Bulletin of the Atomic Scientists ,1978-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Asia's New Battlefield Richard Javad Heydarian,2015-11-15 This compact insightful book offers an up to the minute guide to understanding the evolution of maritime territorial disputes in East Asia exploring their legal political security and economic dimensions against the backdrop of a brewing Sino American rivalry for hegemony in the Asia Pacific region It traces the decades long evolution of Sino American relations in Asia and how this pivotal relationship has been central to prosperity and stability in one of the most dynamics regions of the world It also looks at how middle powers from Japan and Australia to India and South Korea have joined the fray trying to shape the trajectory of the territorial disputes in the Western Pacific which can in turn alter the future of Asia and ignite an international war that could re configure the global order The book examines how the maritime disputes have become a litmus test of China s rise whether it has and will be peaceful or not and how smaller powers such as Vietnam and the Philippines have been resisting Beijing s territorial ambitions Drawing on extensive discussions and interviews with experts and policy makers across the Asia Pacific region the book highlights the growing geopolitical significance of the East and South China Sea disputes to the future of Asia providing insights into how the so called Pacific century will shape up U.S. Industrial Outlook ,1991 *Asia's Clean Revolution* David Angel,Michal Rock,2017-09-20 The world s environmental future will be determined in significant part by what happens in the rapidly industrialising and urban economies of Asia The sheer scale of urban population and industrial growth in Asia from Indonesia to China and the energy and materials intensive character of the development process constitutes a dark shadow over the region s and indeed the world s environment And yet this challenge is also an opportunity Precisely because so much of the urban industrial investment within developing Asia has yet to take place the opportunity exists to shape a different development future one that is far less energy materials and waste intensive Asia s Clean Revolution examines the prospects for and pathways to such a new trajectory The book lays out a path breaking vision of how developing economies might go beyond environmental regulation and put in place an array of policies and institutions that could integrate environmental industrial and technological goals These findings provide important input for negotiators considering climate change on a global scale The book approaches the challenge of growth and environment in Asia in a novel way by identifying six major transformational dynamics under way in the world today and assessing whether these can be harnessed to the goal of improved environmental performance of industry With a set of specially commissioned chapters from the leading authorities in North America and Asia this ground breaking book is the first to present concrete policy solutions to the looming crisis driven by large scale urban industrial growth in developing Asia **Film Authorship in Contemporary Transmedia Culture** Wikanda Promkhuntong,2025-10-01 Film Authorship in

Contemporary Transmedia Culture The Paratextual Lives of Asian Auteurs examines film authorship in the transmedia era whereby film directors have become public figures through a wide range of textual material and performative practices The book draws on the notion of paratext and its related term palimpsest to bring forth the idea of self reflexive authorship as a method of examining the mediated past present and afterlife of East Asian filmmakers The first part of the book pays attention to materials surrounding film festivals multi platform distribution and cinephile fan creative practices which have been created rewritten and shared to foster and problematize the reputations of selected filmmakers The second part examines alternative modes of self projections and creative productions that address the filmmakers sense of selves and relations with the industry and the public Across different chapters discourses surrounding film authorship and East Asian cinema are revisited and expanded to highlight its multiple histories and possible futures **From Asia-Pacific to**

Indo-Pacific Robert G. Patman, Patrick Köllner, Balazs Kiglics, 2021-11-24 This book brings together a unique team of academics and practitioners to analyse interests institutions and issues affecting and affected by the transition from Asia Pacific to Indo Pacific The Indo Pacific has emerged as the world s economic and strategic centre of gravity in which established and rising powers compete with each other As a strategic space the Indo Pacific reflects the rise of geo political and geo economic designs and dynamics which have come to shape the region in the early twenty first century These new dynamics contrast with the neo liberal ideas and the seemingly increasing globalisation for which the once dominant Asia Pacific regional label stood **The Political Economy of Megaprojects in Asia** Hyun Bang Shin, Dong-Wan

Gimm, 2025-02-18 This book offers a comprehensive analysis of how the developmental goals of Asian states are reflected in large scale projects and how various actors both realize and challenge these goals The rise of Asian economies has spurred the proliferation of megaprojects through large scale resource mobilization necessitating varying degrees of state intervention Despite neoliberal pressures these projects remain linked to national developmental aspirations driven by domestic transnational or combined pro growth interests and serve multiple political purposes The book advances the argument that megaprojects embody the dynamics of multiscalar strategic relations that determine the process and outcome of urbanization These projects create iconic landmarks new towns central business districts and infrastructure showcasing intertwined political and economic interests By examining contemporary megaprojects in China South Korea Taiwan India Malaysia and Turkey the contributing authors reveal the complexity of urbanizing forces and their multiscalar nature in shaping the built environment and shed light on the intricate interplay of state strategies economic needs and sociopolitical forces that influence urban landscapes This interdisciplinary work provides a nuanced understanding of the political economy underpinning Asian urbanization and contributes to ongoing debates on urban development state society relations and the production of space in the context of globalization Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4
