The Hour of Absinthe Nina S. Studer, 2024-09-17 At the height of its popularity in the late nineteenth century absinthe reigned in the bars caf s and restaurants of France and its colonial empire Yet by the time it was banned in 1915 the famous green fairy had become the green peril feared for its connection with declining birth rates and its apparent capacity to induce degeneration madness and murderous rage in its consumers As one of history's most notorious drinks absinthe has been the subject of myth scandal and controversy The Hour of Absinthe explores how this mythologizing led to the creation and fabrication of a vast modern folklore while key historical events crucial to understanding the story of absinthe have been neglected or unreported Mystique and moralizing both arose from the spirit's relationship with empire Some claim that French soldiers were given daily absinthe rations during France's military conquest of Algeria to protect them against heat diseases and contaminated water In fact the overenthusiastic adoption of the drink by these soldiers and subsequently by French settlers was perceived as a threat to France's colonial ambitions an anxiety that migrated into French medicine Providing keen insight into how local cultural narratives about absinthe shaped what quickly became a global reputation Nina Studer provides a panoptic view of the French Empire's influence on absinthe's spectacular fall from grace

Volume 3 Munir Ozturk,Khalid Rehman Hakeem,2019-02-11 Early anthropological evidence for plant use as medicine is 60 000 years old as reported from the Neanderthal grave in Iraq The importance of plants as medicine is further supported by archeological evidence from Asia and the Middle East Today around 1 4 billion people in South Asia alone have no access to modern health care and rely instead on traditional medicine to alleviate various symptoms On a global basis approximately 50 to 80 thousand plant species are used either natively or as pharmaceutical derivatives for life threatening conditions that include diabetes hypertension and cancers As the demand for plant based medicine rises there is an unmet need to investigate the quality safety and efficacy of these herbals by the scientific methods Current research on drug discovery from medicinal plants involves a multifaceted approach combining botanical phytochemical analytical and molecular techniques For instance high throughput robotic screens have been developed by industry it is now possible to carry out 50 000 tests per day in the search for compounds which act on a key enzyme or a subset of receptors This and other bioassays thus offer hope that one may eventually identify compounds for treating a variety of diseases or conditions However drug development from natural products is not without its problems Frequent challenges encountered include the procurement of raw materials the selection and implementation of appropriate high throughput bioassays and the scaling up of preparative procedures Research scientists should therefore arm themselves with the right tools and knowledge in order to harness the vast potentials of plant based therapeutics The main objective of Plant and Human Health is to serve as a comprehensive guide for this endeavor Volume 1 highlights how humans from specific areas or cultures use indigenous plants Despite technological developments herbal drugs still occupy a preferential place in a majority of the population in the third world and have slowly taken roots as alternative medicine in the West The integration of modern science with traditional uses of herbal drugs is important for our understanding of this ethnobotanical relationship Volume 2 deals with the phytochemical and molecular characterization of herbal medicine Specifically it will focus on the secondary metabolic compounds which afford protection against diseases Lastly Volume 3 focuses on the physiological mechanisms by which the active ingredients of medicinal plants serve to improve human health Together this three volume collection intends to bridge the gap for herbalists traditional and modern medical practitioners and students and researchers in botany and horticulture Studies
