The Transformation of Judaism Jacob Neusner, 2011-03-31 Jacob Neusner describes analyzes and interprets the transformation of one system of the Israelite social order by a connected but autonomous successor system He characterizes the successive systems classifying the one as

philosophical and the other as religious He explains the categorical account of each and sets forth the outcome of a number of topical studies on the category formations of Rabbinic Judaism with special attention to the social order politics philosophy and economics These systems emerged as 1 autonomous when viewed synchronically 2 connected when seen diachronically and 3 as a continuous construction when seen at the end of their formative age In their successive stages of categorical autonomy connection and finally continuity the three distinct systems may be classified respectively as philosophical religious and theological each one taking over and revising the definitive categories of the former and framing its own fresh generative categories as well The formative history of Judaism is the story of the presentations and re presentations of categorical structures In method it is the exegesis of taxonomy and taxic systems Now after more than two decades Neusner has decided to review the initial statement Since the book summarizes ten years of work from 1980 to 1990 on the Rabbinic category formations of social science politics philosophy and economics in the setting of the law and theology of Rabbinic Judaism from the Mishnah through the Bavli 200 600 C E it seemed well worth the effort to recapitulate the original work The revised introduction explains the omission of theology in his category formation philosophy religion theology Neusner s account of the Bavli produced the decade after this title was completed did not make possible the continuous description of the unfolding of the Rabbinic system The pattern that appealed to Neusner from philosophy to religion to theology has not yet come to a satisfactory account In the twenty years

A Cultural History of Race in Antiquity Denise Eileen McCoskey, 2023-06-01 The era generally referred to as antiquity lasted for thousands of years and was characterized by a diverse range of peoples and cultural systems This volume explores some of the specific ways race was defined and mobilized by different groups including the Greeks Romans Egyptians Persians and Ethiopians as they came into contact with one another during this period Key to this inquiry is the examination of institutions such as religion and politics and forms of knowledge such as science that circumscribed the formation of ancient racial identities and helped determine their meanings and consequences Drawing on a range of ancient evidence literature historical writing documentary evidence and ancient art and archaeology this volume highlights both the complexity of ancient racial ideas and the often violent and asymmetrical power structures embedded in ancient racial

representations and practices like war and the enslavement of other persons The study of race in antiquity has long been clouded by modern assumptions so this volume also seeks to outline a better method for apprehending race on its own terms in the ancient world including its relationship to other forms of identity such as ethnicity and gender while also seeking to identify and debunk some of the racist methods and biases that have been promulgated by classical historians themselves over the last few centuries
