Discovering Chinese Nationalism in China Yongnian Zheng, 1999-04-28 This book explores the revival of Chinese nationalism in the 1990s and analyses the ways in which the West deals with this phenomenon Yongnian Zheng discusses the complicated nature of China s new nationalism and presents the reader with a very different picture to that portrayed in Western readings of Chinese nationalism He argues that China s new nationalism has been a reaction to changes in the country s international circumstances and can be regarded as a voice over the existing unjustified international order Zheng shows that the present Chinese leadership is pursuing strategies not to isolate China but to integrate it into the international community Based on the author s extensive research in China the book provides a set of provocative arguments against prevailing Western attitudes to and perceptions of China s nationalism

The Nature of Asian Politics Bruce Gilley, 2014-09-15 The Nature of Asian Politics provides an unparalleled comprehensive first look at the politics of Southeast and Northeast Asia

Construction of Chinese Nationalism in the Early 21st Century Suisheng Zhao, 2014-07-25 Chinese nationalism is powered by a narrative of China s century of shame and humiliation in the hands of imperialist powers and calls for the Chinese government to redeem the past humiliations and take back all lost territories The continuing surge of Chinese nationalism in the early 21st century therefore has fed a roiling sense of anxiety in many political capitals about whether a virulent nationalism has emerged to make China s rise anything but peaceful This book addresses this anxiety by examining the domestic sources and foreign policy implications of Chinese nationalism in the early 21st century It is divided into three parts Part I is an overview of the scholarly debate about if the rise of Chinese nationalism has driven China s foreign policy in a more irrational and inflexible direction in the first one and

half decades of the 21st century Part II analyzes the construction of Chinese nationalism by a variety of domestic forces including the communist state the angry youth fen qing liberal intellectuals and ethnic groups Part III explores whether Chinese nationalism is affirmative assertive or aggressive through the case studies of China's maritime territorial disputes with Japan in the East China Sea and with several Southeast Asian countries in the South China Sea the border controversy over the ancient Koguryo with Korea and the cross Taiwan Strait relations This book was based on articles published in the Journal of Contemporary China

Online Chinese Nationalism and China's Bilateral Relations Simon Shen, Shaun Breslin, 2010-03-18 Since the Chinese were officially plugged into the virtual community in 1994 the usage of the internet in the country has developed at an incredible rate By the end of 2008 there were approximately 298 million netizens in China a number which surpasses that of the U S and ranks China the highest user in the world The rapid development of the online Chinese community has not only boosted the information flow among citizens across the territory but has also created a new form of social interaction between the state the media various professionals and intellectuals as well as China's ordinary citizens Although the subject of this book is online Chinese nationalism which to a certain extent is seen as a pro regime phenomenon the emergence of an online civil society in China intrinsically provides some form of supervision of state power perhaps even a check on it The fact that the party state has made use of this social interaction while at the same time remaining worried about the negative impact of the same netizens is a fundamental characteristic of the nature of the relationship between the state and the internet community Many questions arise when considering the internet and Chinese nationalism Which are the most important internet sites carrying online discussion of nationalism related to the author's particular area of study What are the differences between online nationalism and the conventional form of nationalism and why do these differences exist Has nationalist online expression influenced actual foreign policy making Has nationalist

online expression influenced discourse in the mainstream mass media in China Have there been any counter reactions towards online nationalism Where do they come from Online Chinese Nationalism and China s Bilateral Relations seeks to address these questions

Reconsidering the East Asian Peace William R. Thompson, Thomas J. Volgy, 2024-08-01 This volume re examines the notion of the East Asian peace arguing that it requires updating for the current and near future context of US Chinese rivalry The East Asian peace refers to the remarkable change in conflict levels in eastern Eurasia over the past 80 years or even the past 130 years or so Prior to the late 1970s East Asia was regarded as the most conflictual region on the planet Although insurgencies have continued in places such as Myanmar Thailand and the Philippines after the 1980s East and Southeast Asia became one of the world s least conflictual regions Geopolitics and economic development worked hand in hand to reduce conflict in the region and in this respect the East Asian peace has been a confluent peace The general problem with a confluent peace is that the factors that shape it evolve over time and the specific circumstances in question seem to be evolving in a different direction with East Asia shaping up to be the most central locale of the contest between US and Chinese hegemony both regionally and perhaps globally This book argues that the idea of the East Asian peace now requires adjustment to the current and near future context The more general arguments presented here focus on alternative interpretations of how regional peace and order should be interpreted while the more specific arguments involve interpretations of Chinese and other countries behavior in the context of the heightened rivalry between China and the United States This book will be of much interest to students of East Asian politics peace studies foreign policy and international relations

