Terrorism, Risk and the Global City Jon Coaffee, 2016-03-16 First published in 2003 this account of the anti terrorist measures of London's financial district and

the changes in urban security after 9 11 has been revised to take into account developments in counter terrorist security and management particularly after the terrorist attack in London on July 7th 2005 It makes a valuable addition to the current debate on terrorism and the new security challenges facing Western nations Drawing on the post 9 11 academic and policy literature on how terrorism is reshaping the contemporary city this book explores the changing nature of the terrorist threat against global cities in terms of tactics and targeting and the challenge of developing city wide managerial measures and strategies Also addressed is the way in which London is leading the way in developing best practice in counter terrorist design and management and how such practice is being internationalized *The Contemporary Novel and the City* S.

Khanna,2015-12-04 This book examines the deeply divided terrain of the twentieth century city and its formative impact on narrative fiction It focuses on two major world authors at the two ends of the twentieth century who write systematically about the colonial and postcolonial cities they were born in James Joyce and Dublin and Salman Rushdie and Bombay

Introducing Urban Anthropology Rivke Jaffe,Anouk de Koning,2022-12-30 This book provides an up to date introduction to the important field of urban anthropology This is a critical area of study as more than half of the world s population now lives in cities and anthropological research is increasingly done in an urban context Exploring contemporary anthropological approaches to the urban the authors consider How can we define urban anthropology What are the main themes of twenty first century urban anthropological research What are the possible future directions in the field The chapters cover topics such as urban mobilities place making and public space production and consumption and politics and governance These are illustrated by lively case studies drawn from urban settings across the world Accessible yet theoretically incisive Introducing Urban Anthropology will be a valuable resource for anthropology students and also for those working in urban studies and related disciplines such as sociology and geography The revised second edition includes updated theoretical discussions and new ethnographic case studies It features a new chapter on neoliberalism austerity and solidarity and engages more extensively with digital transformations of urban life Urban Pollution Eveline Dürr,Rivke Jaffe,2010 Re examining Mary

Douglas work on pollution and concepts of purity this volume explores modern expressions of these themes in urban areas examining the intersections of material and cultural pollution It presents ethnographic case studies from a range of cities affected by globalization processes such as neoliberal urban policies privatization of urban space continued migration and spatialized ethnic tension What has changed since the appearance of *Purity and Danger* How have anthropological views on pollution changed accordingly This volume focuses on cultural meanings and values that are attached to conceptions of clean and dirty purity and impurity healthy and unhealthy environments and addresses the implications of pollution with regard to discrimination class urban poverty social hierarchies and ethnic segregation in cities *Listening to Laredo* Mehnaaz

Momen,2023-09-12 Nestled between Texas and Tamaulipas Laredo was once a quaint border town nurturing cultural ties across the border attracting occasional tourists and serving as the home of people living there for generations In a span of

mere decades Laredo has become the largest inland port in the United States and a major hub of global trade Listening to Laredo is an exploration of how the dizzying forces of change have defined this locale how they continue to be inscribed and celebrated and how their effects on the physical landscape have shaped the identity of the city and its people Bringing together issues of growth globalization and identity Mehnaaz Momen traces Laredo's trajectory through the voices of its people In contrast to the many studies of border cities defined by the outside and seldom by the people who live at the border this volume collects oral histories from seventy five in depth interviews that collectively illuminate the evolution of the city's cultural and economic infrastructure its interdependence with its sister city across the national boundary and above all the strength of its community as it adapts to and even challenges the national narrative regarding the border The resonant and lively voices of Laredo's people convey proud ownership of an archetypal border city that has time and again resurrected itself

My Havana Maria Carida Cumana, Karen Dubinsky, Xenia Reloba de la Cruz, 2014-09-24 For more than thirty years musician Carlos Varela has been a guide to the heart soul and sound of Havana One of the best known singer songwriters to emerge out of the Cuban nueva trova movement Varela has toured in North America the Caribbean Latin America and Europe In North America Varela is Cuba's Bob Dylan In Cuba he is the voice of the generation that came of age in the 1990s and for whom his songs are their generation's anthems My Havana is a lyrical exploration of Varela's life and work and of the vibrant musical literary and cinematic culture of his generation Popular both among Cubans on the island and in the diaspora Varela is legendary for the intense political honesty of lyrics He is one of the most important musicians in the Cuban scene today In My Havana writers living in Canada Cuba the United States and Great Britain use Varela's life and music to explore the history and cultural politics of contemporary Cuba The book also contains an extended interview with Varela and English translations of

the lyrics to all his recorded songs most of which are appearing in print for the very first time **Designing Community**

David R. Walters, 2007 Urban development sites can become battlegrounds as a result of the conflicting interests of developers and communities In the USA design charrettes are often used as a means of bringing people together using detailed design exercises to establish agreement around a development masterplan However despite the increasing frequency of their use charrettes are widely misunderstood and can be misapplied This book provides detailed guidance on the proper and most effective ways to use this helpful tool BOOK JACKET **Compromise Planning : A Theoretical**

