**Trust in Black America** Shayla Nunnally, 2023-11-21 The more citizens trust their government the better democracy functions However African Americans have long suffered from the lack of equal protection by their government and the racial discrimination they have faced breaks down their trust in democracy Rather than promoting democracy the United States government has from its inception racially discriminated against African American citizens and other racial groups denying them equal access to citizenship and to protection of the law Civil rights violations by ordinary citizens have also tainted social relationships between racial groups social relationships that should be meaningful for enhancing relations between citizens and the government at large Thus trust and democracy do not function in American politics the way they should in part because trust is not color blind Based on the premise that racial discrimination breaks down trust in a democracy Trust in Black America examines the effect of race on African Americans lives Shayla Nunnally analyzes public opinion data from two national surveys to provide an updated and contemporary analysis of African Americans political socialization and to explore how African Americans learn about race She argues that the uncertainty risk and unfairness of institutionalized racial discrimination has led African Americans to have a fundamentally different understanding of American race relations so much so that distrust has been the basis for which race relations have been understood by African Americans Nunnally empirically demonstrates that race and racial discrimination have broken down trust in American democracy

**Contours of African American Politics** Georgia A. Persons, 2017-07-05 Contours of African American Politics chronicles the systematic study of African American politics and its subsequent recognition as an established field of scholarly inquiry African American politics emanates from the demands of the prolonged struggle for black liberation and empowerment Hence the study of African American politics has sought to track codify and analyse the struggle that has been mounted and to understand the historic and changing political status of African Americans within American society This two volume set presents a selection of scholarship on African American politics as it appeared in The National Political Science Review from its initial launch in 1989 to the spring of 2009 Represented are contributions from some of the leading scholars of African American politics who have helped to establish and sustain the field The volumes are organised around themes that derive from the unfolding real life drama of African American politics and its subsequent scholarly treatment The result is a window into the political efforts that meld the

historically disparate strands of black political expressions into a reconstructed and strategically nimble electoral based mass mobilisation necessary for optimising the impact of the African American vote Sections in the volumes also chronicle the evolution of the National Conference of Black Political Scientists as a professional organisation The two volumes illuminate a pivotal epoch in black political empowerment and provide a context for the future of black politics     *Underserved Populations at Historically Black Colleges and Universities* Cheron H. Persons,2018-12-07 Race and Democracy in the Americas examines dimensions of the comparative dynamics of race and ethnicity with a directed focus on the Americas most particularly Brazil and the United States Brazil and the United States are two countries in the Americas that have been major hosts for the African diaspora Both countries experienced prolonged

enslavement of Africans and both now claim to be beacons of democracy for much of the developing world Both Afro Brazilians and African Americans have fielded major liberation movements against racism and oppression yet both groups continue to experience considerable residual racial discrimination and displacement Brazil and the U S remain racialized societies though both officially purport to be otherwise The chapters of this volume illuminate a common search for understanding how race operates in societies generally and how shapes life opportunities for African Americans and Afro Brazilians both oppressed by this most detrimental social construction The project that fueled this volume represented a rare opportunity for collaboration between Afro Brazilian scholars and their African American counterparts This volume offers a passionate conversation between colleagues who have endured common sociopolitical and cultural struggles but who have only belatedly been able to meet and connect as individuals Both groups share identities as scholars and activists for neither identity alone is sufficient to nourish the longings of their hearts nor of their consciences This volume also represents an all too rare opportunity to give voice and expression to the work of Afro Brazilian scholars Volume 9 of the National Political Science Review also carries a special tribute to Mack Henry Jones a senior black political scientist retiring from Atlanta University and honors Jones s legacy and continues his quest for understanding the nature and intricacies of oppression and possible paths to liberatio
