Very Short Introductions Brilliant Sharp Inspiring The world teems with different kinds of music traditional folk classical jazz rock pop and each type of music tends to come with its own way of thinking

Drawing on a wealth of accessible examples ranging from Beethoven to Chinese zither music this Very Short Introduction considers the history of music and thinking about music focussing on its social and cultural dimensions

Nicholas Cook balances the Western Classical traditions within the context of many other musical cultures in today's world tracing the way in which their development since the eighteenth century has conditioned present day thinking and practice both within and beyond the West

He also considers the nature of music as a real time performance practice the role of music in contexts of social and political action and the nature of musical thinking including the roles played in it by instruments notations and creative imagination

In this new edition Cook explores the impact of digital technology on the production and consumption of music including how it has transformed participatory music making and the music business

He also discusses music's position in a globalized world from the role it played in historical processes of colonisation and decolonisation to its present day significance as a vehicle of cross cultural communication
