What the West Can Learn From the East Dennis M. McInerney, Oon Seng Tan, Gregory Arief D. Liem, Ai-Girl Tan, 2008-10-01 Education East and West is today mostly Western in orientation. Asian perspectives remain relatively unrepresented in curricula, pedagogy and administrative structures. This volume has brought together authors researching in Asia who redress this imbalance and describe what the West can learn from the East. Topics covered include conceptions of and approaches to effective learning and teaching, self-regulated learning, perceived causes of success and failure, valuing of education, peer influences and classroom behavior, creativity, teacher commitment, class size, motivation, future goals and other influences on effective learning. Shared insights from the research and theorizing presented should provide a fascinating perspective for educators and administrators charged with providing cutting-edge research-based educational best practices in diverse cultural and social environments internationally.
