Arditti, Sek Man Wong, 2009-01-21 As stated many times before the purpose of *Orchid Biology Reviews and Perspectives* OB is to present reviews on all aspects of orchids The aim is not to balance every volume but to make a balanced and wide ranging presentation of orchids in the series as a whole The chapters in this the last volume of the series range over a number of topics which were not covered before Singapore is justly famed for its orchids They can be seen on arrival or departure in its modern highly efficient and comfortable Changi Airport and on the way from it to town *Vanda Miss Joaquim* the first hybrid to come from Singapore became its National Flower This natural hybrid can be seen on its currency stamps and public and private decorations Many excellent breeders starting with Prof Eric Holttum who bred the first man made hybrid *Spathoglottis Primrose* produced numerous magnificent hybrids and won countless awards in Singapore and elsewhere These hybrids served to enrich the country's orchid mystique In the opening chapter of this volume Dr Teoh Eng Soon Western style Eng Soon Teoh himself a prize winning orchid breeder grower and author writes about some of the breeders who contributed to the Singapore orchid fame Prof Hans Fitting was one of the best known plant physiologists of

Orchids as Aphrodisiac, Medicine or Food Eng Soon Teoh, 2019-07-17 Did you know that Vanilla was formerly served as aphrodisiac by Cassanova and Madam Pompadour and Elizabeth I loved its flavor This is the first book that provides a complete worldwide coverage of orchids being employed as aphrodisiacs medicine or charms and food Opening with an in depth historical account of orchids orchis Greek testicle the author describes how the Theory of Signatures influenced ancient herbalists to regard terrestrial orchid tubers as aphrodisiacs Doctors and apothecaries promoted it during the Renaissance Usage of orchids in Traditional Chinese Medicine Indian Ayurvedic Medicine by Tibetan yogins and Amchi healers for longevity pills tonics and aphrodisiacs by Africans to prepare health promoting chikanda or as survival food when

