coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written Encyclopaedic Visions provides a major contribution to Enlightenment studies and the history of ideas in general *It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (18210-1897) to John Stewart Bell (1928-1990)* Charles Mollan, 2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews
