Black Mineworkers In Central Africa:

Black Mineworkers in Central Africa Charles Perrings, 1979 Monograph analysing the principle factors of historical working class formation among black copper miners in Zaire and Zambia economies in which means of production were based on coexistence of both capitalist and non capitalist social relations from 1911 to 1941 Discusses labour shortage and the use of unskilled workers in katanga industrial policy labour stabilization through longer labour contract duration labour market decision making labour mobility strikes etc White Mineworkers on Zambia's Copperbelt, 1926-1974 Duncan Money, 2021-12-06 Life and work on the Zambian Copperbelt a concentrated industrialised mining region along the border with DR Congo has been a perennial subject for Africanist historians In this book Duncan Money for the first time focusses on the white mineworkers who monopolised skilled jobs on the mines from the 1920s to the 1960s and became one of the most affluent groups of workers on the planet Money argues that this group was a highly mobile global workforce which constituted and saw itself as a racialised working class For much of the twentieth century this white working class moved between mining and industrial centres across and beyond the British Empire and their actions and forms of organisation were strongly influenced by their international connections and by their mobility These transnational connections and the white working class militancy they produced played a crucial role in shaping social categories of race and class on the Copperbelt and determining the evolution of a region which quickly became one of the world s largest sources of copper See inside the book **Copper King in Central Africa** Hyden Munene, 2022-01-31 Copper King in Central Africa offers a detailed account of the corporate history of the Rhokana Rokana Corporation and its Nkana mine Thematically and chronologically organised it explores the discovery of viable ores on the Northern Rhodesian Zambian Copperbelt in the late 1920s which attracted foreign capital from South Africa Britain and the USA prompting the development of the Nkana mine and the formation of the Rhokana Corporation in the early 1930s It follows through the evolution of the copper mining industry up to the re privatisation of the Zambian mining sector in 1991 The book ties into a single narrative the disparate themes of corporate organisation labour relations and profitability of Rhokana demonstrating how the firm was for a time the most important mining entity in the Northern Rhodesian Zambian mining industry Rhokana was both an investment firm on the Copperbelt and a mining company through Nkana mine Thus the Corporation was central to the development and profitability of the copper industry in Zambia Its corporate and labour policies influenced the Copperbelt as a whole Employing the largest labour force in the mining sector Rhokana spearheaded the labour movement on the Copperbelt Its Nkana mine was also the largest producer of copper in the Northern Rhodesian mining industry between 1940 and 1953 and contributed hugely to the war economies of Britain and the USA Throughout its history Nkana was also a major source of cobalt After nationalisation of the mining sector in 1970 Rhokana surrendered its investments in the wider copper industry but remained central to the Copperbelt s smelting and refining operations owning the biggest metallurgical facilities in the

industry **Migrant Laborers** Sharon Stichter,1985-12-19 This 1985 book surveys the literature on labor migration in east west and southern Africa and interprets it from a political economy perspective **Migrant Labour in South Africa's Mining Economy** Alan Jeeves,1985 Study of the origins of the migrant labour system in South Africa s gold mining industry Traces the development of the recruiting system and discusses how the gold industry struggled against the internal divisions which created the competition for labour until the Chamber of Mines with the support of the State centralized the system

Africa Under Colonial Domination 1880-1935 Unesco. International Scientific Committee for the Drafting of a General History of Africa,1985 Africa was partitioned and colonized by the Europeans After military conquest came the commercial exploitation of the wealth of Africa The intensity of resistance to colonization varied from one region to another but a new economic and social system linked with colonization was put in place bringing about unprecedented demographic and political change Publisher s description General Labour History of Africa Stefano Bellucci,Andreas Eckert,2019 The first comprehensive and authoritative history of work and labour in Africa a key text for all working on African Studies and Labour History worldwide Encyclopedia of African History 3-Volume Set KEVIN SHILLINGTON.,2005 *Tensions of Empire* Frederick Cooper,Ann Laura Stoler,1997-02-06 Carrying the inquiry into zones previous itineraries have typically avoided the creation of races sexual relations invention of tradition and regional rulers strategies for dealing with the conquerors the book brings out features of European expansion and contraction we have not seen well before Charles Tilly The New School for Social Research What is important about this book is its commitment to shaping theory through the careful interpretation of grounded empirically based historical and ethnographic studies By far the best collection I have seen on the subject Sherry B Ortner Columbia University History After Hobsbawm John Arnold,Matthew Hilton,Jan Rüger,2018 What does it mean and what might it yet come to mean to write history in the twenty first century History After Hobsbawm brings together leading historians from across the globe to ask what being an historian should mean in their particular fields of study Taking their cue from one of the previous century s greatest historians Eric Hobsbawm and his interests across many periods and places the essays approach their subjects with an underlying sense of what role an historian might seek to play and attempt to help twenty first century society understand how we got here They present new work in their sub fields but also point to how their specialisms are developing how they might further grow in the future and how different areas of focus might speak to the larger challenges of history both for the discipline itself and for its relationship to other fields of academic inquiry Like Hobsbawm the authors in this collection know that history matters They speak to both the past and the present and in so doing introduce some of the most exciting new lines of research in a broad array of subjects from the medieval period to the present **AF Press Clips** ,1987-07 **Handbook Global History of Work** Karin Hofmeester,Marcel van der Linden,2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving

the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession *African American Miners and Migrants* Thomas E. Wagner, Philip J.

