Texts and Textuality Philip G. Cohen, 2018-12-20 These essays deal with the scholarly study of the genesis transmission and editorial reconstitution of texts by exploring the connections between textual instability and textual theory interpretation and pedagogy What makes this collection unique is that each essay brings a different theoretical orientation New Historicism Poststructuralism or Feminism to bear upon a different text such as Whitman's *Leaves of Grass* Faulkner's *The Sound and the Fury* or hypertext fiction to explore the dialectical relationship between texts and textuality The essays bring some of the textual theories that compete with each other today into contact with a broad range of primarily literary textual histories That texts are intrinsically unstable frequently consisting of a series of determinate historical versions has consequences for all students of literature because different versions of a literary work frequently help shape different readings independently of the interpretations brought to bear upon them Textual instability of the works is relevant to our understanding of how the meanings of texts are generated The contributors build on the numerous challenges to the Anglo American editorial tradition mounted during the past decade by scholars as diverse as Jerome McGann D F McKenzie Peter Shillingsburg D C Greetham Hershel Parker and Hans Walter Gabler The volume contributes to the paradigm shift in textual scholarship inaugurated by these scholars

Oaths of Allegiance in Colonial New England Charles Evans, 2022-09-15 In *Oaths of Allegiance in Colonial New England* Charles Evans meticulously examines the pivotal role that oaths played in the socio political landscape of New England during its formative years Through a combination of primary source analysis and rigorous

scholarship Evans delves into legal documents religious texts and personal correspondences illustrating how these oaths functioned not merely as ceremonial affirmations but as critical instruments of governance and community cohesion The narrative is rich with historical context situating the oaths within broader themes of loyalty identity and resistance against shifting political powers all articulated in a clear and engaging prose that captivates both historians and lay readers alike Charles Evans a noted historian with extensive expertise in early American studies draws upon his academic background and personal passion for uncovering the intricacies of colonial life to frame this compelling study His previous works on colonial governance and social structures lend credibility to his arguments while his nuanced understanding of the interplay between religion and politics offers depth to the analysis Evans dedication to unearthing lesser known narratives of early New England infuses the book with a fresh perspective that challenges conventional historical interpretations Oaths of Allegiance in Colonial New England is an essential read for scholars students and anyone fascinated by the complexities of early American history With its thoughtful exploration of loyalty and identity the book not only sheds light on a unique aspect of colonial life but also resonates with contemporary discussions of allegiance and dissent Readers will find themselves enriched by Evans scholarship and keen insights making this work a valuable addition to any historical library

The Ideological Origins of African American Literature Phillip M. Richards, 2025-06-27 Inquiry into African American literature in recent decades has neglected to probe the intellectual structure of the tradition s aesthetics and its underlying ideology In *The Ideological Origins of African American Literature* Phillip M Richards begins this reconstructive work illuminating the dialectical backstory of black prose and poetry in America Richards argues that the social and political forces that influenced white literature were uniquely reacted to absorbed and often times rejected by African American literary figures from the eighteenth century Puritan notions of a God centered history to the onset of Romanticism and Modernism in the nineteenth and twentieth centuries Building his case for ideological continuity Richards surveys a profoundly creative period of 125 years launched by an African American reaction against a racist mid eighteenth century American culture This epoch in African American literature saw a fusion of Puritan Protestant culture into a religious and secular worldview drawing in the poetry of Phillis Wheatley antebellum slave narratives Richard Allen and the periodicals of the ambitious African Methodist Episcopal movement all of which would form the underlying foundation of a Black Victorian culture A rising black middle class Richards argues would later be secularized by an eroding religious tradition under the pressures of nineteenth century modernity the trauma of Jim Crow and the emerging northern ghetto Richards further traces the emergence of Romanticism which appeared with white American authors such as Emerson Thoreau and Whitman but would not take shape in African American literature until the likes of W E B Du Bois and Langston Hughes took stock of Anglo European culture at the end of the nineteenth century *The Ideological Origins of African American Literature* illustrates a pattern of black writing that eschews the hegemonic white culture of the day for an evolving black culture that would define an American literary

Underwood, Randall Kennedy, 1993-03-01 The history of blacks at Harvard mirrors for better or for worse the history of blacks in the United States Harvard too has been indelibly scarred by slavery exclusion segregation and other forms of racist oppression At the same time the nation s oldest university has also at various times stimulated supported or allowed itself to be influenced by the various reform movements that have dramatically changed the nature of race relations across the nation The story of blacks at Harvard is thus inspiring but painful instructive but ambiguous a paradoxical episode in the most vexing controversy of American life the race question The first and only book on its subject Blacks at Harvard is distinguished by the rich variety of its sources Included in this documentary history are scholarly overviews poems short stories speeches well known memoirs by the famous previously unpublished memoirs by the lesser known newspaper accounts letters official papers of the university and transcripts of debates Among Harvard s black alumni and alumnae are such illustrious figures as W E B Du Bois Monroe Trotter and Alain Locke Countee Cullen and Sterling Brown both received graduate degrees The editors have collected here writings as diverse as those of Booker T Washington William Hastie Malcolm X and Muriel Snowden to convey the complex ways in which Harvard has affected the thinking of African Americans and the ways in turn in which African Americans have influenced the traditions of Harvard and Radcliffe Notable among the contributors are significant figures in African American letters Phillis Wheatley William Melvin Kelley Marita Bonner James Alan McPherson and Andrea Lee Equally prominent in the book are some of the nation s leading historians Carter Woodson Rayford Logan John Hope Franklin and Nathan I Huggins A vital sourcebook Blacks at Harvard is certain to nourish scholarly inquiry into the social and intellectual history of African Americans at elite national institutions and serves as a telling metaphor of this nation s past *New Essays on Phillis Wheatley* John C. Shields, Eric D. Lamore, 2011-05-30 The first African American to publish a book on any subject poet Phillis Wheatley 1753 1784 has long been denigrated by literary critics who refused to believe that a black woman could produce such dense intellectual work In recent decades however Wheatley s work has come under new scrutiny as the literature of the eighteenth century and the impact of African American literature have been reconceived Fourteen prominent Wheatley scholars consider her work from a variety of angles affirming her rise into the first rank of American writers from publisher description **Written by Herself** Frances Smith Foster, 1993 substantial contribution to African American Studies and women s studies Mississippi Quarterly A bravura performance by an accomplished scholar it strikes a perfect balance between insightful literary analysis and historical investigation Eighteenth Century Studies an impressive study of a wide range of writers Foster s work is both scholarly and accessible Her prose is economical and direct making this book enjoyable as well as instructive Belles Lettres an impressively wide ranging discussion of texts and contexts Signs Foster has written a fine book that provides the reader with a context for understanding the importance of the written word for women who chose to set the record straight Journal of American History fascinating meticulously researched Likely to prove seminal

William Pickering ... which will be sold by auction William Pickering,1854 *The Lever of Riches* Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