The State of Asia Lawrence K. Rosinger, 2023-03-31 The State of Asia 1951 examines the developments in Asia in the key post war period of five years following 1945 Prewar and wartime background are provided for each country surveyed as the international significance of the developments in the region from Korea to Pakistan are analysed The chief emphasis is on political and economic developments foreign relations and the impact of Asian issues on the world but information on population resources and geography are also included The book is a series of independent analyses by leading specialists in particular fields it is in no sense an effort at a consensus but seeks to make clear the main trends in the region

Zionism, Israel, and Asian Nationalism Godfrey H. Jansen, 1971 *Marxist History and Postwar Japanese Nationalism* Curtis Anderson Gayle, 2003-08-29 This book explores the historical writings of postwar Japanese Marxists who were and who continue to be surprisingly numerous in the Japanese academic world It shows how they developed in their historical writing ideas of radical nationalism which accepted presupposed ideas of Japan s ethnic homogeneity but which they saw as a revolutionary subject creating a sphere of radical political action against the state the American Occupation and global capital It compares this approach in both prewar and postwar Marxist historiography showing that in the postwar period ideas were more elaborate and put much more emphasis on national education and social mobilization It also shows how these early postwar discourses have made their way into contemporary ethnic nationalism and

revisionism in Japan today The book's rich and interesting analysis will appeal not just to historians of Japan but also to those interested in nationalism and Marxism more generally Cultural Sociology of the Middle East, Asia, and Africa Andrea L. Stanton, 2012 In our age of globalization and multiculturalism it has never been more important to understand and appreciate all cultures across the world The four volumes take a step forward in this endeavour by presenting concise information on those regions least well known to students across Europe the Middle East Asia and Africa The volumes convey what daily life is like for people in these selected regions Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions Key Features Topics are explored within historical context in three broad historical periods prehistory to 1250 1250 to 1920 and 1920 to the present One volume each is devoted to the regions of the Middle East and Africa and then one volume to East and Southeast Asia and a final volume to West Central and South Asia The volumes include extensive use of photographs and maps to explain cultural and geographic content Each volume has its own volume editor with expertise in that particular region Key Themes Arts Culture and Science People Society and Dynasties Religion and Law Family and Daily Life Conflicts and Wars Politics and Government Health and Education Economy Trade and Industry National Geography and History **Democratization in China, Korea and Southeast Asia?** Kate Xiao Zhou, Shelley Rigger, Lynn T. White III, 2014-01-21 Rapid economic pluralization in East Asia has empowered local and medial groups and with this change comes the need to rethink usual notions regarding ways in which democracies emerge or citizens gain more power Careful examination of current developments in China Korea and Southeast Asia show a need for expansion of our understandings of democracy and democratization This book challenges traditional ways in which political regimes in local as well as national polities are conceived and labeled It shows from Asian experiences that democracy and its precursors come in more forms than most liberals have yet imagined In reviewing recent experiences of countries across East Asia these chapters show that actual democracies and ostensible democratizations there are less like those in the West than the surprisingly consensual and standard political science of democratization suggests This book first examines the extreme variation of democracy's meaning in many Asian states that hold contested elections South Korea Taiwan Indonesia Malaysia the Philippines and Thailand Then it focuses on China It analyzes a range of grassroots forces driving political change in the People's Republic and it finds both accelerators and brakes in China's political reform process The contributors show that models for China's political future exist both within and outside the PRC including in other East Asian states in localities and sectors that already are pushing the limits of the powerful but no longer all powerful Chinese party state With contributions from leading academics in the field Democratization in China Korea and Southeast Asia will be of interest to students and scholars of Asian politics comparative politics and democratization more broadly
