Black Selfdetermination:

Black Self-determination Vincent P. Franklin, 1984 This path breaking study questions many of the previous assessments of the cultural objectives of Afro Americans and points the way toward the new and decisive role black Americans may soon be playing in American life V P Franklin associate professor of History and Afro American studies at Yale University examines the core values of the Afro American experience He quotes from early slave narratives songs sermons and interviews with ex slaves to show how Afro Americans came to value freedom resistance and black unity and to formulate cultural values separate from white dominated society Back cover

Black Self-determination Vincent P. Franklin, 1992 Explains that from the late eighteenth to the twentieth centuries Black mass movements have been acts of self determination and not acts of assimilation into white society The Black Radical Tragic Jeremy Matthew Glick, 2016-01-15 Also available as an ebook Verso title page

Black Power Ideologies John McCartney, 1993-07-20 In a systematic survey of the manifestations and meaning of Black Power in America John McCartney analyzes the ideology of the Black Power Movement in the 1960s and places it in the context of both African American and Western political thought He demonstrates though an exploration of historic antecedents how the Black Power versus black mainstream competition of the sixties was not unique in American history Tracing the evolution of black social and political movements from the 18th century to the present the author focuses on the ideas and actions of the leaders of each major approach Starting with the colonization efforts of the Pan Negro Nationalist movement in the 18th century McCartney contrasts the work of Bishop Turner with the opposing integrationist views of Frederick Douglass and his followers McCartney examines the politics of accommodation espoused by Booker T Washington W E B Du Bois s opposition to this apolitical stance the formation of the NAACP the Urban League and other integrationist organizations and Marcus Garvey s reawakening of the separatist ideal in the early 20th century Focusing on the intense legal activity of the NAACP from the 1930s to the 1960s McCartney gives extensive treatment to the moral and political leadership of Martin Luther King Jr and his challenge from the Black Power Movement in 1966

Black Liberation George M. Fredrickson, 1996-10-31 When George M Fredrickson published *White Supremacy A Comparative Study in American and South African History* he met universal acclaim David Brion Davis writing in *The New York Times Book Review* called it one of the most brilliant and successful studies in comparative history ever written The book was honored with the Ralph Waldo Emerson Prize the Merle Curti Award and a jury nomination for the Pulitzer Prize Now comes the sequel to that acclaimed work In *Black Liberation* George Fredrickson offers a fascinating account of how blacks in the United States and South Africa came to grips with the challenge of white supremacy He reveals a rich history not merely of parallel developments but of an intricate transatlantic web of influences and cross fertilization He begins with early moments of hope in both countries Reconstruction in the United States and the liberal colonialism of British Cape Colony when the promise of suffrage led educated black elites to fight for color blind equality A rising tide of racism and

discrimination at the turn of the century however blunted their hopes and encouraged nationalist movements in both countries Fredrickson teases out the connections between movements and nations examining the transatlantic appeal of black religious nationalism known as Ethiopianism and the pan Africanism of Du Bois and Garvey He brings to vivid life the decades of struggle organizing and debate as blacks in the United States looked to Africa for identity and South Africans looked to America for new ideas and hope The book traces the rise of Communist influence in black movements in the two nations in the 1920s and 30s and the adoption of Gandhian nonviolent protest after World War II The story of India s struggle however was not to be repeated in either America or South Africa in one nation nonviolence revealed its limitations encouraging splits in the civil rights movement in the other it failed fostering an armed struggle against white supremacy Fredrickson brings the story up through the present exploring the divergence between African American identity politics and the nonracialism that has triumphed in South Africa In a career spanning thirty years George Fredrickson has won recognition as the leading scholar of the struggle over racial domination in the United States and South Africa In *Black Liberation* he provides the essential companion volume to his award winning *White Supremacy* telling the story of how blacks fought back on both sides of the Atlantic

Black Self-Determination Arthur M. Brazier,1969 [How Blacks Built America](#) Joe R. Feagin,2015-07-30 *How Blacks Built America* examines the many positive and dramatic contributions made by African Americans to this country over its long history Almost all public and scholarly discussion of African Americans accenting their distinctive societal position especially discussion outside black communities has emphasized either stereotypically negative features or the negative socioeconomic conditions that they have long faced because of systemic racism In contrast Feagin reveals that African Americans have long been an extraordinarily important asset for this country Without their essential contributions indeed there probably would not have been a United States This is an ideal addition to courses race and ethnicity courses

Black Scare / Red Scare Charisse Burden-Stelly,2023-11-14 She theorizes two bases of the Black Scare Red Scare US Capitalist Racist Society a racially hierarchical political economy built on exploitative labor relationships and Wall Street Imperialism the violent processes by which businesses and the US government structured domestic and foreign policies to consolidate capital and racial domination In opposition Radical Blackness embodied the government s fear of both Black insurrection and Red instigation The state s actions and rhetoric therefore characterized Black anticapitalists as foreign alien and undesirable This reactionary response led to an ideology that Burden Stelly calls True Americanism the belief that the best things about America were absolutely not Red and not Black which were interchangeable threats Black Scare Red Scare illuminates the anticommunist nature of the US and its governance but also shines a light on a misunderstood tradition of struggle for Black liberation

