Brattstrom,Martha A. Brattstrom,Mary E. Shipman,2016-04-29 Rhinos are interesting fun to watch and endangered of becoming extinct This book is first about how scientists study rhinos and then information is presented on rhino taxonomy distribution ecology fossil history behavior reproduction and conservation including poaching But there is a lot more to rhinos than just the above there are also sections on rhinos in history rhinos in art rhino companies logos and products as well as lists of rhino books toys and conservation organizations [The Mammals of the Southern African Sub-region](#) J. D. Skinner,Christian T. Chimimba,2005-11-15 This third extensively revised edition of *The Mammals of the Southern African Subregion* contains detailed descriptions of all mammals that occur naturally on the African mainland south of the Cunene and Zambezi rivers together with all mammals indigenous to the subregion s coastal waters The rapid accumulation of new information resulting from mammal research in southern Africa together with radical taxonomic changes across all levels of mammalian classification have necessitated this new edition which presents the best and latest data accurately in one comprehensive volume for use not only by scientists but also by an increasingly wide audience of general readers with an interest in the natural history of southern Africa J D Skinner and C T Chimimba have revised expanded and updated the text in a major project overseen by an editorial committee constituted by the Mammal Research Institute at the University of Pretoria Specialists on each mammalian order have served as subeditors and a range of independent and internationally recognised authorities have reviewed every species description In this edition all the distribution maps and many of the illustrations of mammal prints have been updated and redrawn several new colour plates have been added and the whole design of this definitive reference work has been enhanced to ensure easy access to information BOOK JACKET

Ngorongoro Visitor Map Guide Jacana Education,2008-08-12 Ngorongoro is without doubt one of the world's truly amazing places. It has been called the 8th Wonder of the World and in 1979 was designated a World Heritage Site. At 20km across and over 600m deep it is the largest unbroken unflooded crater on the planet. The Mammals of Ancient Egypt Dale J. Osborn, Jana Osbornová, 2024-06-15 Various attempts have been made to systematize the mammals depicted in Egyptian tomb paintings, inscriptions, carvings, figurines, and other objects, and as mummies, but there are many discrepancies, variable spellings, and names, including now obsolete Latin names and misidentifications. The Egyptian artists themselves sometimes used the wrong hieroglyph or drew some parts of animals incorrectly. Dale Osborn's comprehensive reassessment presented here in a facsimile reissue catalogues around 100 separate species, ranging from hedgehogs to hippopotami, Anubis, baboons, to zebu cattle that can be identified in Egyptian art from prehistoric through Pre-Dynastic to Late Kingdom times. Profusely illustrated, the catalogue is arranged by Order, then species, each entry providing the relevant hieroglyph, a brief description of the animal, its natural habitat and distribution, and a narrative on its depiction in Egyptian art through time, by location, types of illustration, or object and context, tomb, etc. Known errors and discrepancies, either in original scripts or classical and/or modern literature, are listed. Mammals are abundantly depicted in tomb paintings and inscriptions. Common scenes include hunts, processions, wild animals being led on chains, domesticated animals in household and working environments, and satirical scenes. Such scenes provide many insights into the lives of Egyptians and their relationships with animals that are further enhanced by many decorative figurines and statues, and often poignantly by the mummies of mostly small animals, including cats and dogs. *Deadly Rhinoceroses* Theresa Emminizer, 2020-07-15 Two species of rhinoceroses live in Africa: the white rhinoceros and the black rhinoceros. However, both are actually gray. They can run very fast and are some of the largest land mammals in the world. Your readers will learn about where these huge horned creatures live, what they look like, what they eat, and how they behave. They'll be ready to go on a safari and identify African rhinos in the wild. **The Rhino Keepers** Clive Walker, Anton Walker, 2012 The conservation of the rhinos in southern Africa is described in this account of these fascinating animals, the reasons behind their historical decline, the myths that surround them, and the resurrection of the rhinoceros horn trade. Few animals face as violent, as well-organized, and as determined an enemy as the world's rhinos. But across the African continent, they are being slaughtered on a daily basis, and approximately 5,000 black rhinos and 21,000 white rhinos are all that prevent their extinction. This real account of the rhino wars is a harrowing story, underscoring the enormous challenges that lie ahead for conservation in a world where rhino horns sold by the gram raise double the price of gold and are more expensive than cocaine in the end-user Asian markets. Arguing that protecting Africa's rhinos is of utmost importance, it questions the management of natural heritage and implores readers to recognize their role as rhino keepers of the future. *Dodging Extinction* Anthony D. Barnosky, 2014-10-01 Paleobiologist Anthony D. Barnosky weaves together evidence from the deep past and the present to alert us to the looming Sixth Mass Extinction and to offer a practical, hopeful

plan for avoiding it Writing from the front lines of extinction research Barnosky tells the overarching story of geologic and evolutionary history and how it informs the way humans inhabit exploit and impact Earth today He presents compelling evidence that unless we rethink how we generate the power we use to run our global ecosystem where we get our food and how we make our money we will trigger what would be the sixth great extinction on Earth with dire consequences Optimistic that we can change this ominous forecast if we act now Barnosky provides clear cut strategies to guide the planet away from global catastrophe In many instances the necessary technology and know how already exist and are being applied to crucial issues around human caused climate change feeding the world s growing population and exploiting natural resources Deeply informed yet accessibly written Dodging Extinction is nothing short of a guidebook for saving the planet
