**Black Hole Tariffs and Endogenous Policy Theory** Stephen P. Magee, William A. Brock, Leslie Young, 1989-08-25 An example of special interest protection is provided by this study's general equilibrium theory that explains income distribution with goods markets factor markets lobbies political parties and voters all pursuing their self interests *International Trade Theory and Policy* Giancarlo Gandolfo, 2013-08-13 In the present text the author deals with both conventional and new approaches to trade theory and policy treating all important research topics in international economics and clarifying their mathematical intricacies The textbook is intended for undergraduates graduates and researchers alike It addresses undergraduate students with extremely clear language and illustrations making even the most complex trade models accessible In the appendices graduate students and researchers will find self contained treatments in mathematical terms The new edition has been thoroughly revised and updated to reflect the latest research on international trade The Political Economy of Trade Policy Robert C. Feenstra, Gene M. Grossman, Douglas A. Irwin, 1996 This collection of papers by former students and colleagues celebrates the profound impact that Jagdish Bhagwati has had on the field of international economics over the past three decades Bhagwati who is the Arthur Lehman Professor of Economics at Columbia University has made pathbreaking contributions to the theory of international trade and commercial policy including immiserizing growth domestic distortions economic development and political economy His success and influence as a teacher and mentor is widely recognized among students at both MIT and Columbia and as founder of the Journal of International Economics he has encouraged research on many questions of theoretical and policy relevance The political economy of trade policy Bhagwati's most recent area of interest is the theme of this collection which addresses salient topics including market distortions income distribution and the political process of policy making Sections and Contributors Market Distortions T N Srinivasan Paul A Samuelson Paul R Krugman Trade and Income Distribution Douglas A Irwin Richard A Brecher and Ehsan U Choudri Robert C Feenstra and Gordon H Hanson Earl L Grinols Perspectives on Political Economy Robert E Baldwin Peter Diamond Models of Political Economy and Trade Gene M Grossman and Elhana Helpman John Douglas Wilson B Peter Rosendorff Arvind Panagariya and Ronald Findlay **The Political Economy of Anti-dumping Protection** Patricia Wruuck, 2015-02-09 This book deals with anti dumping measures AD and investigates two questions First what country characteristics affect AD use and notably do domestic political institutions have an effect Second how is the decision to impose a new AD measure affected by anticipation of trading partners potential retaliation This book applies a strategic perspective to AD to address these questions presenting a game theoretic model together with an empirical test The approach sheds light on the dynamics of interaction between trading partners and allows to capture selection processes which underpin the trade restrictions that can actually be observed The book provides a fresh look on when and how trading powers apply antidumping measures how this is shaped by strategic interaction and whether institutions do make a

difference to the outcome In a period in which the international trading system has to cope with numerous stresses such as an increased resort to administered protection largely by big emerging economies this is a timely and important contribution Dr Klaus G nter Deutsch Managing Director Research Economic and Industrial Policy German Federation of Industries This book successfully integrates two research traditions in international politics the traditional view that looks at domestic factors of anti dumping policies and the strategic view that conditions the imposition of anti dumping measures on the likely retaliatory behavior of the trading partner The result is an informative and constructive examination of anti dumping protection and trade wars in the WTO Prof Dr Thomas Br uninger Chair of Political Economy University of Mannheim Germany The Political Economy of Anti Dumping Protection A Strategic Analysis is a major contribution to the important and growing field international political economy Starting with the traditional comparative institutional analysis which focuses on the implications of democratic and non democratic regimes for using anti dumping measures in trade politics the second part applies a strategic perspective on this type of sanctions uncovering the dynamic interactions between a challenging and challenged countries For all those interested in understanding the logic of sanctions the role of institutions and in how to examine the implications of theoretical models for international political economy this book is a must read Prof Dr Thomas K nig Chair of Political Science II University of Mannheim Germany Politics, Process, and American Trade Policy Sharyn O'Halloran,1994 Relying on the New Economics of Organizations NEO or New Institutionalism Politics Process and American Trade Policy shows why conventional models do not adequately describe the formation of American trade policy Rejecting both the pressure group model and the presidential ascendancy model this study s institution based approach emphasizes the influence Congress has in setting trade policy connecting theories of institutional design with the procedural details of regulating trade policy To reach her conclusions Sharyn O Halloran uses time series data and econometric analysis to test a set of propositions concerning trade policy She examines detailed case studies and provides a comprehensive history of the institutions that govern trade policy making Unlike most scholars who see trade policy as disparate and ad hoc O Halloran is able to explain both early and contemporary American trade policy in a consistent and integrated fashion She argues that a single set of procedures may lead to apparently different outcomes under differing initial conditions therefore the key is to identify the common logic derived from constitutional imperatives that underlies all policy outcomes The Oxford Handbook of the Political Economy of International Trade Lisa L. Martin,2015 The Oxford Handbook of the Political Economy of International Trade presents the most up to date review of scholarship in this field Building on an understanding of the economic interests that drive international trade political scientists integrate theories of domestic society domestic institutions and international organizations to further our understanding of this vital force of globalization This volume both surveys established theory and showcases cutting edge research Growth, Trade, and Systemic Leadership Rafael Reuveny,William R.
