Ethnic Identities in Bernard Malamud's Fiction Martín Urdiales Shaw, 2000 The present study has been divided into five general chapters each of which is centred around a basic issue related to ethnic identities This central issue may be more or less specific largely depending on its nature and on the corpus it comprises for example chapter two which bears the general title the old country and the New World is naturally the most extensive because of the great scope of this theme and the number of works it involves two novels and a considerable number of stories including the very long *Man in the Drawer* By contrast the last chapter entitled *Beyond Race into Myth Seeking the Liberation of the Self* is logically the shortest because its focus is restricted to a particular function of ethnic identities metaphorically speaking in Malamud's fantastic works the novel *God's Grace* and one short story Similar proportions between length complexity of theme and corpus treated are maintained in the three central chapters which focus on ethnic aspects which are neither as general as chapter two nor as specific as chapter six

Discourse Analysis and Applications Ronald L. Bloom, Loraine K. Obler, Susan De Santi, Jonathan S. Ehrlich, 2013-06-17 Application of analytic discourse techniques to clinical practice is relatively recent This book's contributors begin with the

notion that systematic examination of discourse provides a rich source of data for describing the complex relationships among language social context and the cognitive processes that underlie discourse comprehension and production Evidence is provided that when discourse is studied across different clinical populations analysis yields an optimal opportunity for developing dynamic models of brain and language that more thoroughly account for the complexity of language use in social contexts Accordingly studies presented in this volume have a dual focus to examine the implications of discourse research on neurolinguistic theories and to evaluate the contribution of discourse analysis to understanding the clinical status of patients with brain damage As such this volume reports patterns of preserved and impaired discourse behavior in normal adults and in different adult clinical populations It also describes numerous tasks designed to elicit a variety of discourse genres and a host of techniques created to describe how subjects order information and relate ideas across sentences In addition it includes numerous abstract units and linguistic devices targeted to examine those aspects of discourse that govern cohesion organization and topic manipulation This volume is unique because it presents both theoretical and clinical papers that examine a variety of communication pathologies Clinicians often report dissatisfaction with formal test batteries in that results are often at variance with clinical observation of performance in real life situations To address this concern this work proposes methods for examining discourse that move the examiner closer to naturalistic sampling The research presented demonstrates that discourse analysis provides clinically significant information that contributes to the understanding of the cognitive linguistic and social status of people with communication disorders These studies also offer a framework to support continuously evolving diagnostic and treatment paradigms for adults with neurological communication pathologies
