Groom,2012-12-06 In 1948 I was posted as a Political Officer to a remote part of south west Arabia on the edge of the great desert called the

Empty Quarter In valleys made fertile by seasonal flood waters lay the remains of an ancient civilization I found inscriptions and the ruin sites of towns palaces and temples Almost buried under the sand dunes were the tumbled walls of a great city From here two thousand years before huge camel caravans had trudged their way along 1600 miles of burning sand and rocks to Petra and Gaza burdened with a most precious cargo frankincense myrrh and other perfume materials for the courts temples and perfume shops of Rome My book Frankincense and Myrrh delved into the details of this romantic trade and led to a broader interest in the perfumes of ancient times Then researching on behalf of a perfume house into the Arab contribution to perfumery I came across the collection of perfume recipes assembled by the Arab philosopher scientist Yaquub al Kindi which have never been translated into English some which I have translated myself are now included in an appendix to this book I realized that in that work I had found key evidence to demonstrate how the medieval Arab perfume makers had been the bridge in perfume history between ancient and modern times Perfumery could now be seen as an art with a continuous history of development since the dawn of civilization

The Psychological Basis of Perfumery J. Stephan Jellinek, 2012-12-06 During the many years of its publication and subsequent revisions Paul Jellinek's book has been the standard work on its subject This new edition translated into English for the first time was conceived in response to the increased interest in recent years in perfumes and the sense of smell This interest has come not only from within the highly competitive perfumery industry but also from psychologists and market researchers The original text has impressively withstood the test of time and the approach of this new book has been to supplement it with chapters that are now of critical importance but which were only touched upon in the original book A market researcher looks at why people use perfumes a psychologist examines the motivation of perfume choice another psychologist discusses odours and a perfumer looks at the effects of odours on human experience and behaviour In the final chapter the editor compares the original author's views with those of today's experts and suggests which aspects are still valid and in what areas divergent views now prevail This book is written principally to provide a scientific basis to the craft of perfumery and to enable formulators and marketers to understand why the smells they create and sell have the effect they do It allows a systematic approach to the development of these products Others outside the industry including psychologists in academia will find the book an essential reference source

Perfumes Luca Turin, Tania Sanchez, 2010-08-06 I've long wished perfumery to be taken seriously as an art and for scent critics to be as fierce as opera critics and for the wearers of certain fragrances to be hissed in public while others are cheered This year has brought *Perfumes The Guide* by Luca Turin and Tania Sanchez which I breathed in rather

than read in one delighted gulp Hilary Mantel Guardian Perfumes The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume making Perfume writing has certainly never been this honest compelling or downright entertaining

The Chemistry of Fragrances Charles Sell, Charles S. Sell, 2006 Ever wondered how perfumes are developed Or why different scents appeal to different people The Chemistry of Fragrances 2nd Edition offers answers to these questions providing a fascinating insight into the perfume industry from the conception of an idea to the finished product It discusses the technical artistic and commercial challenges of the perfume industry in an informative and engaging style with contributions from leading experts in the field The book begins with a historical introduction and covers all aspects of the development process from customer brief to producing a fragrance including Ingredients acquisition Ingredient design and manufacture Design and analysis of fragrance Sensory aspects including odour perception Psychological impact of fragrance Technical challenges Safety An updated section on the measurement of fragrance discusses the role of senses in marketing consumer products This book will appeal to anyone with an interest in the perfumery business and includes an extensive bibliography to enable those interested to explore the field further It also comes complete with a selection of colour illustrations and a fragranced page

Perfume in the Bible Charles S Sell, 2019-07-26 Perfume is part of the biblical text from Genesis through to Revelation just as perfume pervades our modern life Identifying the ingredients used in biblical times is difficult when information and meaning is lost in ancient languages As expected biblical perfumes were made from natural products but the range employed is surprisingly different from those of modern perfumes The biblical ingredients are either defensive substances or products of decay opening up an avenue of speculation as to why this is so Charles Sell started his research into this area whilst working at Givaudan the world's leading manufacturer of perfumes and flavours The introductory chapter of this book gives a brief outline of the history of the Bible lands paving the way to understanding the difficulties in identifying exactly which plant sources the original authors meant Other chapters discuss how plants make chemicals and how the sense of smell functions The book explores the preparation storage and uses of perfume both sacred and secular and compares and contrasts biblical perfumes with their modern equivalents It recounts some interesting biblical events involving perfume ranging from courtship through seduction to prostitution and murder The use of beautiful images from the windows of Canterbury Cathedral where the author is a guide illustrate some of the people and events in the biblical accounts and enable visualization of the historical uses of perfumes The book is aimed at a broad audience and requires no prior specialised knowledge The subject matter will be of interest to everyone including chemists and general scientists historians those interested in perfumery those interested in religious studies and anyone interested in exploring chemistry in the world of art and the creative professions
