Emenyonu, Chimalum Nwankwo, Louisa Uchum Egbunike, 2021 Over the past two decades there has been a resurgence in the writing of African and African diaspora speculative and science fiction writing Discussions around the rise of science fiction and fantasy have led to a push back by writers and scholars who have suggested that this is not a new phenomenon in African literature This collection focuses on the need to recalibrate ways of reading and categorising this genre of African writing through critical examinations both of classics such as Kojo Laing's Woman of the Aeroplanes 1988 and Ng g wa Thiong o's oeuvre as well as more recent fiction from writers including Nnedi Okorafor Namwali Serpell and Masande Ntshanga Back cover *Arab and Muslim Science Fiction* Hosam A. Ibrahim Elzembely, Emad El-Din Aysha, 2022-05-06 How is science fiction from the Arab and Muslim world different than mainstream science fiction from the West What distinctive and original contributions can it make Why is it so often neglected in critical considerations of the genre While other books have explored these questions all have been from foreign academic voices Instead this book examines the nature genesis and history of Arabic and Muslim science fiction as well as the challenges

faced by its authors in the authors own words These authors share their stories and struggles with censors recalcitrant publishers critics the book market and the literary establishment Their uphill efforts with critical contributions from academics translators and literary activists will enlighten the sci fi enthusiast and fill a gap in the history of science fiction Topics covered range from culture shock to conflicts between tradition and modernity proactive roles for female heroines blind imitation of storytelling techniques and language games *The Cambridge Companion to American Science Fiction* Eric Carl Link, Gerry Canavan, 2015-01-26 This Companion explores the relationship between the ideas and themes of American science fiction and their roots in the American cultural experience **The Science Fiction of Poetics and the Avant-Garde Imagination** Michael Golston, 2023-11-19 How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts This insightful playful monograph from Golston does exactly what it advertises modeling poetics based on how poetry and some parallel artistic endeavors has filtered through a century plus of science fiction This is not a book about science fiction in and of itself but it is a book about the resonances of science fiction tropes and ideas in poetic language The germ of Golston s project is a throwaway line in Robert Smithson s *Entropy and the New Monuments* about how cinema supplanted nature as inspiration for many of his fellow artists The movies give a ritual pattern to the lives of many artists and this induces a kind of low budget mysticism which keeps them in a perpetual trance Golston charts how the demotic appeal of sci fi much like that of the B movie cross pollinated into poetry and other branches of the avant garde Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin Roman Jakobson and Gilles Deleuze He starts by acknowledging that per the important work of Darko Suvin to situate science fiction critically the genre is premised on cognitive estrangement But he is not interested in the specific nuts and bolts of science fiction as it exists but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists Golston s critical lens moves around quite a bit but he begins with familiar enough subjects Edgar Rice Burroughs Mina Loy William S Burroughs From there he moves into more alien terrain Ed Dorn s long poem *Gunslinger* the discombobulated work of Clark Coolidge Sun Ra Ornette Coleman and Jimi Hendrix all come under consideration The result of Golston s restless rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism Frankfurt School dialectics and Deleuzian theory to show how the avant garde inherently follows the parameters of sci fi in both theme and form *The Latinx Files* Matthew David Goodwin, 2021-05-14 In *The Latinx Files* Matthew David Goodwin traces how Latinx science fiction writers are reclaiming the space alien from its xenophobic legacy in the science fiction genre The book argues that the space alien is a vital Latinx figure preserving Latinx cultures by activating the myriad possible constructions of the space alien to represent race and migration in the popular imagination The works discussed in this book including those of H G Wells Gloria Anzald a Junot Diaz Andr M Carrington and many others often explicitly reject the derogatory correlation of the space alien and Latinxs while at other times they contain space aliens

that function as a source of either enlightenment or horror for Latinx communities Throughout this nuanced analysis The Latinx Files demonstrates how the character of the space alien has been significant to Latinx communities and has great potential for future writers and artists

The Eternal Future of the 1950s Dennis R. Cutchins,Dennis R. Perry,2023-07-17 Science fiction cinema once relegated to the undervalued B movie slot has become one of the dominant

film genres of the 21st century with Hollywood alone producing more than 400 science fiction films annually. Many of these owe a great deal of their success to the films of one defining decade: the 1950s. Essays in this book explore how classic 50s science fiction films have been recycled, repurposed, and reused in the decades since their release. Tropes from Don Siegel's *Invasion of the Body Snatchers* (1956) for instance have found surprising new life in Netflix's wildly popular *Stranger Things*. *Interstellar* (2014) and *Arrival* (2016) have clear though indirect roots in the iconic 1950s science fiction films *Rocketship X-M* (1950) and *The Day the Earth Stood Still* (1951), and *The Shape of Water* (2017) openly recalls and reworks the major premises of *The Creature from the Black Lagoon* (1954). Essays also cover 1950s sci-fi influences on video game franchises like *Fallout*, *Bioshock*, and *Wolfenstein*.

The Oxford Handbook of Digital Religion (Campbell, 2023-11-15). Digital Religion refers to the contemporary practice and understanding of religion in both online and offline contexts and how these contexts intersect with each other. Scholars in this growing field recognize that religion has been influenced by its engagement with computer-mediated digital spaces including not only the Internet but other emerging technologies such as mobile phones, digital wearables, virtual reality, and artificial intelligence. The *Oxford Handbook of Digital Religion* provides a comprehensive overview of religion as seen and performed through various platforms and cultural spaces created by digital technology. The text covers religious interaction with a wide range of digital media forms including social media, websites, gaming environments, virtual and augmented realities, and artificial intelligence, and highlights examples of technological engagement and negotiation within the major world religions: i.e. Buddhism, Christianity, Hinduism, Islam, and Judaism. Additional sections cover the global manifestations of religious community, identity, ethics, and authority, with a final group of chapters addressing emerging technologies and the future of the field. Because of the interdisciplinary nature of the project, the Handbook is led by co-editors representing the humanistic and social scientific fields of religious studies and communication, though both also have experience in how those disciplines intersect.
