Boone Bartholomees, Army War College (U.S.). Strategic Studies Institute, 2012 This edition of the U S Army War College Guide to National Security Policy and Strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College The 5th Edition is published in two volumes that correspond roughly to the Department of National Security and Strategy s core courses Theory of War and Strategy and National Security Policy and Strategy Like previous editions this one is based on its predecessor but contains both updates and new scholarship Over a third of the chapters are new or have undergone significant rewrites Many chapters some of which appeared for years in this work have been removed Nevertheless the book remains unchanged in intent and purpose Although this is not primarily a textbook it does reflect both the method and manner we use to teach strategy formulation to America s future senior leaders The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process Both volumes are organized to proceed from the general to the specific Thus the first volume opens with general thoughts on the nature and theory of war and strategy proceeds to look at the complex aspect of power and concludes with specific theoretical issues Similarly the second volume begins by examining the policy strategy process moves to a look at the strategic environment and concludes with some specific issues This edition continues the effort begun in the 4th Edition to include several short case studies to illustrate the primary material in the volume War Machines Timothy Moy, 2001 The American military establishment is intimately tied to its technology although the nature of those ties has varied enormously from service to service The air force evokes images of pilots operating hightech weapons systems striking precisely from out of the blue to lay waste to enemy installations The fundamental icon for the Marine Corps is a wave of riflemen hitting the beaches from rugged landing craft and slogging their way ashore under enemy fire How did these very different relationships with technology develop During the interwar years from 1920 to 1940 leaders from the Army Air Corps and the Marine Corps recreated their agencies based on visions of new military technologies In War Machines Timothy Moy examines these recreations and explores how factors such as bureaucratic pressure institutional culture and America s technological enthusiasm shaped these leaders choices The very existence of the Army Air Corps was based on a new technology the airplane As the Air Corps was forced to compete for money and other resources during the years after World War I Air Corps leaders carved out a military niche based on hightech precision bombing The Marine Corps focused on amphibious firstwave assault using sturdy graceless and easy to produce landing craft Moy s astute analysis makes it clear that studying the processes that shaped the Army Air Corps and Marine Corps is fundamental to our understanding of technology and the military at the beginning of the twentyfirst century **Human Smoke** Nicholson Baker, 2009-03-03 A study of the decades leading up to World War II profiles the world leaders politicians business people and others whose personal politics and ideologies provided an inevitable barrier to
