New Forms of Urban Agriculture: An Urban Ecology Perspective Jessica Ann Diehl, Harpreet Kaur, 2022-02-18 Eating locally and developing an urban rural food continuum is a rapidly evolving movement Integration of multi functional forms of agriculture termed New Forms of Urban Agriculture NFUA could be a critical adaptation to strengthen this movement and for the sustainability of cities While NFUA have the potential to provide diverse benefits to humans there is an absence of reliable empirical data on the scale and impact of urban resources on NFUA which has a profound impact on its viability and sustainability In this book we shift the focus from how NFUA have potential to impact the urban system to investigate the potential impacts of urban resources on NFUA Access to resources such as land labour clean water etc are major barriers to enter the agriculture sector in the cities the chapters in this book present projects or reviews recent research on the subject from different cities in the world This edited volume offers critical perspectives from diverse disciplines expertise and geographic contexts related to the actual and potential role of urban and peri urban agriculture in the developing and the developed world where forms adaptations and debates around NFUA vary distinctively Using an urban ecology lens the book provides empirical evidence of how urban resources of land water waste labour and biodiversity impact NFUA

Handbook of Research on the Conservation and Restoration of Tropical Dry Forests Bhadouria, Rahul, Tripathi, Sachchidanand, Srivastava, Pratap, Singh, Pardeep, 2019-09-27 Tropical dry forests are the most exploited and

endangered ecosystems in the world A combination of climatic and human factors often reduce these forests to patches of dry scrubs or savannas Because these ecosystems experience a more arduous and less anticipated environment they are more prone to environmental stress as plant communities are developed Therefore urgent research is necessary to understand both the detrimental issues and problem solving approaches to conserving these important forests The Handbook of Research on the Conservation and Restoration of Tropical Dry Forests is a pivotal reference source that combines theory and practice on the current trends and issues in this important ecological subject and discusses future challenges towards conservation strategies of these tropical dry forests While highlighting topics such as forest management natural regeneration and silviculture this publication examines the anthropogenic impacts on tropical dry forests and the necessity to rebuild their ecosystems This book is ideally designed for state forest agency professionals resource managers non governmental organization agents ecologists botanists environmentalists students and researchers seeking current research on the threats to these forests

Sustainability: Sustainability M. R. Redclift, 2005 Introducing the reader to sustainability as a concept a contested idea and a political goal this book brings together a range of articles and published papers that have influenced the course of thinking in social science It examines the links between the natural and social sciences as well as the public policies

The World and the Wild David Rothenberg, Marta Ulvaeus, 2001 Can nature be restored to a pristine state through deliberate action Must the preservation of wilderness always subordinate the interests of humans to those of other species Can indigenous peoples be entrusted with the guardianship of their own wild resources This collection of international writings tackles tough questions like these as it expands wilderness conservation beyond its American roots One of the first anthologies to consider wilderness as a global issue it takes a stand against the notion that wilderness is a northern colonialist conceit and is irrelevant to the plans of third world countries Contributions from all over the planet Nepal Borneo Brazil Chile Mexico Papua New Guinea Kenya South Africa India and the United States show instead that wilderness has an important place in the environmental thought and policy of any nation industrial or developing

The World and the Wild boldly advances the idea that our concept of wilderness must expand to take in new vistas It breaks fresh ground in global environmentalism and is essential reading for anyone concerned with development issues related to conservation

Trampled on Our Taboos Damien Arabagali **South African Journal of Zoology** ,1994 **Elephants & Kings** Thomas R. Trautmann,2015-08-03 Because of their enormous size elephants have long been irresistible for kings as symbols of their eminence In early civilizations such as Egypt Mesopotamia the Indus Civilization and China kings used elephants for royal sacrifice spectacular hunts public display of live captives or the conspicuous consumption of ivory all of them tending toward the elephant s extinction The kings of India however as Thomas R Trautmann shows in this study found a use for elephants that actually helped preserve their habitat and numbers in the wild war Trautmann traces the history of the war elephant in India and the spread of the institution to the west where elephants took part in some of the greatest wars of antiquity and Southeast Asia but not China significantly a history that spans 3 000 years and a considerable part of the globe from Spain to Java He shows that because elephants eat such massive quantities of food it was uneconomic to raise them from birth Rather in a unique form of domestication Indian kings captured wild adults and trained them one by one through millennia Kings were thus compelled to protect wild elephants from hunters and elephant forests from being cut down By taking a wide angle view of human elephant relations Trautmann throws into relief the structure of India s environmental history and the reasons for the persistence of wild elephants in its forests Restraint and Handling of Wild and Domestic Animals Murray Fowler,2011-11-16 Restraint and Handling of Wild and Domestic Animals Third Edition offers an introduction to the basic principles of animal restraint and an overview of techniques for vertebrate wild and domestic animals Fully updated throughout the third edition also includes new chapters on understanding behavior training for restraint and handling and animal welfare and restraint Now in full color the third edition of this classic reference is an invaluable tool to recognizing potential danger in restraint and reducing stress in the animal *Inventing Global Ecology* Michael L. Lewis,2004 Table of contents Human Values and Biodiversity Conservation Clement A. Tisdell,2014-08-01 This pioneering book explores the influence of human values on the willingness of individuals to pay for the conservation of individual wildlife species and classes of these to be for or against their survival and to favour or oppose their harvesting
