

Animals In Research New Perspectives In Animal Experimentation

Michael Allen Fox

Animals In Research New Perspectives In Animal Experimentation:

Animals in Research David Sperlinger, 1981 *Animal Experimentation* Vaughan Monamy, 2009-01-22 This text covers the history and ethics of experimentation discusses the moral status of animals and the obligations of researchers and introduces alternatives to animal research The Case for Animal Experimentation Michael Allen Fox, 1986-01-01 Discusses animal rights and the morality of animal experiments suggests ethical guidelines for the use of animals as test subjects and identifies irrational attitudes towards animals *Quick Bibliography Series*, 1976 **Animal Welfare Legislation and Regulations** Janice C. Swanson, 1991 *The Ethics of Animal Experimentation* Donna Yarri, 2005-08-18 The ethical treatment of animals has become an issue of serious moral concern Many people are challenging long held assumptions about animals and raising questions about their status and treatment What is the relationship between humans and animals Do animals have moral standing Do we have direct or indirect duties to animals Does human benefit always outweigh animal suffering The use of animals for experimentation raises all of these questions in a particularly insistent way Donna Yarri gives an overview of the current state of the discussion and presents an argument for significantly restricted animal experimentation Pointing to the similarities between humans and animals she argues that the actual differences are differences of degree rather than kind Animal cognition and animal sentience together are the basis for the claim that experimental animals do have rights Examining arguments in the disciplines of ethology philosophy science and theology Yarri makes a case for placing substantial restrictions on animal experimentation Grounding her examination in Christian theology she formulates a more humane approach to animal experimentation She concludes with a concrete burden benefit analysis that can serve as the foundation for informed decision making *The Ethics of Animal Experimentation* serves as both a handbook of animal rights theory and a practical guide to navigating the complexities of animal experimentation As animal experimentation features in an increasing number of scientific endeavors it is an ethical issue that requires our immediate attention Yarri's unique contribution forges a path toward an ethical practice of animal experimentation **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 *Effect of Ultraviolet-B on Plants* Susan Whitmore, 1991 Animal Models for the Study of Human Disease P. Michael Conn, 2013-05-29 *Animal Models for the Study of Human Disease* identifies important animal models and assesses the advantages and disadvantages of each model for the study of human disease The first section addresses how to locate resources animal alternatives animal ethics and related issues much needed information for researchers across the biological sciences and biomedicine The next sections of the work offers models for disease oriented topics including cardiac and pulmonary diseases aging infectious diseases obesity diabetes neurological diseases joint diseases visual disorders cancer hypertension genetic diseases and diseases of abuse Organized by disease orientation for ease of searchability Provides information on locating resources animal alternatives and animal ethics Covers a broad range of animal models used in research for human disease

Laboratory Animal Welfare ,1984 **Animal Welfare Legislation and Regulation 1970-1987** Jean A. Larson,1988

AWIC Series ,1989

Creating Life: A New Perspective Pasquale De Marco,2025-07-12

In the vast expanse of the universe life exists as an enigmatic and awe inspiring phenomenon *Creating Life A New Perspective* embarks on a profound exploration of life s origins diversity and profound significance unraveling its mysteries and challenging our understanding of this extraordinary force Delve into the captivating realm of life s origins where we trace its enigmatic beginnings in the primordial soup of early Earth Discover the essential characteristics that define living organisms unraveling the intricacies of DNA the blueprint of life and the symphony of cells that orchestrate life s intricate processes Marvel at life s resilience and adaptability as it thrives in the most extreme environments showcasing its extraordinary ability to endure and flourish Venture beyond the confines of our planet and explore the tantalizing question of extraterrestrial life Journey through the vast reaches of the cosmos searching for signs of life on other planets and moons Contemplate the profound implications of discovering life beyond our own challenging our understanding of life s uniqueness and our place in the universe Grapple with the intricate ethical quandaries that arise from our understanding of life Confront the moral implications of genetic engineering cloning and the quest for immortality Address the urgent need to preserve our planet s biodiversity and tackle the environmental crises that threaten life s delicate balance These ethical considerations demand our thoughtful attention as we navigate the complex web of life s interconnectedness Peer into the future and envision a world where synthetic biology and artificial intelligence converge blurring the boundaries between the living and the artificial Consider the potential for life to flourish beyond Earth as we contemplate the colonization of other planets and the prospect of interstellar travel Explore the profound questions surrounding the meaning of life and the purpose of our existence seeking insights into life s enduring legacy and ultimate significance Through this comprehensive exploration of life *Creating Life A New Perspective* invites readers to gain a deeper understanding of the interconnectedness of all living things and the profound beauty and wonder that life encompasses Appreciate the fragility of life and the urgent need to protect and preserve our planet s biodiversity Ultimately this journey of discovery leaves us with a profound sense of awe and gratitude for the gift of life inspiring us to cherish and celebrate the extraordinary tapestry of life that surrounds us If you like this book write a review

Animal Rights

Cass R. Sunstein,Martha C. Nussbaum,2004-04-01

Cass Sunstein and Martha Nussbaum bring together an all star cast of contributors to explore the legal and political issues that underlie the campaign for animal rights and the opposition to it Addressing ethical questions about ownership protection against unjustified suffering and the ability of animals to make their own choices free from human control the authors offer numerous different perspectives on animal rights and animal welfare They show that whatever one s ultimate conclusions the relationship between human beings and nonhuman animals is being fundamentally rethought This book offers a state of the art treatment of that rethinking *New Perspectives on Human-Animal Interactions* Sarah Knight,Harold Herzog,Rick H. Hoyle,2009-09-01 Animals are important in

human psychological and cultural life and our relationships with other species are psychological and morally complicated This special issue presents a series of original research articles concerning attitudes towards animals the ethics of their treatment the effects of companion animals on human health and psychological well being and the role that culture plays in our interactions with other species The articles illustrate the scope of the new field of human animal relationships the variety of research approaches and the implications of research findings for social policy Animal Welfare Legislation and Regulation, January 1979-November 1988 Janice C. Swanson, 1989 **Animal Welfare Legislation and Regulation** Kevin Engler, 1990 **Reference Materials for Members of Animal Care and Use Committees** D'Anna J. B. Jensen, 1991

Carcinogenesis Michael P. Waalkes, Jerrold M. Ward, 1994-06-30 Carcinogens like chemicals with other toxic hazards often produce adverse effects only in specific organs or tissues The factors determining whether a chemical induces cancer in an organ range from simple toxicokinetics to complex phenomena such as expression or lack of expression of specific genes This volume examines the site specific factor *The Thee Generation* Tom Regan, 1991 The revolution examined in this collection of essays is a revolution of the human spirit In this revolution Tom Regan passionately contends that the expansive ethic of service is replacing the suffocating ethic of greed Unlike previous generations The Thee Generation asks What do I have to give rather than What can I get to Keep Regan defines Thee as those to be served the handicapped the poor the illiterate the homeless the starving and the abused those newly born and those soon to die This generation is generous enough to include the animal kingdom and even the earth itself for the world of The Thee Generation is a place where a shared sense of community replaces the void of individual estrangement Each of these provocative readable essays most of which have not been previously published offers answers to important moral questions and attempts to identify the right reasons for those answers Regan addresses such topics as child pornography feminism deep ecology vivisection Christian theology and career choice The questions he raises force us to consider the boundaries of the moral community and what it means to be human in our own generation The human is but one life form among many and what distinguishes us from the larger community of life is not our power to subdue but our responsibility to protect Author note Tom Regan Professor of Philosophy at North Carolina State University has published numerous books including Bloomsbury's Prophet Temple and The Case for Animal Rights
