Aspects of Medical Care Administration Avedis Donabedian, 1976 **Aspects of Medical Care Administration: Specifying Requirements for Health Care** Avedis Donabedian, 1973 **An Introduction to Quality Assurance in Health Care** Avedis Donabedian, 2002-12-26 Avedis Donabedian's name is synonymous with quality of medical care. He unraveled the mystery behind the concept by defining it in clear operational terms and provided detailed blueprints for both its measurement known as quality assessment and its improvement known as quality assurance. Many before him claimed that quality couldn't be defined in concrete objective terms. He demonstrated that quality is an attribute of a system which he called structure, a set of organized activities which he called process, and an outcome which results from both. In this book, Donabedian tells the full story of quality assessment and assurance in simple, clear terms. He defines the meaning of quality, explicates its components, and provides clear and systematic guides to its assessment and enhancement. His style is lucid, succinct, systematic, and yet personal, almost conversational. Administration in Mental Health, 1972 Managerial Epidemiology G. E. Alan Dever, 2006. Managerial Epidemiology: Practice, Methods, and Concepts offers the most comprehensive overview of the practical application of epidemiology to managerial problems in public and private healthcare settings. The author's broad-based, holistic approach makes this a unique text on the subject. Each chapter provides specific and practical steps with concrete examples for applying the latest epidemiological methods to analyze and solve problems in healthcare management and administration. Securing Access to Health Care United States. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, 1983 **The Professions, State and the Market** Mike Saks, 2015-06-05. This unique book enhances our understanding of the links between professions, the state, and the market, and their implications for the public in terms of professional practice. In so doing, the book adopts a neo-Weberian perspective in which professions are seen as a form of exclusionary social closure based on legal boundaries established by the state. To illustrate the overarching theme, the book considers how healthcare in general and medicine in particular, as a form of professional work, is organized in public and private arenas in three societies with different socio-political philosophies: namely, Britain, the United States, and Russia. As such, it examines the varying extent to which the development of independent professional organizations has been enhanced or restricted in public as compared to more privatized social contexts. The comparative perspective adopted in this book thereby provides insight into the organization of professional work in different contexts and the all-important effects of this on delivery to the public. This book will be of particular interest to scholars, researchers, and students of Management, Public Policy, and Health Care. Methods for Setting Priorities in Area-wide Health Care Planning Arthur Young & Company, 1978 *Convergence of Population Health Management, Pharmacogenomics, and Patient-Centered Care* Moumtzoglou, Anastasius S., 2024-09-27. The current healthcare framework, often characterized by standardized treatments and one-size-fits-all approaches, falls short in
