Blackfoot Grammar:

Blackfoot Grammar Donald G. Frantz, 2015-02-01 Thousands of people in Alberta and Montana speak Blackfoot an Algonquian language But the numbers are diminishing and the survival of Blackfoot is in some danger To help preserve the language while it is still in daily use Donald G Frantz and Norma Jean Russell collaborated on the Blackfoot Dictionary published in 1989 to widespread acclaim and later revised in 1995 Blackfoot Grammar the companion volume to the dictionary has now also been updated with a second edition The changes made to each chapter reflect new approaches refined through years of teaching experience New chapters on Numbers and Enumeration and Translating from English to Blackfoot have been added as well as new exercises and two new appendixes describing the phonetics of Blackfoot and the design of the alphabet This second edition of Blackfoot Grammar will be a welcome update not only for those who wish to learn the language but for all those with an interest in Native Studies and North American linguistics

Grammar and dictionary of the Blackfoot language John William Tims, 1890 **A Grammar and Vocabulary of the Blackfoot Language ...** C. M. Lanning, Joseph Kipp, W. S. Gladston, 1882 A grammar and phrasebook of the Siksika Blackfoot or Blackfeet language spoken by the Niitsitapi Siksikaitsitapi Blackfoot or Blackfeet Nation compiled by C M Lanning a seller of watches clocks and other merchandise in Fort Benton Mont from translations by Joseph Kipp and W S Gladston Jr **A Concise Blackfoot Grammar** Christianus Cornelius Uhlenbeck, 1938 **Blackfoot Grammar** Donald G. Frantz, Norma Jean Russell, 2017-01-01 Blackfoot Grammar the companion volume to The Blackfoot Dictionary of Stems Roots and Affixes Third Edition provides description and analyses of the major features of Blackfoot grammar and language structures

Toward a Generative Grammar of Blackfoot Donald G. Frantz, 1971 **Grammar and Dictionary of the Blackfoot Language in the Dominion of Canada**, 1889 A Concise Blackfoot Grammar Based on Material from the Southern Peigans Christianus Cornelius Uhlenbeck, 1978 **Blackfoot Religion and the Consequences of Cultural Commoditization** Kenneth Hayes Lokensgard, 2016-04-15 This book explores the exchange of Blackfoot medicine bundles within contemporary Blackfoot culture and between the Blackfoot Peoples and Euro Americans These ceremonial bundles which are circulated as gifts in their native context are robbed of their statuses as living beings or persons when they are treated as symbolic objects or commodities by cultural outsiders Much of the original ethnographic data presented in this book deals with the attempts of some Blackfeet to repatriate ceremonial materials from Euro American hands This book represents a valuable study of contemporary Blackfoot religion as well as the repatriation movement Kenneth Lokensgard also contributes to the studies of material culture and exchange central to his investigation is the critical examination and reapplication of the interpretative terms gift and commodity Careful use of these terms Lokensgard argues can better help scholars appreciate how different peoples perceive the worlds they inhabit Washing the Brain □ Metaphor and Hidden Ideology Andrew Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between

metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor s reductionist tendencies *Papers of the Fifty-Third Algonquian Conference / Actes du cinquante-troisième Congrès des Algonquistes* Inge Genée, Monica Macaulay, Margaret Noodin, 2024-05-01 Papers of the Algonquian Conference is a collection of peer reviewed scholarship from an annual international forum that focuses on topics related to the languages and cultures of Algonquian peoples This series touches on a variety of subject areas including anthropology archaeology education ethnography history Indigenous studies language studies literature music political science psychology religion and sociology Contributors often cite never before published data in their research giving the reader a fresh and unique insight into the Algonquian peoples and rendering these papers essential reading for those interested in studying Algonquian society Grammatical Relations Clifford S. Burgess, Katarzyna Dziwirek, Donna B. Gerds, 1995 This is a collection of discussions of grammatical relations and related concepts using current syntactic theory Contrast and Representations in Syntax Bronwyn M. Bjorkman, Daniel Currie Hall, 2020 This book explores how grammatical oppositions for instance the contrast between present and past tense are encoded in the syntax of natural languages The chapters approach the topic from a range of perspectives drawing on data from a variety of typologically diverse languages including Blackfoot Greek Onondaga and Scottish Gaelic *The Genius of Kinship* German Valentinovich Dziel, 2007 Dziel has doctorates in both history and anthropology and is currently both advisor to the Great Russian Encyclopedia and senior anthropologist at Crispin Porter Bogusky advertising agency His extremely dense work is actually three books in one The first is a history of kinship studies from the early 19th century to the present The second is a comparative study of kinship terminology among non Indo European languages for which he has also prepared a data base published on the internet The third section highly controversial as he admits uses anthropology mitochondrial studies and linguistics to suggest that the out of Africa model of human origins may be in error and that the first humans actually came from the Americas and spread from there to the rest of the world Functional Structure from

