9/11: Culture, Catastrophe and the Critique of Singularity Diana Gonçalves, 2016-10-24 Even though much has been said and written about 9 11 the work developed on this subject has mostly explored it as an unparalleled event a turning point in history This book wishes to look instead at how disruptive events promote a network of associations and how people resort to comparison as a means to make sense of the unknown i e to comprehend what seems incomprehensible In order to effectively discuss the complexity of 9 11 this book articulates different fields of knowledge and perspectives such as visual culture media studies performance studies critical theory memory studies and literary studies to shed some light on 9 11 and analyze how the event has impacted on American social and cultural fabric and how the American society has come to terms with such a devastating event A more in depth study of Don DeLillo s *Falling Man* and Jonathan Safran Foer s *Extremely Loud and Incredibly Close* draws attention to the cultural construction of catastrophe and the plethora of cultural products 9 11 has inspired It demonstrates how the event has been integrated into American culture and exemplifies what makes up the 9 11 imaginary

Counterterrorism in African Failed States Thomas A. Dempsey, 2006 Terrorist groups operating in Sub Saharan Africa failed states have demonstrated the ability to avoid the scrutiny of Western counterterrorism officials while supporting and facilitating terrorist attacks on the United States and its partners The potential acquisition of nuclear weapons by terrorists makes terrorist groups operating from failed states especially dangerous U S counterterrorism strategies largely have been unsuccessful in addressing this threat A new strategy is called for one that combines both military and law enforcement efforts in a fully integrated counterterrorism effort supported by a synthesis of foreign intelligence capabilities with intelligence led policing to identify locate and take into custody terrorists operating from failed states before they are able to launch potentially catastrophic attacks

Counterterrorism in African Failed States: Challenges and Potential Solutions, 2006 Failed states offer attractive venues for terrorist groups seeking to evade counterterrorism efforts of the United States and its partners in the Global War on Terror GWOT State failure entails among its other features the disintegration and criminalization of public security forces the collapse of the state administrative structure responsible for overseeing those forces and the erosion of infrastructure that supports their effective operation These circumstances make identification of terrorist groups operating within failed states very difficult and action against such groups once identified problematic Terrorist groups that are the focus of the current GWOT display the characteristics of a network organization with two very different types of cells terrorist nodes and terrorist hubs Terrorist nodes are small closely knit local cells that actually commit terrorist acts in the areas in which they are active Terrorist hubs provide ideological guidance financial support and access to resources enabling node attacks An examination of three failed states in Sub Saharan Africa Liberia Sierra Leone and Somalia reveals the presence of both types of cells and furnishes a context for assessing the threat they pose to the national interests of the United States and its partners

novels have attracted rich critical attention since their publication book length studies proved surprisingly scarce L M Montgomery s *Emily of New Moon* A Children s Classic at 100 is the first scholarly volume exclusively dedicated to the trilogy coalescing different research perspectives It offers a fresh point of entrance into a well loved classic at its one hundredth anniversary
