The Publishers Weekly, 2004 *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004 *International Congress Calendar*, 2004 *Astronomy Now*, 2005 **Mercury**, 2005 *The Foundations of Celestial Reckoning* Christopher Cullen, 2016-12-01 The *Foundations of Celestial Reckoning* gives the reader direct access to the foundational documents of the tradition of calculation created by astronomers of the early Chinese empire between the late second century BCE and the third century CE. The paradigm they established was to shape East Asian thought and practice in the field of mathematical astronomy for centuries to come. It was in many ways radically different from better known traditions of astronomy in other parts of the ancient world. This book includes full English translations of the first three systems of mathematical astronomy adopted for use by imperial astronomical officials together with introductory material explaining the origin and nature of each system and a general introduction to the work as a whole. The translations which are accompanied by the original Chinese text give a consistent rendering of all technical terms and include detailed explanatory notes. The text in which the second of the three systems is found also includes a unique collection of documents compiled around 178 CE by two experts in the field, one of whom was the author of the third system translated in this book. Using material transcribed from government archives of the two preceding centuries, these scholars carefully document and review controversies and large scale official debates on astronomical matters up to their own time. Nothing equivalent in detail and clarity has survived from any other ancient culture. The availability of the totality of this material in English opens new perspectives to all historians of pre modern astronomy.

The Book of the Moon Rick Stroud, 2009 The *Book of the Moon* is an absorbing clear account of all things lunar. It is divided up into the following chapters: Facts and Figures, The Astronomers, their Charts, Maps and Instruments, Astronauts and Moon Missions, Gods and Myths, Astrology and Magic, Medicine, Miscellany.

Medieval Chinese Medicine Christopher Cullen, Vivienne Lo, 2004-06-02 In recent decades various versions of Chinese medicine have begun to be widely practised in Western countries and the academic study of the subject is now well established. However, there are still few scholarly monographs that describe the history of Chinese medicine and there are none at all on the medieval period. This collection represents the kind of international collaboration of research teams, centres and individuals that is required to begin to study the source materials adequately. The first book in English to discuss this fascinating material in the century since the Dunhuang library was discovered, the text provides a unique and fascinating interpretation of Chinese medical history.

On Their Own Terms Benjamin A. Elman, 2005-04-30 In *On Their Own Terms* Benjamin A. Elman offers a much needed synthesis of early Chinese science during the Jesuit period, 1600-1800, and the modern sciences as they evolved in China under Protestant influence, 1840s-1900. By 1600, Europe was ahead of Asia in

producing basic machines such as clocks levers and pulleys that would be necessary for the mechanization of agriculture and industry In the seventeenth and eighteenth centuries Elman shows Europeans still sought from the Chinese their secrets of producing silk fine textiles and porcelain as well as large scale tea cultivation Chinese literati borrowed in turn new algebraic notations of Hindu Arabic origin Tychonic cosmology Euclidian geometry and various computational advances Since the middle of the nineteenth century imperial reformers early Republicans Guomindang party cadres and Chinese Communists have all prioritized science and technology In this book Elman gives a nuanced account of the ways in which native Chinese science evolved over four centuries under the influence of both Jesuit and Protestant missionaries In the end he argues the Chinese produced modern science on their own terms Popular Science ,2004-12 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
