Herz,1995 **Women in the Labor Force: a Databook, September 2005** , Handbook of Facts on Women Workers United States. Women's Bureau,1983 *Resources in Women's Educational Equity* ,1979-05 **Rural Development Perspectives** ,1984 *Monthly Labor Review* United States. Bureau of Labor Statistics,2003 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews *Race, Politics, and Economic Development* James Jennings,1992 In April 1992 the world witnessed a renewal in South Central Los Angeles of the urban violence that exploded over a quarter of a century earlier As in 1965 the spark that ignited the firestorm was Black rage over police brutality But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non white urban poor trapped and virtually without hope Race Politics and Economic Development strips away the veneer of mass media images to examine the underlying causes of Black urban poverty and to recommend means to escape the seemingly endless cycle of retributive violence that it spawns The book brings together Black activists and scholars including two former mayors of American cities to analyse the theoretical and practical problems currently facing the Black community in the United States The essays collected here are dominated by three key themes that political influence power and wealth are major factors in determining social welfare policies directed at Blacks the poor and the working class that both liberal and conservative policies over the last fifty years are no longer effective in alleviating a growing human service crisis among Blacks and that the political mobilization of impoverished sectors of the Black community is absolutely critical in resolving the problem of poverty in urban America Drawing on new work in the social sciences political theory and economics and also on the contributors activist experiences these essays represent a pathbreaking new agenda for the participation of grassroots Black leaders in developing and implementing urban policy Contributors Jeremiah Cotton Julianne Malveaux Mack H Jones Charles P Henry Walter Stafford William Fletcher Jr Eugene Newport Sheila Ards Jacqueline Pope Keith Jennings Lloyd Hogan Richard Hatcher Gender Inequality in the Global Labor Market Reyna Elizabeth Rodríguez Pérez,David Castro Lugo,2024-10-24 This book examines gender inequality from the perspective of feminist economics with empirical application across different countries such as Turkey the United States Mexico Uruguay Argentina Colombia Costa Rica and territories within Europe It centers on topics such as labor participation occupational segregation feminization of poverty and migration wage differentials changes in and the quality of employment equity index and gender bias in fiscal policies It encompasses both developed and developing countries and

shows that the gender gap has been narrowing over time although not completely mainly due to the sparse implementation of programs and public policies with a feminist economic approach which help to make gender dimensions in the economy visible and highlight the implications this has on women's lives. The book also examines the impact of the COVID 19 crisis on inequality on the working lives of men and women. This book will be an important asset in teaching forums on the most recent advances in economic science across a number of different theories, approaches and research hypotheses that explain the study of gender inequality. It also presents different empirical studies using multiple methodologies and databases applied to specific problems in multiple countries to identify the advances, opportunities and changes that have occurred in gender inequality from a feminist economic perspective. The book offers relevant novel and original scientific data and makes public policy proposals to encourage the participation of women in the labor market. Consequently, it will also be of interest to policymakers concerned with global trends in the labor market.

Living Wages, Equal Wages: Gender and Labour Market Policies in the United States Deborah M. Figart, Ellen Mutari, Marilyn Power, 2005-07-08 Focusing on social reform movements for living wages and equal wages, this informative and accessible book explores how US wage regulations in the twentieth century took gender, race, ethnicity and class into account.

Women & Work, 1985 **Report on the American Workforce**, 2001 **Balancing Act** Daphne Spain, Suzanne Bianchi, 1996-06-26 A wonderful compendium of everything you always wanted to know about trends in women's roles both in and out of the home. It is a balanced and data-rich assessment of how far women have come and how far they still have to go. Isabelle Sawhill, Urban Institute. Based primarily on the 1990 population census, *Balancing Act* reports on the current situation of American women and temporal and cross-national comparisons. Meticulously and clearly presented, the information in this book highlights changing behaviors such as the growing incidence of childbearing to older women and unmarried women in general and a higher ratio of women's earnings to men's. The authors' thoughtful analysis of these and other factors involved in women's *fin de siècle* balancing act make this an indispensable reference book and valuable classroom resource.

Louise A. Tilly, Michael E. Gellert, Professor of History and Sociology, The New School for Social Research. In *Balancing Act*, authors Daphne Spain and Suzanne Bianchi draw upon multiple census and survey sources to detail the shifting conditions under which women manage their roles as mothers, wives and breadwinners. They chronicle the progress made in education where female college enrollment now exceeds that of males and the workforce where women have entered a wider variety of occupations and are staying on the job longer even after becoming wives and mothers. But despite progress, lower-paying service and clerical positions remain predominantly female and although the salary gap between men and women has shrunk, women are still paid less. As women continue to establish a greater presence outside the home, many have delayed marriage and motherhood. Marked jumps in divorce and out-of-wedlock childbirth have given rise to significant numbers of female-headed households. Married women who work contribute more significantly than ever to the financial well-being of their families, yet evidence shows that they

continue to perform most household chores Balancing Act focuses on how American women juggle the simultaneous demands of caregiving and wage earning and compares their options to those of women in other countries The United States is the only industrialized nation without policies to support working mothers and their families most tellingly in the absence of subsidized childcare services Many women are forced to work in less rewarding part time or traditionally female jobs that allow easy exit and re entry and as a consequence poverty is the single greatest danger facing American women As the authors show the risk of poverty varies significantly by race and ethnicity with African Americans most of whose children live in mother only families the most adversely affected This volume contributes to the national dialogue about family policy welfare reform and responsibility for children by highlighting the pivotal roles women play at the intersection of family and work Human Capital in History Leah Platt Boustan,Carola Frydman,Robert A. Margo,2014-11-05 This volume honours the contributions Claudia Goldin has made to scholarship and teaching in economic history and labour economics The chapters address some closely integrated issues the role of human capital in the long term development of the American economy trends in fertility and marriage and women s participation in economic change **Facts on Working Women** ,19??
