The Inquisitive Biologist *Creative Evolution* Henri Bergson, 2022-12-01 First published in French in 1907 Henri Bergson s *Evolution creative* is a scintillating and radical work by one of the great French philosophers of the nineteenth and twentieth centuries This outstanding new translation the first for over a hundred years brings one of Bergson s most important and ambitious works to a new generation of readers A sympathetic though critical reader of Darwin Bergson argues in *Creative Evolution* against a mechanistic reductionist view of evolution For Bergson all life emerges from a creative shared impulse which he famously terms *lan vital* and which passes like a current through different organisms and generations over time Whilst this impulse remains as forms of life diverge and multiply human life is characterized by a distinctive form of consciousness or intellect Yet as Bergson brilliantly shows the intellect s fragmentary and action oriented nature which he likens to the cinematograph means it alone cannot grasp nature s creativity and invention over time A major task of *Creative Evolution* is to reconcile these two elements For Bergson the answer famously lies in intuition which brings instinct and intellect together and takes us into the very interior of life A work of great rigour and imaginative richness that contributed to Bergson winning the Nobel Prize for Literature in 1927 *Creative Evolution* played an important and controversial role in the trajectory of twentieth century philosophy and continues to create significant discussion and debate The philosopher and psychologist William James who admired Bergson s work was writing an introduction to the first English translation of the book before his death in 1910 This new translation includes a foreword by Elizabeth Grosz and a helpful translator s introduction by Donald Landes Also translated for the first time are additional notes articles reviews and letters on the reception of *Creative Evolution* in biology mathematics and theology This edition includes fascinating commentaries by philosophers Maurice Merleau Ponty Georges Canguilhem and Gilles Deleuze
