Fast and Formidable Animals Agatha Gregson, 2016-07-15 Pronghorn kangaroos rhinos and ostriches all have something in common speed They re not only fast but they re fast enough to outrun their predators This crucial adaptation has enabled them to survive in their various habitats amongst ferocious animals that seek to consume them Readers will love reading about the swift beasts in this book and how they thwart their enemies Key science concepts such as adaptations and habitats are interwoven into the text Action photographs in the wild a graphic organizer and fact boxes are highlights of this engagingly designed volume Research Handbook on Animal Law and Animal Rights Tomasz Pietrzykowski, Birgitta Wahlberg, 2025-09-10 This Research Handbook examines contemporary animal law and its relationship to the philosophical and legal idea of animal rights Adopting an inter and multidisciplinary approach it explores the role of legal theory legal practice strategic litigation and advocacy in the global development of laws protecting animals Tomasz Pietrzykowski and Birgitta Wahlberg bring together expert contributing authors to discuss interspecies constitutionalizing and the evolution of animal law scholarship Animal People Adam Reed, 2025-01-15 Animal People introduces readers to the professionalized world of animal protection from the perspective of those who consider themselves to be moderate activists Adam Reed explores the interrelationships between moral cause and organizational culture including the ways in which expert roles such as investigator and lobbyist inform the practice and outlook of animal protection This book examines not only connections between forms of professionalism and everyday advocacy but also how those working to improve the welfare of animals can come to possess an expertise in public or mainstream ethics Reed explores these issues through the example of a Scottish based animal protection organization Animal People makes a distinctive contribution to anthropological debate and discussion relating to human and nonhuman animal interactions activism and the attributions and imperatives of moral action **Grossest Animal Tricks** Agatha Gregson, 2016-07-15 Stenches slime excrement and vomit are all gross and very effective animal defenses A dog that has been sprayed by a skunk will rarely want to approach the furry animal again The seabird called the fulmar spews a stinky vomit powerful enough to cause a bird to drown These are just two of the creatures in the spotlight of this entertaining volume Readers will learn just how powerful defensive adaptations can be against even the deadliest predators Essential science vocabulary demonstrative photographs and surprising fact boxes augment this book s motivating and educational content **Theorizing Animals** Nik Taylor, Tania Signal, 2011-04-21 Drawing on current trends in post modernism and post humanism this books offers a challenge to current ways of thinking theorising and talking about animals and humanimal relations Solidarity with Animals Alasdair Cochrane, Mara-Daria Cojocaru, 2024-05-03 Solidarity has received considerable scholarly attention and is central in many social justice movements It is striking then that solidarity s relevance meaning and practical implications in the context of animal protection have not been systematically explored This is particularly surprising given the recent so called political turn in animal ethics Work in the

political turn accepts claims about the moral status of animals and people's personal obligations towards them but advances the field in at least two ways First thinkers emphasize that mutually beneficial human animal relations cannot rely solely on personal transformation but also require institutional transformation Secondly scholars claim that to meaningfully improve the lives of animals we must not only change our political systems but better understand various animals own perspectives and political agency to feed into more than human politics But while much work in this political turn has been done on concepts like justice agency representation etc only very few animal scholars have talked about solidarity And those that have have done so only in very specific contexts and frameworks This lack of attention is also mirrored also within animal activism where those few campaigners who have employed the term have done so only in a very loose way This edited collection brings together the leading thinkers in the fields of animal ethics politics social philosophy world religions and the law to explore this lacuna and thus provide the first book length treatment of solidarity between the species Totally Amazing Facts about Dogs Nikki Potts, 2020-03-05 Ever wondered how many words dogs can learn Want to know how many bones a dog has Curious to find out what kind of dog yodels Check out all the mind bending amazing facts about dogs

Cages Justin Marceau, 2019-04-11 Demonstrates how carceral animal law strategies put animal protection efforts at war with general anti oppression and civil rights efforts Animals Undercover: Camouflage Madeleine Fortescue, 2016-07-15 Nature is tricky and the animals in this book prove it Camouflage is a remarkable adaptation that manifests itself through coloring shape and movement This entertaining and informative text explains the different forms of camouflage that animals employ to survive in their environments Arctic hares octopuses penguins praying mantises polar bears and zebras are some of the high interest animals in disguise in this volume packed with essential science concepts and bright photographs

