Ewart Vernon,1964 *Personality Assessment in the DSM-5* Steven Huprich,Christopher Hopwood,2014-10-29 The DSM 5 promises to be a major reformulation of psychopathology and no section is likely to change diagnostic practice more than that of personality pathology Unlike the DSM IV the DSM 5 personality disorders will be conceptualized as involving core deficits in interpersonal and self functioning and will utilize a hybrid assessment model involving both pathological trait dimensions and a limited set of personality disorder types These changes are based on empirical and theoretical work conducted during the era of DSM III IV but nevertheless there is significant disagreement among personality assessors regarding the DSM 5 proposal In this volume several members of the DSM 5 work group offer rationales for the proposal and offer empirical evidence regarding suggested changes and several personality assessment researchers critique the proposal and offer alternative conceptualizations This book was originally published as a special issue of the Journal of Personality Assessment The Wiley Encyclopedia of Personality and Individual Differences, Measurement and Assessment ,2020-11-03 Volume 2 Measurement and Assessment of The Wiley Encyclopedia of Personality and Individual Differences The Encyclopedia of Personality and Individual Differences EPID is organized into four volumes that look at the many likenesses and differences between individuals Each of these four volumes focuses on a major content area in the study of personality

Personality Assessment via Questionnaires Alois Angleitner, Jerry S. Wiggins, 2012-12-06 ALOIS ANGLEITNER and JERRY S WIGGINS The personality questionnaire has been with us for more than 60 years It has been and still is the most popular method of personality assessment and it no doubt will continue to be so The method has been sharply criticized since its inception e g Allport 1921 Watson 1933 Ellis 1946 Janke 1973 and this criticism is also likely to continue The long standing indifference of test constructors to criticisms of their craft is brought home by noting the similarities between objections raised many years ago and those that are offered today Gynther Green 1982 Within this context one might well ask why a book on personality questionnaires should appear at this time Despite the

centrality of the personality questionnaire to personality assessment there are to our knowledge no recent books on the general topic of personality questionnaires There are of course books on specific instruments e g Dahlstrom Welsh Dahlstrom 1972 1975 books on interpretation of specific instruments e g Comrey 1980 and books on specific issues such as response styles e g Block 1965 Although not specifically focused on personality questionnaires Bass and Bergs 1959 Objective Approaches to Personality Assessment dealt with a number of issues that are central to questionnaires