Top to Toe Peter Svenonius, 2014 This volume consists of nine original chapters on central issues in theoretical syntax all written by distinguished authors who have made major contributions to generative syntax plus an introductory chapter by the editor Dedicated to Tarald Taraldsen the collection reflects the diverse energies that have pushed the cartographic program forward over the last decade The first three papers deal with subject extraction the *que qui* alternation and relative clause formation Luigi Rizzi presents arguments that subjects are criterial and that subject extraction is highly restricted Hilda Koopman and Dominique Sportiche concur suggesting that what appears to be subject extraction in French has been misanalyzed and involves a relative structure Adriana Belletti shows that children avoid using object relatives preferring subject relatives even when it requires passivization The fourth paper by Ian Roberts analyzes the loss of *pro* drop in the history of French and Brazilian Portuguese The papers by M Rita Manzini and Richard S Kayne both present novel analyses of complementizers suggesting that they are essentially nominal rather than verbal The final three papers address the relationship of morphology to syntax The first two argue for a syntactic approach to word formation Guglielmo Cinque *s* in a typological context and Anders Holmberg *s* within an analysis of Finnish focus constructions The final paper by Edwin Williams presents an argument for the limitations of the syntactic approach to word formation

Changing Genders in Intercultural Perspectives Barbara Saunders, Marie-Claire Foblets, 2002 Drawing on extensive fieldwork the essays in this book develop contextual and strategic analyses of the way sex gender constellations can be configured as political identities as a resource or in response to unforeseen contingencies

Variation in P Jacopo Garzonio, Silvia Rossi, 2020 Variation in P is an essential follow up to the seminal proposals of the generative tradition regarding prepositional syntax Recent research shows that prepositional phrases have a complex internal structure and that the grammatical encoding of locative meaning has its own place in universal grammar The papers collected in the first part of this volume not only test these proposals against new comparative data but also shed light on the relation between spatial expressions and other semantic relations like possession The second part of the volume explores the role of prepositions in non spatial environments as well as in more general phenomena like verbal affixation ellipsis and complementation By drawing on evidence from less studied languages and by considering prepositional syntax in interaction with clausal syntax as well as within prepositional phrases Variation in P refines and develops theories introduced by previous generative studies

Universals of Language Today Sergio Scalise, Elisabetta Magni, Antonietta Bisetto, 2008-10-11 This book collects the contributions presented at the international congress held at the University of Bologna in January 2007 where leading scholars of different persuasions and interests offered an up to date overview of the current status of the research on linguistic universals The papers that make up the volume deal with both theoretical and empirical issues and range over various domains covering not only morphology and syntax which were the major focus of Greenberg's seminal work but also phonology and semantics as well as diachrony and second language acquisition Diverse perspectives illustrate and discuss a huge number of phenomena from a wide variety of

languages not only exploring the way research on universals intersects with different subareas of linguistics but also contributing to the ongoing debate between functional and formal approaches to explaining the universals of language This stimulating reading for scientists researchers and postgraduate students in linguistics shows how different but not irreconcilable modes of explanation can complement each other both offering fresh insights into the investigation of unity and diversity in languages and pointing to exciting areas for future research A fresh and up to date survey of the present state of research on Universals of Language in an international context with original contributions from leading specialists in the field First hand accounts of substantive findings and theoretical observations in different subareas of linguistics Huge number of linguistic phenomena and data from different languages analyzed and discussed in detail **Proof-sheets of a**

Bibliography of the Languages of the North American Indians James Constantine Pilling, 1885 *History and Historiography of Linguistics* Hans-Josef Niederehe, E. F. K.
