Black Ideology In African Diaspora:

Black Ideology in African Diaspora P. Chike Onwuachi, 1973 The Ideological Origins of African American Literature Phillip M. Richards, 2025-06-27 Inquiry into African American literature in recent decades has neglected to probe the intellectual structure of the tradition's aesthetics and its underlying ideology In The Ideological Origins of African American Literature Phillip M Richards begins this reconstructive work illuminating the dialectical backstory of black prose and poetry in America Richards argues that the social and political forces that influenced white literature were uniquely reacted to absorbed and often times rejected by African American literary figures from the eighteenth century Puritan notions of a God centered history to the onset of Romanticism and Modernism in the nineteenth and twentieth centuries Building his case for ideological continuity Richards surveys a profoundly creative period of 125 years launched by an African American reaction against a racist mid eighteenth century American culture This epoch in African American literature saw a fusion of Puritan Protestant culture into a religious and secular worldview drawing in the poetry of Phillis Wheatley antebellum slave narratives Richard Allen and the periodicals of the ambitious African Methodist Episcopal movement all of which would form the underlying foundation of a Black Victorian culture A rising black middle class Richards argues would later be secularized by an eroding religious tradition under the pressures of nineteenth century modernity the trauma of Jim Crow and the emerging northern ghetto Richards further traces the emergence of Romanticism which appeared with white American authors such as Emerson Thoreau and Whitman but would not take shape in African American literature until the likes of W E B Du Bois and Langston Hughes took stock of Anglo European culture at the end of the nineteenth century The Ideological Origins of African American Literature illustrates a pattern of black writing that eschews the hegemonic white culture of the day for an evolving black culture that would define an American literary landscape The Ideologies of African American Literature Robert E. Washington, 2001 This book challenges the long held assumption that African American literature aptly reflects black American social consciousness Offering a novel sociological approach Washington delineates the social and political forces that shaped the leading black literary works Washington shows that deep divisions between political thinkers and writers prevailed throughout the 20th century Visit our website for sample chapters **The African Diaspora** Toyin Falola, 2013 The African diaspora is arguably the most important event in modern African history From the fifteenth century to the present millions of Africans have been dispersed many of them forcibly others driven by economic need or political persecution to other continents creating large communities with African origins living outside their native lands The majority of these communities are in North America This historic displacement has meant that Africans are irrevocably connected to economic and political developments in the West and globally Among the known legacies of the diaspora are slavery colonialism racism poverty and underdevelopment yet the ways in which these same factors worked to spur the scattering of Africans are not fully understood by those who were part of this migration or by scholars historians and

policymakers In this definitive study of the diaspora in North America Toyin Falola offers a causal history of the western dispersion of Africans and its effects on the modern world Reengaging old and familiar debates and framing new ones that enrich the discourse surrounding Africa Falola isolates the thread running nearly six centuries that connects the history of slavery the transatlantic slave trade and current migrations A boon to scholars and policymakers and accessible to the general reader the book explores diverse narratives of migration and shows that the cultures that migrated from Africa to the Americas have the capacity to unite and create a new pan Africanist movement within the globalized world Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin He is the 2011 recipient of the Distinguished Africanist Award from the African Studies Association and serves as the vice president of the International Scientific Committee of the UNESCO Slave Route Project His previous books published by the University of Rochester Press include *The Power of African Cultures and Nationalism and African Intellectuals* *Encyclopedia of African American Politics* Robert C. Smith, 2003 An A to Z presentation of over 400 articles on African American politics and notable people from the abolitionist movement to Whitney Young **Black Leaders and Ideologies in the South** Preston King, Walter Earl Fluker, 2013-09-13 A new collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass Booker Washington and Ida Wells Thurgood Marshall and Martin King are focused upon together with Howard Thurman Richard Wright Fred Gray and Barbara Jordan All are important in various ways to the movements this book seeks out From the perspective of liberation the two high points in the African American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth Douglass bestriding the first King and Marshall the second The thread of resistance runs through most of these philosophical profiles and the thread of non violence with greater or less force also runs throughout This volume assumes a distinction between a an earlier period when Afro America was more cohesive and collectively committed to self improvement despite the odds and b the contemporary period beyond desegregation marked by rates never previously rivaled of suicide joblessness imprisonment despair and alienation especially among black poor The life stories and philosophies presented here make fascinating reading This book is a Special Issue of the leading journal *Critical Review of International Social and Political Philosophy* **Introduction to African American Studies** Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and

researches in African American Studies simply conduct discipline based an analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d

Philosophy of African American Studies Stephen Ferguson,2015-09-16 In this ground breaking book Stephen C Ferguson addresses a seminal question that is too often ignored What should be the philosophical basis for African American studies The volume explores philosophical issues and problems in their relationship to Black studies Ferguson shows that philosophy is not a sterile intellectual pursuit but a critical tool to gathering knowledge about the Black experience Cultural idealism in various forms has become enormously influential as a framework for Black studies Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism Focusing on the hugely popular Afrocentric school of thought this book s engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions In turn Ferguson argues for the centrality of the Black working class both men and women to Black Studies