Approach from a Distant Corner of Europe Louis C. Wassenhoven, 2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement **The Routledge Companion to Urban Regeneration** Michael E. Leary, John McCarthy, 2013-10-30 In the past decade urban regeneration policy makers and practitioners have faced a number of difficult challenges such as

sustainability budgetary constraints demands for community involvement and rapid urbanization in the Global South Urban regeneration remains a high profile and important field of government led intervention and policy and practice continue to adapt to the fresh challenges and opportunities of the 21st century as well as confronting long standing intractable urban problems and dilemmas This Companion provides cutting edge critical review and synthesis of recent conceptual policy and practical developments within the field With contributions from 70 international experts within the field it explores the meaning of urban regeneration in differing national contexts asking questions and providing informed discussion and analyses to illuminate how an apparently disparate field of research policy and practice can be rendered coherent drawing out common themes and significant differences The Companion is divided into six sections exploring globalization and neo liberal perspectives on urban regeneration emerging reconceptualizations of regeneration public infrastructure and public space housing and cosmopolitan communities community centred regeneration and culture led regeneration The concluding chapter considers the future of urban regeneration and proposes a nine point research agenda This Companion assembles a diversity of approaches and insights in one comprehensive volume to provide a state of the art review of the field It is a valuable resource for both advanced undergraduate and postgraduate students in Urban Planning Built Environment Urban Studies and Urban Regeneration as well as academics practitioners and politicians

On South Bank: The Production of Public Space Alasdair J.H. Jones, 2016-05-23 Tensions over the production of urban public space came to the fore in summer 2013 with mass protests in Turkey sparked by a plan to redevelop Taksim Gezi Park Istanbul In London concomitant proposals to refurbish an area of the South Bank historically used by skateboarders were similarly met by staunch opposition Through an in depth ethnographic examination of London s South Bank this book explores multiple dimensions of the production of urban public space Drawing on user accounts of the significance of public space as well as observations of how the South Bank is practised on a daily basis it argues that public space is valued not only for its essential material characteristics but also for the productive potential that these characteristics if properly managed afford on a daily basis At a time when policy makers urban planners and law enforcement authorities simultaneously grapple with pressures to deal with social problems such as street drinking vandalism and skateboarding and accusations that new modes of urban planning and civic management infringe upon civil liberties and dilute the publicity of public space this book offers an insightful account of the daily exigencies of public spaces In so doing it questions the utility of the public private binary for our understanding both of common urban space and of different sets of social practices and points towards the need to be attentive to productive processes in how we understand and experience urban open space as public

Youth Cultures and Subcultures Sarah Baker, Brady Robards, 2016-02-11 This volume critically examines subculture in a variety of Australian contexts exploring the ways in which the terrain of youth cultures and subcultures has changed over the past two decades and considering whether subculture still works as a viable conceptual framework for studying youth culture Richly illustrated

with concrete case studies the book is thematically organised into four sections addressing i theoretical concerns and global debates over the continued usefulness of subculture as a concept ii the important place of belonging in subcultural experience and the ways in which belonging is played out across an array of youth cultures iii the gendered experiences of young men and women and their ways of navigating subcultural participation and iv the ethical and methodological considerations that arise in relation to researching and teaching youth culture and subculture Bringing together the latest interdisciplinary research to combine theoretical considerations with recent empirical studies of subcultural experience Youth Cultures and Subcultures will appeal to scholars and students across the social sciences

The Handbook of Communication History Peter Simonson, Janice Peck, Robert T Craig, John Jackson, 2013-01-03 The Handbook of Communication History addresses central ideas social practices and media of communication as they have developed across time cultures and world geographical regions It attends to both the varieties of communication in world history and the historical investigation of those forms in communication and media studies The Handbook editors view communication as encompassing patterns processes and performances of social interaction symbolic production material exchange institutional formation social praxis and discourse As such the history of communication cuts across social cultural intellectual political technological institutional and economic history The volume examines the history of communication history the history of ideas of communication the history of communication media and the history of the field of communication Readers will explore the history of the object under consideration relevant practices media and ideas review its manifestations in different regions and cultures comparative dimensions and orient toward current thinking and historical research on the topic current state of the field As a whole the volume gathers disparate strands of communication history into one volume offering an accessible and panoramic view of the development of communication over time and geographical places and providing a catalyst to further work in communication history

Integrating Study Abroad Into the Curriculum Elizabeth Brewer, Kiran Cunningham, 2023-07-03 With the increased interest in study abroad from government educators employers and students the question is is study abroad engendering the desired intercultural competencies and intellectual development To achieve this goal this book proposes two strategies structure study abroad to bridge the separation of academic learning from experiential and intercultural learning and integrate study abroad with the undergraduate curriculum In proposing this integration the editors take into account the need for institutional change and recognize faculty members concerns about maintaining the integrity of the curriculum teaching in areas outside their expertise and keeping up with ever evolving institutional missions This book opens with two chapters presenting different theoretical perspectives relevant to the integration of study abroad into the curriculum The following nine chapters provide examples from a variety of disciplines from anthropology and religious studies to literature urban studies biology and public health and within such contexts as distance learning service learning and the senior thesis The concluding chapter considers faculty development activities and

institutional structures and policies that support curriculum integration While the examples are drawn from Beloit College and Kalamazoo College liberal arts colleges with substantial study abroad enrollments and nationally recognized for their innovative practices readers will recognize they are easily adaptable to their own institutions The two colleges achieved their curricular innovations with limited financial resources and in the context that most of their students are dependent on financial aid The transformational ideas and practices described here provide material for reflection and campus conversations for anyone concerned with developing global citizens and well educated students and offer a blueprint for implementation

World Cities and Urban Form Mike Jenks, Daniel Kozak, Pattaranan Takkanon, 2013-12-02 This book presents new research and theory at the regional scale showing the forms metropolitan regions might take to achieve sustainability At the city scale the book presents case studies based on the latest research and practice from Europe Asia and North America showing how both planning and flagship design can propel cities into world class status and also improve sustainability The contributors explore the tension between polycentric and potentially sustainable development and urban fragmentation in a physical context but also in a wider cultural social and economic context
