**The Ex-Human** Michael Bérubé,2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael B rub explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of Homo sapiens In a lively conversational style he considers novels by writers including Ursula K Le Guin Margaret Atwood Liu Cixin Philip K Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as 2001 A Space Odyssey Blade

Runner and the Terminator and Matrix franchises B rub argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by the possibility of human extinction they are driven by a vision of the ex human a desire to imagine that another species is possible For all science fiction readers worried about the fate of humanity The Ex Human is an entertaining yet sobering account of how key novels and films envision the world without us     Projecting the Shadow Janice Hocker Rushing, Thomas S. created by humankind for the betterment of humankind whose use should be constrained by Kantian moral principles grounded in human dignity This thesis promises to stimulate new research on Kantian approaches to digital ethics and AI ethics It also has important political implications including a clarion call for us to engage in the self conscious self disciplined and free exercise of our own innate cognitive affective and practical capacities in the face of new and exceptionally powerful forms of digital technology e g chatbots that threaten to undermine our ability to think feel and act for ourselves

**Psycho Thrillers** William Indick, 2013-10-18 Mind control madness and altered states of reality can make for exciting nights at the movies which explains the enduring popularity of a film genre that might be called the psycho thriller Psychiatry and film came of age simultaneously and characters such as the evil psychiatrist and the pathological killer were often developed in direct reference to the psychological themes that inspired them For example the penchants of Hitchcock s famously creepy Norman Bates represented real psychological disorders and his actions were explained through psychoanalysis The psycho thriller presents a world where psychology represents a dimension of supernatural and metaphysical wonders The introduction analyzes what makes a psycho thriller and subsequent chapters are devoted to each of the archetypal psycho thriller characters the mad scientist the psycho killer the individual with psychic powers and the psychiatrist and themes mind control dreams memory and existential issues The concluding chapter lists the top twenty psycho thrillers Stills from classic films in the genre illustrate the text which also includes filmography bibliography and index

Science Fiction, Ethics and the Human Condition Christian Baron, Peter Nicolai Halvorsen, Christine Cornea, 2017-07-10 This book explores what science fiction can tell us about the human condition in a technological world with the ethical dilemmas and consequences that this entails This book is the result of the joint efforts of scholars and scientists from various disciplines This interdisciplinary approach sets an example for those who like us have been busy assessing the ways in which fictional attempts to fathom the possibilities of science and technology speak to central concerns about what it means to be human in a contemporary world of technology and which ethical dilemmas it brings along One of the aims of this book is to demonstrate what can be achieved in approaching science fiction as a kind of imaginary laboratory for experimentation where visions of human or even post human life under various scientific technological or natural conditions that differ from our own situation can be thought through and commented upon Although a scholarly work this book is also designed to be accessible to a general audience that has an interest in science fiction as well as to a broader academic audience interested in ethical questions