lost in the Australian bush are some highlights of the book Early settlers in America and the East Indies often relied on native remedies and employment of orchids for such needs is described Also covered are the search for medicinal compounds by scientists attempts to prove the orchid s efficacy by experiment and the worry of conservationists *Orchid Biology VIII* T. Kull,J. Arditti,2013-03-14 Note Not long after publication of *Orchid Biology Reviews and Perspectives* OB volume VII my co editor Dr Alec M Pridgeon informed me that the pressure of other duties especially the editing of *Genera Orchidacearum* GO will make it impossible for him to continue as co editor and eventually editor of the series Alec is an excellent orchid scientist and editor I was sorry to that he had to leave OB but glad that GO will be in his able hands The first volume of GO attests to his considerable abilities and I wish him much success in the future Editors of orchid publications are not the most common of species to use a botanical analogy and finding a replacement for Alec was not easy However I was fortunate that Dr Tiiu Kull agreed to become my co editor and eventually take over the series As is obvious from the Contributors section Dr Kull has extensive experience as both writer and editor My interactions with her while editing this volume have convinced me she is an excellent choice Scientifically she brings to OB an appreciation and understanding of northern terrestrial orchids a group which has not received as much attention as it deserves Another addition to OB is Dr Tim Wing Yam who agreed to become an associate editor Tim who holds a position at the Singapore Botanic Gardens will provide expertise on seed germination hybridization tissue culture species and conservation *The Orchids of Peninsular Malaysia and Singapore* Gunnar Seidenfaden,Jeffrey J. an outcome of the Proceedings of the International Symposium on Biodiversity of Medicinal Plants Orchids Emerging Trends and Challenges held on 9-11 February 2018 at Acharya Nagarjuna University India. In addition, eminent orchid experts from around the globe were invited to contribute to this book. All chapters were peer reviewed by international experts. The Orchidaceae are one of the largest families of flowering plants comprising over 700 genera and 22,500 species and contributing roughly 40 percent of monocotyledons. They also represent the second largest flowering plant family in India with 1,141 species in 166 genera and contribute roughly 10% of Indian flora. Orchids comprise a unique group of plants and their flowers are among the most enchanting and exquisite creations of nature. Phylogenetically and taxonomically, the Orchidaceae are considered to be a highly evolved family among angiosperms. They show incredible diversity in terms of the shape, size, and colour of their flowers and are of great commercial importance in floriculture markets around the globe. Millions of cut flowers of *Cymbidium*, *Dendrobium*, *Cattleya*, *Paphiopedilum*, *Phalaenopsis*, *Vanda*, etc. besides potted orchid plants are sold in Western Countries and thus the orchid cut flower industry has now become a multimillion dollar business in Europe, the USA, and South East Asia. Besides their ornamental value, orchids hold tremendous pharmaceutical potential. Root tubers of *Habenaria edgeworthii* form an important component of the *Astavarga* group of drugs in Ayurvedic medicine. It is an established fact that tubers of some terrestrial orchids have been used to treat diarrhoea, dysentery, intestinal disorders, cough, cold, and tuberculosis. Some orchids, particularly those belonging to the genera *Aerides*, *Arachnis*, *Cattleya*, *Cymbidium*, *Dendrobium*, *Epidendrum*, *Oncidium*, *Paphiopedilum*, *Phalaenopsis*, *Renanthera*, *Vanda*, etc. have been extensively used to produce internationally acclaimed hybrids. Yet paradoxically, Indian orchids are victims of their own beauty and popularity. As a result, their natural populations have been declining rapidly because of unbridled commercial exploitation in India and abroad. In fact, some orchids are now at the verge of extinction, e.g. *Renanthera imschootiana*, *Diplomeris hirsuta*, *Paphiopedilum fairrieanum*, *Cypripedium elegans*, *Taeniophyllum andamanicum*, etc. Given the global importance of orchids in terms of securing human health and wealth, this comprehensive compilation prepared by international experts is highly topical. Its content is divided into five main sections: I. Cryopreservation, Biotechnology; II. Orchid Biodiversity Conservation; III. Anatomy, Physiology; IV. Pollination Biology; and V. Orchid Chemicals, Bioactive Compounds. All contributions were written by eminent orchid experts, professors from around the world, making the book a valuable reference guide for all researchers, teachers, orchid enthusiasts, orchid growers, and students of biotechnology, botany, pharmaceutical sciences, and ethnomedicine. It will be equally valuable for readers from the horticultural industry, especially the orchid industry, agricultural scientists, and policymakers.

Micropropagation of Orchids Joseph Arditti, 2009-01-26. since they were first developed in 1949 Detailed procedures are appended with tables and complete recipes for a large number of culture media Includes many illustrations chemical formulas historical vignettes and seldom seen illustrations of people orchids apparatus and tools an excellent resource like its predecessor both informative and captivating and served as a reminder of why we go to such extremes in our quest to propagate these plants American Orchid Society 2009 in the sense of its universal value and importance this Second Edition will undoubtedly be considered a classic if only because it will serve as a sole and invaluable resource on the subject Plant Science Bulletin 2009 Malayan Orchid Review - Volume 49 (2015 Edition) ,2015 The Malayan Orchid Review is an annual publication of the Orchid Society of South East Asia based in Singapore Its coverage reflects the aims of the Society which include the advancement of orchid science and orchid conservation as well as orchid culture and appreciation It also promotes the interests of hybridisers and commercial growers The MOR covers reports on orchid shows around the region new species and hybrid descriptions articles on orchid biology conservation and culture etc It is the only comprehensive full colour orchid journal published in English in South East Asia Orchids IUCN/SSC Orchid Specialist Group,1996 This action plan chronicles the threats faced by wild orchids but more importantly to critical habitats that host extraordinarily high orchid diversity and endemism It explores and recommends specific ways that national and local government legislators scientists and orchid conservationists as well as growers can all help to reverse present trends The facts and viewpoints presented in this comprehensive document update and supplement the information available to conservation organizations and agencies through the world so that they can lobby their appropriate government offices more effectively
