Vego,2009 Smallholder farmers and pastoralists fulfil an invaluable yet undervalued role in conserving biodiversity They act as guardians of locally adapted livestock breeds that can make use of even marginal environments under tough climatic conditions and therefore are a crucial resource for food security But in addition by sustaining animals on natural vegetation and as part of local ecosystems these communities also make a significant contribution to the conservation of wild biodiversity and of cultural landscapes This publication provides a glimpse into the often intricate knowledge systems that pastoralists and smallholder farmers have developed for the management of their breeds in specific production systems and it also describes the multitude of threats and challenges these often marginalized communities have to cope with **Reader's Guide to Military History** Charles Messenger,2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations **The Canadian Army & Normandy Campaign** John A. English,2009-08-18 Honest reappraisal of the Canadian experience in Normandy Special focus on the struggle to close the Falaise Gap Relies on archival records including Bernard Montgomery s personal correspondence **Military Innovation in the Interwar Period** Williamson R. Murray,Allan R. Millett,1998-08-13 In 1914 the armies and navies that faced

each other were alike right down to the strengths of their companies and battalions and the designs of their battleships and cruisers Differences were of degree rather than essence During the interwar period however the armed forces grew increasingly asymmetrical developing different approaches to the same problems This study of major military innovations in the 1920s and 1930s explores differences in exploitation by the seven major military powers The comparative essays investigate how and why innovation occurred or did not occur and explain much of the strategic and operative performance of the Axis and Allies in World War II The essays focus on several instances of how military services developed new technology and weapons and incorporated them into their doctrine organization and styles of operations

The Royal American Regiment Alexander V. Campbell, 2014-10-22 In the wake of Braddock's defeat at Fort Duquesne in 1755 the British army raised the 60th or Royal American Regiment of Foot to fight the French and Indian War Each of the regiment's four battalions saw action in pivotal battles throughout the conflict And as Alexander Campbell shows the inclusion of foreign mercenaries and immigrant colonists alongside British volunteers made the RAR a microcosm of the Atlantic world Not just a potent combat ready force it played a key role in trade migration Indian diplomacy and settlement This book moves beyond the campaign orientation of most regimental histories to explore how the Royal Americans helped forge new Atlantic connections Campbell draws on the regiment's rich archival legacy including the private papers of its first three colonels in chief and of mercenary field officers to describe more fully than previous accounts the lives these soldiers led in the context of their times Campbell takes a closer look at the motivations of regimental founder James Prevost a Swiss mercenary in the courts of Kings George II and George III and explores how migration to America attracted rank and file soldiers He examines the unit's training deployment and operational conduct to reveal the use of new tactics and also chronicles a year in the soldiers' lives as they attended to hard labor in preparation for the summer's campaigns He also traces the postwar activities of these veterans showing how many of them by taking up land grants they had been promised upon enlistment helped settle the frontier and expand commerce Rather than focus on previously documented animosity between British regulars and provincials Campbell reveals how soldiers from different backgrounds formed a multiracial multilingual society that reflected a truly cosmopolitan transatlantic identity
