Shane, 1970 **Archaic Transitions in Ohio and Kentucky Prehistory** Olaf H. Prufer, Sara E. Pedde, Richard S. Meindl, 2001 After the last Ice Age the southern Lake Erie basin and the Ohio valley were characterized by biotic zones that influenced cultural development of archaic Native American populations This text looks at the transition from nomadic hunting and gathering to the rise of food production in this area Blain Village and the Fort Ancient Tradition in Ohio, by Olaf H. Prufer and Orrin C. Shane, 3. Contributors: Olaf H. Prufer [and Others.]. Olaf H. Prufer, 1970 Continuity and Change in the Native American Village Robert A. Cook, 2017-11-02 Cook demonstrates that we can better allow for affiliation of archaeological sites with living descendants by more fully examining the complexity of the past *The Emergence of the Moundbuilders* Elliot Marc Abrams, AnnCorinne Freter, 2005 Native American societies often viewed as unchanging in fact experienced a rich process of cultural innovation in the millennia prior to recorded history Societies of the Hocking River Valley in southeastern Ohio part of the Ohio River Valley created a tribal organization beginning about 2000 bc Edited by Elliot M Abrams and AnnCorinne Freter The Emergence of the Moundbuilders The Archaeology of Tribal Societies in Southeastern Ohio presents the process of tribal formation and change in the region based on analyses of all available archaeological data from the Hocking River Valley Drawing on the work of scholars in archaeology anthropology geography geology and botany the collection addresses tribal society formation through such topics as the first pottery made in the valley aggregate feasting by nomadic groups the social context for burying their dead in earthen mounds the formation of religious ceremonial centers and the earliest adoption of corn Providing the most current research on indigenous societies in the Hocking Valley The Emergence of the Moundbuilders is distinguished by its broad comparative overview of tribal life Archaeology of the Lower Ohio River Valley Jon Muller, 2016-12-05 Although it has been occupied for as long and possesses a mound building tradition of considerable scale and interest Muller contends that the archaeology of the lower Ohio River Valley from the confluence with the Mississippi to the falls at Louisville Kentucky remains less well known than that of the elaborate mound building cultures of the upper valley This study provides a synthesis of archaeological work done in the region emphasizing population growth and adaptation within an ecological framework in an attempt to explain the area's cultural evolution **Encyclopedia of Prehistory** Peter N. Peregrine, Melvin Ember, 2012-12-06 The Encyclopedia of Prehistory represents temporal dimension Major traditions are an attempt to provide basic information also defined by a somewhat different set of on all archaeologically known cultures sociocultural characteristics than are eth covering the entire globe and the entire nological cultures Major traditions are prehistory of humankind It is designed as defined based on common subsistence a tool to assist in doing comparative practices sociopolitical organization and research on the peoples of the past Most material industries but language ideology

Mainfort, 2005-10-09 This collection provides a comprehensive vocabulary for defining the cultural manifestation of the term Woodland The Middle Ohio Valley is an archaeologically rich region that stretches from southeastern Indiana across southern Ohio and northeastern Kentucky and into northwestern West Virginia In this area are some of the most spectacular and diverse Woodland Period archaeological sites in North America but these sites and their rich cultural remains do not fit easily into the traditional Southeastern classification system This volume with contributions by most of the senior researchers in the field represents an important step toward establishing terminology and taxa that are more appropriate to interpreting cultural diversity in the region The important questions are diverse What criteria are useful in defining periods and cultural types and over what spatial and temporal boundaries do those criteria hold How can we accommodate regional variation in the development and expression

of traits used to delineate periods and cultural types How does the concept of tradition relate to periods and cultural types Is it prudent to equate culture types with periods Is it prudent to equate archaeological cultures with ethnographic cultures How does the available taxonomy hinder research Contributing authors address these issues and others in the context of their Middle Ohio Valley Woodland Period research **Ohio Hopewell Community Organization** William S.

Dancey,2002-10 Contains papers from an April 1992 symposium plus other papers evaluating Olaf Prufer s thesis of the 1960s stating that the Native builders of the earthen mounds of southern Ohio lived in small scattered hamlets Topics include problems and solutions in the study of dispersed communities determining sedentism in the archaeological record habitation at earthworks and evidence and case studies from various sites Includes bandw maps Of interest to professional and amateur archaeologists Annotation copyrighted by Book News Inc Portland OR *Mississippian Communities and Households* J.

Daniel Rogers,Bruce D. Smith,Bruce David Smith,1995-11-30 During the Mississippian period approximately A D 1000 1600 in the midwestern and southeastern United States a variety of greater and lesser chiefdoms took shape Archaeologists have for many years explored the nature of these chiefdoms from the perspective common in archaeological investigations from the top down investigating ceremonial elite mound structures and predicting the basic domestic unit from that data Because of the increased number of field investigations at the community level in recent years this volume is able to move the scale of investigation down to the level of community and household and it contributes to major revisions of settlement hierarchy concepts **Cultural Variability in Context** Mark F. Seeman,1992 Documents and explains the varied settlement and subsistence practices found in the prehistoric mid Ohio Valley during the Woodland Period ca 1000 BC AD 1000 It focuses on settlement and subsistence relationships underlying the prehistoric societies of the region *Mississippian Settlement Patterns* Bruce D. Smith,2014-05-10 Studies in Archeology

Mississippian Settlement Patterns explains the cultural organization of many of the prehistoric societies in the Eastern United States during the last 1000 years of their existence This book emphasizes the difference between the central core of Mississippian societies and those peripheral societies that preceded its development Readers are advised to begin the examination of this compilation by reading Chapter 16 first followed by Chapters 8 to 13 and 15 in order to understand the variations of patterning among societies that are commonly regarded as nascent or developed Mississippian The rest of the chapters analyze cultural groups on the West North and Northeast that are not Mississippian societies including a discussion of late prehistoric societies that are in some ways divergent but are sometimes regarded as Mississippian This publication is valuable to archeologists historians and researchers conducting work on Mississippian societies **The World of Soy** Christine M. Mississippian Spread Robert A. Cook,Aaron R. Comstock,2022-06-29 This book is the first to specifically trace the movement of Mississippian maize farmers throughout the US Midwest and Southeast By providing a backdrop of shifting climatic

conditions during the period this volume also investigates the relationship between farmers and their environments Detailed regional overviews of key locations in the Mississippi Valley the Ohio Valley and the peripheries of the Mississippian culture area reveal patterns and variation in the expression of Mississippian culture and interactions between migrants and local communities Methodologically the case studies highlight the strengths of integrating a variety of data sets to identify migration The volume provides a broader case study of the links between climate change migration and the spread of agriculture that is relevant to archaeologists and anthropologists studying early agricultural societies throughout the world Key patterns of adaptation to and mitigation of the effects of droughts for example provide a framework for understanding the options available to societies in the face of climate change afforded by the time depth of an archaeological perspective
