Goffart discusses milestones in the origins of historical atlases as well as individual maps illustrating historical events in alternating paired chapters He focuses on maps of the medieval period because the development of maps for history hinged particularly on portrayals of this segment of the postclassical modern past Goffart concludes the book with a detailed catalogue of more than 700 historical maps and atlases produced from 1570 to 1870 Historical Atlases will immediately take its place as the single most important reference on its subject Historians of cartography medievalists and anyone seriously interested in the role of maps in portraying history will find it invaluable The Printing Press as an Agent of Change Elizabeth L.