Legitimizing Corporate Harm Jennifer L. Schally, 2017-11-30 This book utilizes critical discourse analysis to illuminate the ways in which one of the largest agribusinesses in operation Tyson Foods disguises their actions whilst simultaneously presenting the image of a benign good corporate citizen Schally unveils how the discourses employed by Tyson gain legitimacy by drawing on and aligning with larger cultural discourses that are often taken for granted and not adequately scrutinised This original research situated at the intersection of green and cultural criminologies contributes to these current perspectives as well as to the burgeoning social harm approach within criminology A bold and engaging study this book will be indispensable for students and scholars of green criminology corporate crime animals and society and environmental sociology as well as environmental and animal rights activists

The Human Use of Animals F. Barbara Orlans, 1998 This volume of case studies on animal ethics deals with important social controversies involving the human use of animals and analyzes the moral issues involved An introduction to ethical theory provides a framework to the 16 original case studies which include the use of animals in research testing and education as food as companion animals and in religious rites The book is intended for bioethics courses and animal career staff

Deadly Animal Poisons Madeleine Fortescue, 2016-07-15 Many animal species have developed a deadly adaptation to thwart their predators poison Some infamous spiders and snakes are feared and rightly so for their toxic defenses However many other animals are just as deadly In this fascinating volume readers will find out the difference between poison and venom They ll learn about several creatures and the toxins they use to survive in the wild such as the pufferfish the poison dart frog the cone snail and the blue ringed octopus Beautiful color photographs a graphic organizer and fact boxes with stunning information augment this exciting volume Applied Crisis Communication and Crisis Management

Schizoanalysis and Animal Science Education Helena Pedersen, 2020-09-17 Within the education system acts of violence toward animals take place and are manifested on a routine basis in science classes in lecture halls in school canteens and during study visits to zoos farms and slaughterhouses Taken for granted as necessary for teaching and learning this violence profoundly affects animals as well as students It also provides new entry points for understanding education as a multispecies power regime driven by numerous other investments than knowledge dissemination alone What then is the nature of this educational violence and how exactly does education work through techniques of interference with student and animal bodies Based on ethnographic research within upper secondary schools and higher education this book challenges the use of animals in education by innovative engagement of Deleuze and Guattari's tool of schizoanalysis Sparking a fundamental rethinking of educational processes relations and aims the book explores how scientific knowledge about animals proliferates through complex interplay of power and desire in contested spaces of teaching and learning Configuring animal science education as a set of machines working in tandem with the animal industry Helena Pedersen offers radical new insights into how education forms subjectivities and social orders under conditions of capitalist expansion that capture students and animals alike Bringing together education studies science studies critical animal studies and continental philosophy Pedersen also provides examples of disruptive action that can put education to work for transformation and liberation

Animals Are Not Ours (No, Really, They're Not) Sarah Withrow King, 2016-01-04 Why should Christians care about animals Is there a biblical basis for abstaining from eating animals Is avoiding companies that use and misuse animals a viable way for Christians to better live out the message of God In *Animals Are Not Ours* Sarah Withrow King makes the argument that care for all of creation is no far fetched idea that only radical people would consider but rather a faithful witness of the peaceful kingdom God desires and Jesus modeled This includes all living and breathing creatures that share this earth with us King uses her decade plus experience as a vegan her seminary education her evangelical Christian faith and her years working with PETA to call Christians to examine how we treat and view the nonhuman animals with whom we share a finite planet

Run, Spot, Run Jessica Pierce, 2016-05-06 A thoughtful book about how to ensure that the animals we love benefit from the relationship as much as we do Kirkus Reviews We feel love for our companions and happiness that we're providing them with a safe healthy life But sometimes we also feel guilt When we see our cats gazing wistfully out the window or watch a goldfish swim lazy circles in a bowl we can't help but wonder Are we doing the right thing keeping these independent beings locked up subject to our control Is keeping pets actually good for the pets themselves That's the question that animates Jessica Pierce's powerful *Run Spot Run* A bioethicist and a lover of pets herself including over the years dogs cats fish rats hermit crabs and more Pierce explores the ambiguous ethics at the heart of this relationship and through a mix of personal stories philosophical reflections and scientifically informed analyses of

animal behavior and natural history she puts pet keeping to the test Is it ethical to keep pets at all Are some species more suited to the relationship than others Are there species one should never attempt to own And are there ways that we can improve our pets lives so that we can be confident that we are giving them as much as they give us With gentle humor clear compelling language and always in search of the physically and emotionally healthiest lives possible for our animal companions Run Spot Run moved me all the more because it s written from the inside looking out Pierce herself lives with three pets and understands the deep urge so many of us feel to connect across species lines Barbara King author of How Animals Grieve
