Animals Politics And Morality Second Edition Issues In Environmental Politics:

Animals, politics and morality Robert Garner, 2024-06-04 How do we treat animals How ought we to treat them These are the two central questions tackled in the extensively re written and up dated second edition of this well regarded and much cited text It remains the only book which combines in a single volume not only a concise and accessible account of the on going debate about animals in moral and legal philosophy but also a detailed analysis of how this debate is central to an understanding of the ways in which animals are treated In the last decade in Britain we have witnessed major campaigns and public controversy over the export of live animals and the use of animals in research Major campaigns have been mounted against companies such as Shamrock and Huntingdon Life Sciences The impact of genetic engineering on the welfare of animals has also emerged as an important area of concern In addition the controversy over hunting has become even more pronounced with the launch of the pro hunting Countryside Alliance

Political Animals and Animal Politics Marcel Wissenburg, David Schlosberg, 2018-02-17 While much has been written on environmental politics on the one hand and animal ethics and welfare on the other animal politics is underexamined There are key political implications in the increase of animal protection laws the rights of nature and political parties dedicated to animals

The Animal Rights Debate Gary Lawrence Francione, Robert Garner, 2010 Annotation Francione maintains that we have no moral justification for using nonhumans arguing that because animals are property laws fail to provide any meaningful level of protection Garner favours a version of animals rights that focuses on eliminating animal suffering Here they deconstruct the animal protection movement

Pickard,2023-02-02 Recently important new research has emerged to explain the large intergenerational cleavages in values and political preferences in many contemporary societies In most established democracies and many newer democracies young people are more likely to possess progressive values and are much more cosmopolitan in their outlook socially liberal accepting of cultural diversity and outward looking than older generations They tend to reject mainstream electoral politics and authoritarian nationalist forms of populism in favour of alternative progressive political parties and movements Indeed there is burgeoning evidence of a global tendency towards young people s support for and participation in new styles of non institutionalised political action that seem to better fit their life styles and to permit the actualisation of their political aspirations Although there is a considerable body of existing literature that examines the rise of such values and political participation preferences there is little work that focuses on the relationship with the prioritisation of environmental issues and environmental activism as evidenced in the September 2019 global climate strikes The goal of the current Research Topic is to explore the contemporary realities and patterns of youth participation in environmental politics in different societies As such we welcome manuscripts of original research and conceptualization that address the different practices of youth as they seek to effect environmental change and also their motivations for doing so Contributions are welcome from scholars youth practitioners and activists operating in a range of different settings and using diverse disciplinary and multidisciplinary and interdisciplinary perspectives Political Theory and the Environment Matthew Humphrey,2020-04-22 This collection offers a sympathetic but critical perspective on contemporary ecological political theory and gives proposals for a reorientation of some of its key aspects *ECOLOGY, COMMUNICATION AND ENVIRONMENT* Jay Prakash Tiwari,2021-11-25 *ECOLOGY COMMUNICATION AND ENVIRONMENT* Perspectives of the Vedic Philosophy This book attempts to relate the environmental problems with patterns of our communication with nature It is a comparative study of the Judaeo Christian and Vedic worldviews and their articulations in the human communication with nonhuman world The author explores the Vedic cosmology metaphysics concepts of Rta dharma and yajna and extracts and systematizes them into the pattern of human communication with the nonhuman world with reference to the environmental ethics So far as I know this is a unique work in the area of Vedic environmental philosophy I hope the book will provide some valuable insights and it will inspire further studies in the area of Vedic environmental philosophy **Peter Singer Under Fire** Jeffrey A. Schaler,2011-09-30 One of the leading ethical thinkers of the modern age Peter Singer has repeatedly been embroiled in controversy Protesters in Germany closed down his lectures mistakenly thinking he was advocating Nazi views on eugenics Conservative publisher Steve Forbes withdrew generous donations to Princeton after Singer was appointed professor of bioethics His belief that infanticide is sometimes morally justified has appalled people from all walks of life Peter Singer Under Fire gives a platform to his critics on many contentious issues Leaders of the disability rights group Not Dead Yet attack Singer s views on disability and euthanasia Economists criticize the effectiveness of his ideas for solving global

poverty Philosophers expose problems in Singer's theory of utilitarianism and ethicists refute his position on abortion Singer's engaging Intellectual Autobiography explains how he came by his controversial views while detailed replies to each critic reveal further surprising aspects of his unique outlook **Encyclopedia of Business Ethics and Society** Robert W. Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society International Encyclopedia of Environmental Politics John Barry, E. Gene Frankland, 2014-02-25 Why care about the environment Is the earth's climate really changing for the worse What are CFCs exactly And who or what is the WTO What are the causes of environmental problems Who are the main actors and what are the main ideas and issues in international environmental politics Which countries have the best worst environmental record and policies The International Encyclopedia of Environmental Politics is the essential reference source to enable all those with an interest in the politics of the environment particularly students and academics working within political science to answer these questions and to explore many other related topics in international environmental politics It will be welcomed as an essential teaching resource and a trusty companion to independent study Written by a team of international experts the Encyclopedia is vital for fact checking provides authoritative initial orientation to a particular topic or issue and will serve as a solid starting point for wider explanation With over 300 fully cross referenced entries many of which are followed with suggestions for further reading the Encyclopedia includes Country and regional entries with country entries giving a concise overview of the history main actors issues and policies related to its environmental politics Normative and ethical dimensions of environmental politics from animal rights social and global justice to deep ecology Environmental movements organizations struggles and actors from local to international levels Issues in international environmental politics such as global warming biodiversity trade and the environment Prominent individuals historical and current who have inspired or been actively involved in international environmental politics such as Mahatma Gandhi Petra Kelly Vandana Shiva and Aldo Leopold Central topics and issues in environmental politics such as global warming globalization wildlife preservation eco taxes energy production and consumption sustainable development and the World Trade Organisation *Animals, Politics and Morality* Robert Garner, 2004 This is an extensively re-written second edition of a well-regarded and much-cited text on the issue of animal protection It remains the only text to combine an examination of the philosophy and politics of the issue Its central argument is that the philosophical debate is central to an understanding and evaluation of the substantive issues involving animals and the nature of the movement for change The book has been thoroughly revised to include major theoretical and empirical developments Specifically the second generation of animal ethics literature is examined in detail and attention is paid to the campaigns and public controversy over the export of live animals and the use of animals in research the impact of genetic engineering on the welfare of animals and the latest developments in the controversy over hunting *Animal Ethics* Robert Garner, 2005-09-02 This book is an attempt to lead the way through the moral maze that is

our relationship with nonhuman animals Written by an author with an established reputation in this field the book takes the reader step by step through the main parameters of the debate demonstrating at each turn the different positions adopted In the second part of the book the implications of holding each position for the ethical permissibility of what is done to animals in laboratories farms the home and the wild are explained Garner starts by asking whether animals have any moral standing before moving on to assess exactly what degree of moral status ought to be accorded to them It is suggested that whilst animals should not be granted the same moral status as humans they are worthy of greater moral consideration than the orthodox animal welfare position allows As a result it is suggested that many of the ways we currently treat animals are morally illegitimate In the final chapter the issue of political praxis is tackled How are reforms to the ways in which animals are treated to be achieved This book suggests that currently dominant debates about insider status and direct action are less important than the question of agency That is the important question is not what is done to change the way animals are treated as much as whom is to be mobilised to join the cause Students of philosophy politics and environmental issues will find this an essential textbook