Radical Sovereignty Tony Wood,2026-01-06 In the 1920s and 1930s Latin American radicals engaged in urgent debates over how to combat racism resist empire and reimagine the nation state Drawing on a global array of sources *Radical Sovereignty* reconstructs these transnational

discussions that unfolded in such far flung locations as Mexico City Buenos Aires Havana Moscow and Brussels Energized by the Mexican and Russian Revolutions communists trade unionists peasant organizers and anti imperial activists emerged from these debates with innovative ideas for addressing historical oppressions including proposals for a pan continental confederation and calls to grant Black and Indigenous peoples in the Americas the right to form their own sovereign states While these projects did not come to fruition they left an enduring mark on Latin America s political landscape bequeathing approaches to race ethnicity and self determination that have resurfaced in recent years

The Uneasy Conscience of a White Christian Clifford Williams, 2021-12-17 Do White people bear moral responsibility for racial disparities Are White Christians under a spiritual mandate to make racial equity a priority Clifford Williams taught philosophy at Christian colleges for many years including a course on race He has journeyed alongside students as they gained insights about racism In this book he draws from deeply personal stories as he shows the need for White Christians to recognize the impact of racism and to cultivate key character traits which enable them to pursue racial equity In succinct and thoughtful prose interwoven with first person accounts of racialized experiences by people of color Williams describes the importance of the Golden Rule the power and effects of racial socialization and the harm racism does to those who harbor it He asks the haunting question Why do White people react so strongly to Black power He explains why widespread church integration in the United States may never exist He unpacks the concept of White identity and links police brutality to faulty moral perception This book gently explains what White Christians need to do to make racial equity a priority

The Black Republic Brandon R. Byrd, 2019-11-08 In The Black Republic Brandon R Byrd explores the ambivalent attitudes that African American leaders in the post Civil War era held toward Haiti the first and only black republic in the Western Hemisphere Following emancipation African American leaders of all kinds politicians journalists ministers writers educators artists and diplomats identified new and urgent connections with Haiti a nation long understood as an example of black self determination They celebrated not only its diplomatic recognition by the United States but also the renewed relevance of the Haitian Revolution While a number of African American leaders defended the sovereignty of a black republic whose fate they saw as intertwined with their own others expressed concern over Haiti s fitness as a model black republic scrutinizing whether the nation truly reflected the civilized progress of the black race Influenced by the imperialist rhetoric of their day many African Americans across the political spectrum espoused a politics of racial uplift taking responsibility for the improvement of Haitian education politics culture and society They considered Haiti an uncertain experiment in black self governance it might succeed and vindicate the capabilities of African Americans demanding their own right to self determination or it might fail and condemn the black diasporic population to second class status for the foreseeable future When the United States military occupied Haiti in 1915 it created a crisis for W E B Du Bois and other black activists and intellectuals who had long grappled with the meaning of Haitian independence The resulting demand for and idea of a liberated Haiti became a cornerstone of the anticapitalist

anticolonial and antiracist radical black internationalism that flourished between World War I and World War II Spanning the Reconstruction post Reconstruction and Jim Crow eras The Black Republic recovers a crucial and overlooked chapter of African American internationalism and political thought **Black Separatism and Social Reality** Raymond L.

Hall,2013-10-22 Black Separatism and Social Reality Rhetoric and Reason deals with the contemporary debate over black separatism in America It brings together for the first time many of the perspectives ideas orientations and ideologies that all directly or indirectly address the question of black separatism pro and con from the vantage point of their own realities It raises fundamental issues that have recurred throughout the last century and continue unabated today such as whether black Americans should seek their political destiny apart from white Americans or whether economic growth within the black community can eventually lead to true black power This book is comprised of 31 chapters and begins with a historical overview and social reality of black separatism in America how and why black separatist movements emerge and why separatism appeals to some individuals and not to others The next section explores the similarities of white racist assumptions and black separatism as well as the arguments for and against separatism The prospects of black separatism are analyzed along with Pan Africanism and black studies A comprehensive review of the history of separatist thought and a bibliography concerning the relation of Afro Americans with Africa are presented The possibility of a violent confrontation between whites and blacks is also considered Finally the book ponders the question of whether there is a need for a distinct black social science This monograph will appeal to sociologists social scientists political scientists politicians blacks and scholars of black studies **Food Power Politics** Bobby J. Smith II,2023-08-29 This book unearths a food story buried deep within the soil of American civil rights history Drawing on archival research interviews and oral histories Bobby J Smith II re