Obermiller, 2004-02-09 Thomas E Wagner and Phillip J Obermiller's *African American Miners and Migrants* documents the lives of Eastern Kentucky Social Club EKSC members a group of black Appalachians who left the eastern Kentucky coalfields and their coal company hometowns in Harlan County Bound together by segregation the inherent dangers of mining and coal company paternalism it might seem that black miners and mountaineers would be eager to forget their past Instead members of the EKSC have chosen to celebrate their Harlan County roots *African American Miners and Migrants* uses historical and archival research and extensive personal interviews to explore their reasons and the ties that still bind them to eastern Kentucky The book also examines life in the model coal towns of Benham and Lynch in the context of Progressive Era policies the practice of welfare capitalism and the contemporary national trend of building corporate towns and planned communities

AF Press Clips United States Department of State. Bureau of African Affairs, 1979 **Mining Tycoons in the Age of Empire, 1870-1945** Raymond E. Dumett, 2016-12-05 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an unprecedented level of technological change material excess untrammled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who with the thousands of prospectors diggers shift bosses timbermen blastmen and muckers in mining enterprise constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich Each chapter is loosely focussed on a biographical account of a particular mining tycoon that allows for broad and comparative accounts to be made about the individuals their business interests the technologies they employed and the national and international political considerations under which they operated Furthermore this structure also allows for consideration of the effect that these tycoons had on the countries and territories in which they worked particularly the often long lasting impact on indigenous populations the environment transport links and economic development By approaching the subject matter through this stimulating mix of cultural social economic business and

colonial history many intriguing and thought provoking conclusions are reached that will reward any scholars with an interest late nineteenth and early twentieth century history *Political Power and Colonial Development in British Central Africa 1938-1960s* Alan Cousins,2022-12-30 This book focuses on the late colonial history of Zambia and Malawi which between 1953 and 1963 were part of the Federation of Rhodesia and Nyasaland Although there were many links in their history and between their populations the two territories British protectorates under Colonial Office control contrasted greatly in power structures in their economies and in their development Europeans living in Northern Rhodesia with a power base in the mining economy were able to establish a dominant position in the territory after the Second World War By the 1950s it looked as though they would have with Southern Rhodesian Europeans a long hegemony gaining independence from Britain as a new Dominion which would mean control over both Northern Rhodesia and Nyasaland through the Federation Thus white ethnicity and ideology are essential factors in this book relating to the struggle for power from just before the Second World War up to the 1960s However crises in 1959 and 1960 led to the collapse of the Federation A second focus is on issues of social and economic development For Africans in Nyasaland and in rural parts of Northern Rhodesia there was a relatively weak economy in this period a pattern of limited cash crop production while many people became caught up in labour migration subordinate to powerful European dominated economic forces within southern Africa This meant that colonial policies aimed at rural development were fundamentally flawed The book also looks at the actual nature of rural economic change as opposed to colonial policies and discusses alternative visions of the future which were put forward The argument is put that historians have often concentrated on the activities of the main nationalist movements in Nyasaland and Northern Rhodesia seeing them as bringing progress away from colonialism and towards independence Here there is an attempt to draw out the complexities of life and a variety of responses in the colonial situation progress coming in a number of forms but not always being achieved *The Cambridge History of Africa* J. D. Fage,Roland Anthony Oliver,A. D.

Roberts,1975 This seventh volume in The Cambridge History of Africa examines the period 1905 40 in African history Colonial and Postcolonial Africa Rosina Beckman,2016-12-14 **The Social Basis of Health and Healing in Africa** Steven Feierman,John M. Janzen,1992-09-22 These essays are an account of disease health and healing practices on the African continent The contributors all emphasize the social conditions linked to ill health and the development of local healing traditions from Morocco to South Africa and from the precolonial era to the present **Leadership and Economic Development Challenges in Post-Colonial Africa** Chukwuemeka Ezenwa Osuigwe,2023-12-30 This book explores the economic and development challenges seen within post colonial Africa Particular attention is given to governance and political leadership challenges within Africa and how they have resulted in poor education facilities a lack of infrastructure development corruption and economic insecurity The ways in which Africa s natural resources and agricultural land have not been utilised to drive development and economic growth are examined in relation to internal political conflicts Broader issues

such as labour exploitation financial leakage and the exclusion of women from decision making are also discussed This book highlights poor political leadership within Africa and presents a framework for inclusive economic growth within post colonial Africa It will be of interest to students researchers policymakers and leaders working with development of African economics
