Aspects Of Feeling:

Metaphor and Emotion Zoltán Kövecses, 2003-09 Are human emotions best characterized as biological psychological or cultural entities Many researchers claim that emotions arise either from human biology i e biological reductionism or as products of culture i e social constructionism This book challenges this simplistic division between the body and culture by showing how human emotions are to a large extent constructed from individuals embodied experiences in different cultural settings The view proposed here demonstrates how cultural aspects of emotions metaphorical language about the emotions and human physiology in emotion are all part of an intergrated system and shows how this system points to the reconciliation of the seemingly contradictory views of biological reductionism and social constructionism in contemporary debates about human emotion Biopsychosocial Aspects of Health and Disease Vol. 2 Konrad Janowski, 2009 **Self-Feeling** Gerhard Kreuch, 2019-11-11 This monograph offers new insights into the connection between self consciousness and emotion It focuses on what fundamental feelings of being tell us about ourselves The results enrich the philosophy of human affectivity and help shed new light on some pressing current problems The author seeks to understand self consciousness as an affective phenomenon namely as self feeling He identifies it as a pre reflective pre propositional bodily feeling that shapes our space of possibilities It is the affective disclosure of individual existence His account overcomes the difficulties of infinite regress and vicious circularity that reflective or higher order accounts of self consciousness struggle with At the same time it helps build a bridge between the basic level of self consciousness and the higher level of more substantial thoughts about oneself The title explores fundamental affectivity Matthew Ratcliffe s theory of existential feelings features of self feeling and appropriateness and inappropriateness in self interpretation It also considers the contributions of the Heidelberg School of self consciousness to current debates The title provides students and researchers with a unique look into such vital philosophical questions as What is self consciousness How do we know ourselves It will also appeal to a wider audience interested in self consciousness and or human affectivity since it does not presuppose knowledge of the jargon **The Foreign Quarterly Review** , 1875 The Westminster Review , 1875 **George Eliot** George Willis Cooke, 1895

Rising Stars In: Consciousness Research 2021 Johannes Kleiner, 2023-11-06 **Conscious and Unconscious Mentality** Juraj Hvorecký, Tomáš Marvan, Michal Polák, 2023-11-23 In this collection of essays experts in the field of consciousness research shed light on the intricate relationship between conscious and unconscious states of mind Advancing the debate on consciousness research this book puts centre stage the topic of commonalities and differences between conscious and unconscious contents of the mind The collection of cutting edge chapters offers a breadth of research perspectives with some arguing that unconscious states have been unjustly overlooked and deserve recognition for their richness and wide scope Others contend that significant differences between conscious and unconscious states persist highlighting the importance of their distinct characteristics Explorations into the nature of the transition from unconscious to

conscious mind further complicate the picture with some authors questioning whether a sharp divide between unconscious and conscious states truly exists Delving into ontological epistemological and methodological issues this thought provoking text challenges established paradigms and paves the way for a reimagining of consciousness research It does so in an understandable and accessible way making this a perfect companion for both experts and students of philosophy psychology and related fields Chapters 2 4 9 10 14 and 16 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

translated here is an historical find an unknown commentary on the Yoga Sutra s of Patanjali by Sankara the most eminent philosopher of ancient India Present Indications are that it is likely to be authentic which would date it about AD700 The many references to meditation in his accepted works have sometimes been regarded as concessions to accepted ideas of the time and not really his own views If he has chosen to write a commentary on Yoga meditation it must have been a central part of his own standpoint although he was opposed to some of the philosophical doctrines of the official Yoga school One would expect a tendency to modify these unacceptable doctrines if this text is really by Sankara This turns out to be the case T P Leggett Introduction for the general reader 1990 Leggett s translation of the Vivarana did not receive the attention it deserved when it first came out Some of the points that he raised are well worth consideration in the context of the authorship problem and his contribution to the debate should be recognised Dr Kengo Harimoto in his Foreword to the e book edition 2017 When enthusiasm flags read sutras 11 15 17 look around you and see how anxiety pain and death are rushing towards us like an express train Yoga is a way to escape them T P Leggett How to use this book for Yoga Practice 1990 Excerpts from The Complete Commentary by Sankara on the Yoga Sutra s by Trevor Leggett *International Security Management* Gabriele Jacobs, Ilona Suojanen, Kate E.
