Black Magic and Gremlins: Analog Flight Simulations at NASA's Flight Research Center ,2000 *Black Magic and Gremlins* Gene L. Waltman,2000 **Mach 3+ NASA USAF YF-12 flight research 1969-1979** , *NASA Historical Data Book: NASA launch systems, space transportation, human spaceflight, and space science, 1989-1998* ,1988 NASA Historical Data Book: NASA launch systems, space transportation ,1988 *Mars Wars* Thor Hogan,2009-08-13 On the 20th anniversary of the first human landing on the Moon President George H W Bush stood atop the steps of the National Air and Space Museum in Washington D C and proposed a long range human exploration plan that included the successful construction of an orbital space station a permanent return to the Moon and a mission to Mars This enterprise became known as the Space Exploration Initiative SEI The president charged the newly reestablished National Space Council with providing concrete alternatives for meeting these objectives To provide overall focus for the new initiative Bush later set a thirty year goal for a crewed landing on Mars Within a few short years after this Kennedyesque announcement however the initiative had faded into history the victim of a flawed policy process and a political war fought on several different fronts The story of this failed initiative was a tale of organizational cultural and personal confrontation by key protagonists and critical battles Some commentators have argued that SEI was doomed to fail due primarily to the immense budgetary pressures facing the nation during the early 1990s The central thesis of *Mars Wars The Rise and Fall of the Space Exploration Initiative* suggests however that failure was not predetermined Instead it was the result of a deeply flawed decision making process that failed to develop or even consider policy options that may have been politically acceptable given the existing political environment **NASA at 50** Rebecca Wright,Sandra Johnson,Steven J. Dick,United States. NASA History Program Office,2010 These interviews capture reflections from top decision makers as the space agency was completing its first 50 years Based on oral histories the book offers insights from those responsible for moving NASA through a deep transition from the end of the Space Shuttle Program the centerpiece of human spaceflight for three decades to the goals of the new policy known as the Vision for Space Exploration Cosmos & Culture: Cultural Evolution in a Cosmic Context Steven J. Significantly reduced list price This new book from the NASA History Series tackles an interesting duo of biological problems that will be familiar to anybody who has seen photos of Apollo astronauts quarantined after their return to Earth Namely how do we avoid contaminating celestial bodies with Earthly germs when we send spacecraft to study these bodies and how do we avoid spreading foreign biological matter from space when our robotic and human spacefarers return to Earth Biological matter from an external system could potentially cause an unchecked epidemic either on Earth or in space so strict precautions are necessary Each time a space vehicle visits another world it runs the risk of forever changing that extraterrestrial environment We are surrounded on Earth by a melange of different microorganisms and if some of these hitchhike onboard a space mission they could contaminate and start colonies on a different planet Such an occurrence would irrevocably alter the nature of that world compromise all future scientific exploration of the body and possibly damage any extant life on it By inadvertently carrying exotic organisms back to Earth on our spacecraft we also risk the release of biohazardous materials into our own ecosystem Such concerns were recognized by scientists even before the 1957 launch of Sputnik This book presents the history of planetary protection by tracing the responses to the above concerns on NASA s missions to the Moon Mars Venus Jupiter Saturn and many smaller bodies of our solar system The book relates the extensive efforts put forth by NASA to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own To protect irreplaceable environments NASA has committed to conducting space exploration in a manner that is protective of the bodies visited as well as of our own planet **Critical Issues in the**

History of Spaceflight Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA s goals in the wake of the Space Shuttle Columbia accident and the recommendations of the
