Black Physicians in the Jim Crow South Thomas J. Ward, 2010-02-01 Drawing on a variety of sources from oral histories to the records of professional organizations Thomas J Ward Jr examines the development of the African American medical profession in the South Illuminating the contradictions of race and class this research provides valuable new insight into class divisions within African American communities in the era of segregation *Blacks in Tennessee* Wornie L. Reed, 2008 From page one of the book Black Tennesseans knew achievement and degradation fairness and discrimination success and failure over the course of the twentieth century Their experience was as varied as the Volunteer State s landscape but there were certain things as constant as the hot sun in Memphis in the summertime Their race set them apart from and usually beneath the privileged whites in society and they faced discrimination and separation with a commitment to struggle that rarely flagged or failed them even if their efforts did not always yield change They began their struggle at what the historian Rayford Logan called the nadir of race relations in America his assessment of conditions at the start of twentieth century Indeed it was the low point But 100 years later African Americans in Tennessee had risen to a much higher place in their own estimation and that of their white neighbors To be sure not every problem had been overcome and the past of discrimination and separation still weighed heavily on twenty first century black Tennesseans But by most indicators their climb had been upward out of a strict caste system to a position of reachable if not fully achieved equality **Lethal Punishment** Margaret Vandiver, 2005-12-22 Why did some offenses in the South end in mob lynchings while similar crimes led to legal executions Why did still other cases have nonlethal outcomes In this well researched and timely book Margaret Vandiver explores the complex relationship between these two forms of lethal punishment challenging the assumption that executions consistently grew out of and replaced lynchings Vandiver begins by examining the incidence of these practices in three culturally and geographically distinct southern regions In rural northwest Tennessee lynchings outnumbered legal executions by eleven to one and many African Americans were lynched for racial caste offenses rather than for actual crimes In contrast in Shelby County which included the growing city of Memphis more men were legally executed than lynched Marion County Florida demonstrated a firmly entrenched tradition of lynching for sexual assault that ended in the early 1930s with three legal death sentences in quick succession With a critical eye to issues of location circumstance history and race Vandiver considers the ways that legal and extralegal processes imitated influenced and differed from each other A series of case studies demonstrates a parallel between mock trials that were held by lynch mobs and legal trials that were rushed through the courts and followed by quick executions Tying her research to contemporary debates over the death penalty Vandiver argues that modern death sentences like lynchings of the past continue to be influenced by factors of race and place and sentencing is comparably erratic **Losing Power** Sekou M. Franklin, Ray Block Jr., 2020-01-15 Tennessee has made tremendous strides in race relations since the end of de jure segregation African Americans are routinely elected

and appointed to state and local offices the black vote has tremendous sway in statewide elections and legally explicit forms of racial segregation have been outlawed Yet the idea of transforming Tennessee into a racially equitable state a notion that was central to the black freedom movement during the antebellum and Jim Crow periods remains elusive for many African Americans in Tennessee especially those living in the most underresourced and economically distressed communities Losing Power investigates the complex relationship between racial polarization black political influence and multiracial coalitions in Tennessee in the first decade of the twenty first century Sekou M Franklin and Ray Block examine the divide in values preferences and voting behaviors between blacks and whites contending that this racial divide is both one of the causes and one of the consequences of black Tennesseans recent loss of political power Tennessee has historically been considered more politically moderate and less racially conservative than the states of the Deep South Yet in recent years and particularly since the mid 2000s Republicans have cemented their influence in the state While Franklin and Block s analysis and methodology focus on state elections political institutions and public policy Franklin and Block have also developed a conceptual framework for racial politics that goes beyond voting patterns to include elite level discourse issue framing intrastate geographical divisions social movements and pressure from interest groups
