The Notorious Astrological Physician of London Barbara Howard Traister, 2010-12-15 Quack conjurer sex fiend murderer Simon Forman has been called all these things and worse ever since he was implicated two years after his death in the Overbury poisoning scandal that rocked the court of King James But as Barbara Traister shows in this fascinating book Forman's own unpublished manuscripts considered here in their entirety for the first time paint a quite different picture of

the works and days of this notorious astrological physician of London Although he received no formal medical education Forman built a thriving practice His success rankled the College of Physicians of London who hounded Forman with fines and jail terms for nearly two decades In addition to detailing case histories of his medical practice the first such records known from London as well as his run ins with the College Forman s manuscripts cover a wide variety of other matters from astrology and alchemy to gardening and the theater His autobiographical writings are among the earliest English examples of their genre and display an abiding passion for reworking his personal history in the best possible light even though they show little evidence that Forman ever intended to publish them Fantastic as many of Forman s manuscripts are it is their more mundane aspects that make them such a priceless record of what daily life was like for ordinary inhabitants of Shakespeare s London Forman s descriptions of the stench of a privy the paralyzed limbs of a child a lost bitch dog with a velvet collar all offer tantalizing glimpses of a world that seems at once very far away and intimately familiar Anyone who wants to reclaim that world will enjoy this book

The History of Medical Education in Britain, 2020-01-29 Professional education forms a key element in the transmission of medical learning and skills in occupational solidarity and in creating and recreating the very image of the practitioner Yet the history of British medical education has hitherto been surprisingly neglected Building upon papers contributed to two conferences on the history of medical education in the early 1990s this volume presents new research and original synthesis on key aspects of medical instruction theoretical and practical from early medieval times into the present century Academic and practical aspects are equally examined and balanced attention is given to different sites of instruction be it the university or the hospital The crucial role of education in medical qualifications and professional licensing is also examined as is the part it has played in the regulation of the entry of women to the profession Contributors are Juanita Burnby W F Bynum Laurence M Geary Faye Getz Johanna Geyer Kordesch S W F Holloway Stephen Jacyna Peter Murray Jones Helen King Susan C Lawrence Irvine Loudon Margaret Pelling Godelieve Van Heteren and John Harley Warner
