Asteroid Investigations In Astronomy:

Investigating the Origin of the Asteroids and Early Findings on Vesta Clifford J. Cunningham, 2017-09-20 This book assesses the origin of asteroids by analyzing the discovery of Vesta in 1807 Wilhelm Olbers who discovered Vesta suggested that the asteroids were the result of a primordial planet's explosion Cunningham studies that idea in detail through the writings of Sir David Brewster in Scotland the era's most prolific writer about the asteroids He also examines the link between meteorites and asteroids revealing a synergy between Ernst Chladni Romantic symbolism and the music of the spheres Vesta was a lightning rod for controversy throughout the nineteenth century with observers arguing over its size and color and the astounding notion that it was self-luminous It was also a major force for change as new methods in the field of celestial mechanics were developed to study the orbital perturbations it is subject to A large selection of private correspondence and scientific papers complete the first comprehensive historical study of Vesta ever published With a synoptic look at the four asteroids Ceres Pallas Juno and Vesta Cunningham provides a valuable resource on asteroid origins and explains how they were integrated into the newly revealed solar system of the early nineteenth century *Scientific and Technical Aerospace Reports*, 1992

Reports on Astronomy Richard M. West, 2012-12-06 volume XIX A of IAU Transactions contains the reports by Presidents of Commissions covering the period July 1981 June 1984 The topics of IAU Commissions deal with all of contemporary astronomy and the present volume therefore constitutes an exhaustive and unique record of astronomical research during this interval It is particularly useful for astronomers and other scientists who want to gain an overview of a certain field not necessarily near their own research area Each Commission President was requested by early 1984 to begin preparations for the compilation of his/her Commission report All members of Commissions were asked to supply details about their individual research programmes The ensuing very substantial task of concatenating was undertaken in late 1984 by the Presidents often supported by a team of authors all recognized authorities in their fields In order to preserve some measure of uniformity which is in any case very difficult with so many authors editorial guidelines were sent to Presidents including the number of pages allotted to each Commission **Charles Olivier and the Rise of Meteor Science** Richard Taibi, 2016-11-25 This fascinating portrait of an amateur astronomy movement tells the story of how Charles Olivier recruited a hard-working cadre of citizen scientists to rehabilitate the study of meteors By 1936 Olivier and members of his American Meteor Society had succeeded in disproving an erroneous idea about meteor showers Using careful observations they restored the public's trust in predictions about periodic showers and renewed respect for meteor astronomy among professional astronomers in the United States Charles Olivier and his society of observers who were passionate about watching for meteors in the night sky left a major impact on the field In addition to describing Olivier's career and describing his struggles with competitive colleagues in a hostile scientific climate the author provides biographies of some of the scores of women and men of all ages who aided Olivier in making shower observations from the Leonids and

Perseids and others Half of these amateur volunteers were from 13 to 25 years of age Their work allowed Olivier and the AMS to contradict the fallacious belief in stationary and long enduring meteor showers bringing the theory of their origin into alignment with celestial mechanics Thanks to Olivier and his collaborators the study of meteors took a great leap forward in the twentieth century to earn a place as a worthy topic of study among professional astronomers **Asteroids** Edward C. Blair, 2002 With the bulk of asteroids floating in space between the orbits of Mars and Jupiter astronomers puzzle over where these rocks came from Are they the remnants of a planet Excess not used in the formation of the Solar System Nothing more than random bits of debris The location of the belt makes for a quasi barrier separating the inner from the outer planets Perhaps asteroids were meant to discourage human space exploration NASA has sent missions to explore the asteroid belt and the rocks themselves and those missions have yielded some interesting observations on the composition of the asteroids but no definitive answer as to their origin Earth based tools such as telescopes and satellites also contribute to asteroid research but cannot plumb the depths behind these varied chunks of flotsam Presented in this book is a list of carefully chosen abstracts and citations of relevant literature about asteroids and the research into them Prior to this listing though comes an overview of the nature of the asteroids and what we know now about them and what we hope to discover in the future lifeless but mysterious rocks inhabiting the solar system To conclude easy access is provided through author title and subject indexes **Transactions of the International Astronomical Union , Third Asian-Pacific Regional Meeting of the International Astronomical Union** M. Kitamura, E. Budding, 2012-12-06 M KITAMURA Tokyo Astronomical Observatory Japan and E BUDDING Carter Observatory Wellington New Zealand The Third Asian Pacific Regional Meeting of the International Astronomical Union was held from 30 September to 5 October 1984 at the Kyoto International Conference Hall Kyoto Japan under the auspices of the Union and the Astronomical Society of Japan with Kyoto University as host Three hundred and twenty seven astronomers from twenty two countries participated at the meeting and more than two hundred papers were presented The aim of the meeting was not only to promote scientific developments and cooperation but also to offer a chance for all participants to become acquainted with major astronomical projects of the Asian Pacific Region Therefore two new sessions of A View of Asian Pacific Astronomy and Astronomical Education in the Asian Pacific Region which had not been undertaken in the previous two Regional Meetings were arranged as a first trial besides the other ordinary scientific sessions The Scientific Organizing Committee consisted of D C Morton chairman R N Manchester S M Gong K J Feng C S Shen J C Bhattacharyya G Swa B Hidayat H M K Al Nairniy H S Yun J B Hearnshaw S C Wolff I Karpurwaguchi M Kitamura M Morimoto M Oda and J P Swings IAU ex officio and the Local Organizing Committee of T Kogure chairman T Ishizawa M Saite R Hirata S Inagaki E Hiei M Kitamura B Takase N Kaifu H Maehara Y Osaki and A Yamasaki *History of Astronomy* John Lankford, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company Data Catalog Series for Space Science and Applications Flight Missions , 1982 Asteroids Curtis

