalization and economic security? Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis. Viewing traditional neorealist conceptions of economic security as overly narrow, this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals. This uniquely open-ended approach to conceptualizing economic security is supported by the East Asian experience. The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development, particularly following the 1997 to 1998 Asian financial crisis, other more realist conceptions of economic security have not become irrelevant. This is also an exploration of whether and how national, regional and multilateral institutions as well as non-state regional mechanisms help policy makers meet the task of governing in the interests of economic security. This book will be of great interest to all students and scholars of international relations, international political economy of East Asia, globalization and security studies.

The European Union's Security Relations with Asian Partners Thomas Christiansen, Emil Kirchner, See Seng Tan, 2021-05-11. This wide-ranging book analyses EU-Asia security relations in a systematic, substantive and comparative manner. The contributions assess similarities and differences between the EU and its Asian partners with respect to levels of threat perception, policy response and security cooperation in the context of historical, institutional and external factors such as the influence of the United States. The book presents original empirical research organised in four parts: a number of contributions providing discussions of the global context in which EU-Asia security relations develop; a series of chapters covering the range of dimensions of EU-Asian security including both traditional and non-military aspects of security; chapters addressing the specific issues touching on bilateral relations between the EU and its partners in the Asia-Pacific region; and a final part presenting the overall findings across the various contributions together with the future outlook for EU-Asia security relations.

Japan, Australia and Asia-Pacific Security Brad Williams, Andrew Newman, 2006-09-27. The threats to security in Southeast Asia have been serious and constant since the end of the Second World War. The book provides an absorbing account of the evolution of a key axis of regional stability: defence contacts between Japan and Australia, tracing

the relationship from the early post war period to the post 9 11 present Though most works have focused on their economic nexus Japan and Australia s defences and security ties have assumed increasing importance since the mid 1990s With problems such as North Korea s nuclear program and the China Taiwan standoff threatening regional stability the two countries have sought to strengthen bilateral relations and indications are that this relationship is likely to grow in the future Japan Australia and Asia Pacific Security explores the evolution of their relationship in the broader context of Asia Pacific security addressing regional sub regional and transnational issues This captivating book will be welcomed by those with an interest in Asian politics international relations and security studies *Non-Traditional Security in Asia* Ralf

Regional Security in Southeast Asia Mely Caballero Anthony, 2005 The book examines ASEAN's mechanisms in managing challenges and threats to regional security Its extensive analyses of the ASEAN story of managing regional security cover the different phases of ASEAN's development as a regional organization and explore the perceptible changes that have occurred in regional mechanisms of conflict management The book also examines the roles of relevant actors beyond the states of ASEAN and the key interactions that have evolved over time which have been instrumental in moving regional mechanisms beyond the ASEAN way The book argues that the ASEAN way has not been impervious to change As the association finds its way through periods of crises and continues to confront the many challenges ahead ASEAN and its mechanisms are already being transformed beyond the narrow confines of the modalities associated with the ASEAN way The changes in the political and security landscape of the region as well as the democratic transitions taking place in some member states have set the stage for a much more dynamic set of regional actors and processes that bring into question the kind of regionalism that is now taking place in the region the way regionalism is changing in Southeast Asia