examines the Mississippi civil rights movement as a period when activists expanded the meaning of civil rights to address food as integral to sociopolitical and economic conditions For decades white economic and political actors used food as a weapon against Black sharecropping communities in the Yazoo Mississippi Delta but members of these communities collaborated with activists to transform food into a tool of resistance Today Black youth are building a food justice movement in the Delta to continue this story grappling with inequalities that continue to shape their lives Drawing on multiple disciplines including critical food studies Black studies history sociology and southern studies Smith makes critical connections between civil rights activism and present day food justice activism in Black communities revealing how power struggles over food empower them to envision Black food futures in which communities have the full autonomy and capacity to imagine design create and sustain a self sufficient local food system *Race Matters* Cornel West,2001 Now more than

ever *Race Matters* is a book for all Americans as it helps us to build a genuine multiracial democracy in the new millennium **BOOK JACKET** **Writing Beyond Race** bell hooks,2013 What are the conditions needed for our nation to bridge cultural and racial divides By writing beyond race noted cultural critic bell hooks models the constructive ways scholars activists and

readers can challenge and change systems of domination In the spirit of previous classics like *Outlaw Culture* and *Reel to Real* this new collection of compelling essays interrogates contemporary cultural notions of race gender and class From the films *Precious* and *Crash* to recent biographies of Malcolm X and Henrietta Lacks hooks offers provocative insights into the way race is being talked about in this post racial era **Black Marxism** Cedric J. Robinson,2005-10-12 In this ambitious work first published in 1983 Cedric Robinson demonstrates that efforts to understand black people s history of resistance solely through the prism of Marxist theory are incomplete and inaccurate Marxist analyses tend to presuppose European models of history and experience that downplay the significance of black people and black communities as agents of change and resistance Black radicalism must be linked to the traditions of Africa and the unique experiences of blacks on western continents Robinson argues and any analyses of African American history need to acknowledge this To illustrate his argument Robinson traces the emergence of Marxist ideology in Europe the resistance by blacks in historically oppressive environments and the influence of both of these traditions on such important twentieth century black radical thinkers as W E B Du Bois C L R James and Richard Wright **The Oxford Handbook of African American Citizenship, 1865-Present** Henry Louis Gates, Jr.,2012-05-24 Collection of essays tracing the historical evolution of African American experiences from the dawn of Reconstruction onward through the perspectives of sociology political science law economics education and psychology As a whole the book is a systematic study of the gap between promise and performance of African Americans since 1865 Over the course of thirty four chapters contributors present a portrait of the particular hurdles faced by African Americans and the distinctive contributions African Americans have made to the development of U S institutions and culture From publisher description **Displacing Blackness** Ted Rutland,2018-01-01 While focused on twentieth century Halifax *Displacing Blackness* develops broad insights about the possibilities and limitations of modern planning Drawing connections between the history of planning and emerging scholarship in Black Studies Ted Rutland positions anti blackness at the heart of contemporary city making **Race, Gender, and Leadership** Patricia S. Parker,2004-09-22 Much has been written about a model of leadership that emphasizes women s values and experiences that is in some ways distinct from male models of leadership This book redirects the focus to a view of leadership as a multicultural phenomenon that moves beyond dualistic notions of masculine and feminine leadership and focuses more specifically on leadership as the management of meaning including the meanings of the notion of organizational leader This volume focuses on leadership traditions revealed in the history of Black women in America and exemplified in the leadership approaches of 15 African American women executives who came of age during the civil rights and feminist movements of the 1960 s and 1970 s and climbed to the top of major U S organizations It advances a vision of organizational leadership that challenges traditional masculine and feminine notions of leadership development and practice providing insights on organizational leadership in the era of post industrialization and globalization Additionally by placing African American women at the center of analysis this book

provides insights into the ways in which race and gender structure key leadership processes in today's diverse and changing workplace. It is a must read for scholars and researchers in organizational communication management leadership African American studies and related areas. James P. Cannon and the Emergence of Trotskyism in the United States, 1928-38 Bryan D. Palmer, 2021-10-25 Bryan D. Palmer reinterprets the history of labour and the left in the United States during the 1930s through a discussion of the emergence of Trotskyism in the most advanced capitalist country in the world. Focussing on James P. Cannon, the founder of American Trotskyism, Palmer builds on his previously published and award-winning book James P. Cannon and the Origins of the American Revolutionary Left 1890-1928 (2007) with a deeply researched and elegantly written study of Cannon and the Trotskyist movement in the United States from 1928-38. Situating this dissident communist movement within the history of class struggle both national and international, Palmer examines how Cannon and others fought to revive a combative trade unionism, thwart fascism and the drift to war, refuse Stalinism's many degenerations and build a new Party and a new International, both of which would be dedicating to reviving and realizing the possibilities of revolutionary socialism. The result is a study that provides a definitive account of the largest and most influential Trotskyist movement in the world in the 1930s, a mobilization whose history recasts understandings of the more extensively studied experience of United States working class militancy and the place of the Comintern-affiliated Communist Party within it.