Peebles,2016-04-26 Asteroids suggest images of a catastrophic impact with Earth triggering infernos tidal waves famine and death but these scenarios have obscured the larger story of how asteroids have been discovered and studied During the past two centuries the quest for knowledge about asteroids has involved eminent scientists and amateur astronomers patient research and sudden intuition advanced technology and the simplest of telescopes newspaper headlines and Cold War secrets Today researchers have named and identified the mineral composition of these objects They range in size from 33 feet to 580 miles wide and most are found in a belt between the orbits of Mars and Jupiter Covering all aspects of asteroid investigation Curtis Peebles shows how ideas about the orbiting boulders have evolved He describes how such phenomena as the Moon s craters and dinosaur extinction were gradually and by some scientists grudgingly accepted as the results of asteroid impacts He tells how a band of icy asteroids rimming the solar system first proposed as a theory in the 1940s was ignored for more than forty years until renewed interest and technological breakthroughs confirmed the existence of the Kuiper Belt Peebles also chronicles the discovery of Shoemaker Levy 9 a comet with twenty two nuclei that crashed into Jupiter in 1994 releasing many times the energy of the world s nuclear arsenal Showing how asteroid research is increasingly collaborative the book provides insights into the evolution of scientific ideas and the ebb and flow of scientific debate

Energy Research Abstracts ,1987 Reports on Astronomy Immo Appenzeller,2012-12-06 IAU Transactions are published as a volume corresponding to each General Assembly Volume A is produced prior to the Assembly and contains Reports on Astronomy prepared by each Commission President The intention is to summarize the astronomical results that have affected the work of the Commission since the production of the previous Reports up to a time which is about one year prior to the General Assembly Volume B is produced after the Assembly and contains accounts of Commission Meetings which were held together with other material The reports included in the present volume range from outline summaries to lengthy compilations and references Most reports are in English **Forty Years of Astronomy in the USSR, 1917-1957: Text- v. 2. Jappel,2012-12-06 The changing character of the IAU General Assemblies becomes most clear from a comparison of the agenda of the Brighton meeting with that of one of the earlier meetings The fourth General Assembly Cambridge Mass 1932 had about 240 participants registered guests included the Brighton meeting had about 2300 people attending The Cambridge meeting lasted 5 working days of which however three half days were exclusively devoted to excursions leaving four real meeting days At that time the nearly 30 commissions had each only one meeting during part of a morning or afternoon some

commissions did not meet at all There was one public lecture by Sir Arthur Eddington on The Expanding Universe Most of the small European countries were represented by two or three delegates only but the delegations of France and Great Britain were composed of 20 and 18 scientists respectively at that time there were only two delegates from Germany After the Brighton General Assembly with about 200 commission meetings one commission met eleven times six Joint Discussions four Invited Discourses a Special Meeting and hardly time for excursions there were a few complaints about too many overlapping meetings *The Great Comet Crash* John R. Spencer, Jacqueline Mitton, 1995-09-29 The cosmic collision of the century in words and photographs **Perspectives on Minority Influence** Serge Moscovici, Gabriel Mugny, Eddy van Avermaet, 1985-06-27 The contributors to this volume examine social processes in terms of minority influence
