Black Recreation Jearold Winston Holland, 2002 While the black experience in America has been told in many ways it has seldom if ever been substantially addressed from the play recreation and leisure perspective That is the primary intent of *Black Recreation A Historical Perspective* One might ask why is the recreation and leisure paradigm a useful means of exploring the black experience Leisure and recreation activities are an important measure of quality of life among other factors such as happiness wealth and health We can gain a significant understanding of the black experience through historical analysis of black involvement and participation in play recreation and leisure in America Historical interpretation accurately presented can help give individuals a better sense of identity of who they are and how far they have come Both minority and majority readers will benefit from broad based analysis of the recreational activities and effects they had on American culture as a whole A Burnham Publishers book

Playing by the Rules John Wilson, 1994 Sport while it has its origins in the love of play and the desire to be entertained and diverted is a social institution with important political economic and social consequences Playing by the Rules describes how the relation between sport and the state has developed over the last one hundred years and how largely by indirection and accident a public policy with respect to sport has emerged Apart from the debate as to whether sport and politics should mix in the first place John Wilson considers the process whereby sport has become a public policy domain just like energy health transportation and agriculture He argues that while all modern societies have evolved both sports complexes and extensive states Americans have developed their own unique kind of relationship This relationship grants considerable freedom for commercialized sports to develop at the expense of more state administered forms At the same time this arrangement allows commercialized sports to benefit from state protection and guarantees all in the interest of the public good a system that is highly characteristic of public policy in liberal democratic societies where individual freedom is a paramount value Wilson traces the impact of liberal democratic politics through a number of discrete but related fields from the struggle to secure equality of opportunity for all individuals to participate in sport to the evolution of contractual freedom

for professional athletes and the role played by unions in securing these freedoms He then examines the impact of state actions mainly judicial on the structure of the sports industry principally the impact of the state on the relation between firms or franchises ability to control players entry into the league movement of franchises and relations with the mass media Playing by the Rules also defines the relation between sport and the state more broadly Assuming that the state is interested in nation building to legitimate its practices Wilson explores the role sport has played in this nation building in the United States the perceived relation between sport and citizenship the part sport has been asked to play in the national task of assimilating immigrants and the efforts the state has made to control and regulate sport in the interest of promoting national and citizenship values Beyond that Wilson addresses the impact on sport of the United States participation in the emerging global order the effect on amateur athletics of the state s need to protect national interests and secure defense in the United States and the extent to which a global order of sport has emerged that now transcends national boundaries and weakens the control of the state over sport

The Making of the New Negro examines black masculinity in the period of the New Negro Harlem Renaissance which for many decades did not attract a lot of scholarly attention until in the 1990s many scholars discovered how complex significant and fascinating it was Using African American published texts American archives and unpublished writings and contemporaneous European discourses this book focuses both on the canonical figures of the New Negro Movement and African American culture such as W E B Du Bois Booker T Washington Alain Locke and Richard Wright and on writers who have not received as much scholarly attention despite their significance for the movement such as Wallace Thurman Its perspective combines gender sexuality and race studies with a thorough literary analysis and historicist investigation an approach that has not been extensively applied to analyze the New Negro Renaissance Communities In Economic Crisis John Gaventa,Barbara Ellen Smith,Alex W. links between drama and ritual and drama and music and diagnoses the confusions in our thought The reader is reminded that drama is never merely the printed word but that its existence as literature and in performance is necessarily different The analysis shows that literature tends to replace performance and drama removed from the popular domain becomes elitist The book's richness lies in the constantly stimulating analysis of art theatre as exemplified in protest plays in African adaptations and transpositions of such classical subjects as the Bacchae and Everyman in plays on African history on colonialism and neo colonialism The final chapters argue that the form of African drama needs to evolve as the content does
