Biblical Blaspheming Yvonne Sherwood,2012-09-06 Explores the persistence of blasphemy in modern secular democracies and examines ways of talking and thinking about the Bible

Pressure Through Law Carol Harlow,Richard Rawlings,2013-05-13 Group litigation has been recognised by political scientists in the States as a useful method of gaining ground and attracting publicity for pressure groups since the turn of the century In Britain however recognition that the courts fill such a role has come more slowly Despite this lack of recognition pressure through law is far from a modern phenomenon As the authors show such cases can

be identified in Britain as early as 1749 when abolitionists used the court to test conflicting views of slavery in common law. This book looks at the extent to which pressure groups in Britain use litigation, presenting a view of the courts as a target for campaigners and a vehicle for campaigning. It begins with a description of the tradition of pressure through law in Britain, tracing the development of a parallel tradition in the United States which has been influential in shaping current British attitudes. The authors analyse the significance of the political environment in Britain in test case strategy. In contrast with America, Britain has no written constitution and no Bill of Rights, and its lack of Freedom of Information legislation makes both litigation and the monitoring of its effects very difficult. However, the centralised character of the British government means that the effects of lobbying are rather more visible in the corridors of power. The authors examine a large number of case studies in order to analyse current practice, and they look at the rapidly changing European and international scene, discussing transnational law, the European community and the Council of Europe. They also look at the campaign tactics of global organisations such as Amnesty and Greenpeace. Carol Harlow and Richard Rawlings are experienced in public law and familiar with political science literature. They are therefore able to relate legal systems to the political process in a book designed to be accessible and important to lawyers, political scientists and to lobby group activists. **History Today**

,1995 Practicing Religion in the Age of the Media Stewart M. Hoover, Lynn Schofield Clark, 2002-03-06. Increasingly, the religious practices people engage in and the ways they talk about what is meaningful or sacred take place in the context of media culture in the realm of the so-called secular. Focusing on this intersection of the sacred and the secular, this volume gathers together the work of media experts, religious historians, sociologists of religion and authorities on American studies and art history. Topics range from Islam on the Internet to the quasi-religious practices of Elvis fans, from the uses of popular culture by the Salvation Army in its early years to the uses of interactive media technologies at the Simon Wiesenthal Center's Beit Hashoah Museum of Tolerance. The issues that the essays address include the public-private divide, the distinctions between the sacred and profane and how to distinguish between the practices that may be termed religious and those that may not.
