African Americans in the U.S. Economy Cecilia Conrad, 2005 Over the last several decades academic discourse on racial inequality has focused primarily on political and social issues with significantly less attention on the complex interplay between race and economics African Americans in the U.S. Economy represents a contribution to recent scholarship that seeks to lessen this imbalance This book builds upon and significantly extends the principles terminology and methods of standard economics and black political economy Influenced by path breaking studies presented in several scholarly economic journals this volume is designed to provide a political economic analysis of the past and present economic status of African Americans The chapters in this volume represent the work of some of the nation's most distinguished scholars on the various topics presented The individual chapters cover several well defined areas including black employment and unemployment labor market discrimination black entrepreneurship racial economic inequality urban revitalization and black economic development The book is written in a style free of the technical jargon that characterizes most economics textbooks While the book is methodologically sophisticated it is accessible to a wide range of students and the general public and will appeal to academicians and practitioners alike **Competition and Coercion** Robert Higgs, 1977-02-25 Competition and Coercion

Blacks in the American economy 1865-1914 is a reinterpretation of black economic history in the half century after Emancipation Its central theme is that economic competition and racial coercion jointly determined the material condition of the blacks The book identifies a number of competitive processes that played important roles in protecting blacks from the racial coercion to which they were peculiarly vulnerable It also documents the substantial economic gains realized by the black population between 1865 and 1914 Professor Higgs's account is iconoclastic It seeks to reorganize the present conceptualization of the period and to redirect future study of black economic history in the post Emancipation period It raises new questions and suggests new answers to old questions asserting that some of the old questions are misleadingly framed or not worth pursuing at all *Government and the American Economy* Price V. Fishback, 2024-05-31 The American economy has provided a level of well being that has consistently ranked at or near the top of the international ladder A key source of this success has been widespread participation in political and economic processes In *The Government and the American Economy* leading economic historians chronicle the significance of America's open access society and the roles played by government in its unrivaled success story America's democratic experiment the authors show allowed individuals and interest groups to shape the structure and policies of government which in turn have fostered economic success and

innovation by emphasizing private property rights the rule of law and protections of individual freedom In response to new demands for infrastructure America s federal structure hastened development by promoting the primacy of states cities and national governments More recently the economic reach of American government expanded dramatically as the populace accepted stronger limits on its economic freedoms in exchange for the increased security provided by regulation an expanded welfare state and a stronger national defense **Blacks and the American Economy** Cecil Granville Gouke,1987-01-01

The World War II Bond Campaign Lawrence R. Samuel,2025-02-04 How America s greatest marketing triumph in World War II shaped race ethnicity and class in modern America The World War II Bond Campaign is a history of the World War II bond drive led by the federal government an effort called the most successful marketing operation in history By the war s end some 85 million Americans had spent 186 billion in an unprecedented outpouring of patriotism that contributed to the military victory and the prosperity of the following decades The FDR administration used bonds to raise capital to support the war and promote national unity within the context of the nation s increasingly pluralistic society as the melting pot theory was retired African Americans Euro Americans and labor union members enthusiastically bought bonds to express national loyalty but also to demonstrate racial ethnic or class pride a reflection of their dualistic or hyphenated identities Drawing on various primary sources The World War II Bond Campaign illustrates how the Treasury Department s multicultural marketing strategies tapped into Americans aspirations alongside their patriotic impulses Citizens of all social and economic backgrounds eagerly responded to what can be seen as the selling of America making the subject an ideal lens to view national identity at a critical moment in the country s history The author contends that the drive s success helped pave the way for the emergence of both the civil rights movement and the vigorous consumer culture of the postwar years

Blacks and the Quest for Economic Equality James W. Button,Barbara A. Rienzo,Sheila L. Croucher,2015-08-26 The civil rights movement of the 1960s improved the political and legal status of African Americans but the quest for equality in employment and economic well being has lagged behind Blacks are more than twice as likely as whites to be employed in lower paying service jobs or to be unemployed are three times as likely to live in poverty and have a median household income barely half of that for white households What accounts for these disparities and what possibilities are there for overcoming obstacles to black economic progress This book seeks answers to these questions through a combined quantitative and qualitative study of six municipalities in Florida Factors impeding the quest for equality include employer discrimination inadequate education increasing competition for jobs from white females and Latinos and a lack of transportation job training affordable childcare

and other sources of support which makes it difficult for blacks to compete effectively Among factors aiding in the quest is the impact of black political power in enhancing opportunities for African Americans in municipal employment The authors conclude by proposing a variety of ameliorative measures strict enforcement of antidiscrimination laws public policies to provide disadvantaged people with a good education adequate shelter and food and decent jobs and self help efforts by blacks to counter self destructive attitudes and activities The American Economic Review ,2003 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association
