Mummies and Death in Egypt Françoise Dunand, Roger Lichtenberg, 2006 Today a good century after the first X rays of mummies Egyptology has the benefit of all the methods and means at the disposal of forensic medicine The mummy stories we tell have changed their tone but they have enjoyed much success with fantastic scientific and technological results resolving the mysteries of the ancient land of the pharaohs from the Foreword Mummies are the things that fascinate us most about ancient Egypt But what are mummies How did the Egyptians create them And why What became of the people they once were We are learning more all the time about the cultural processes surrounding mummification and the medical characteristics of ancient Egyptian mummies In the first part of *Mummies and Death in Egypt* Fran oise Dunand gives an overview of the history of mummification in Egypt from the prehistoric to the Roman period She thoroughly describes the preparations of the dead tombs and their furnishings funerary offerings ornamentation of the corpse coffins and canopic jars and she includes a separate chapter on the mummification of animals She links these various practices and behaviors to the religious beliefs of classical Egypt In the second part of this book Roger Lichtenberg a physician and archaeologist offers a fascinating narrative of his forensic research on mummies much of it conducted with a portable X ray machine on archaeological digs His findings have revealed new information on the ages of the mummified their causes of death and the illnesses and injuries they suffered Together Dunand and Lichtenberg provide a state of the art account of the science of mummification and its social and religious context

The Berlin-Strasbourg Apocryphon Alin Suciu, 2017-01-23 The incomplete state in which many Coptic writings have survived makes them difficult to assess and the text studied in this book is no exception Preserved in two fragmentary manuscripts the Berlin Strasbourg Apocryphon previously known as the Gospel of the Savior has been wrongly identified as a second century gospel which was bypassed in the formation of the Christian canon Alin Suciu demonstrates that this misunderstanding of the text derives from an insufficient knowledge of Coptic literature Rather the Berlin Strasbourg Apocryphon is one of the numerous apostolic memoirs a peculiar genre of Coptic literature which consists of writings allegedly written by the apostles often embedded in sermons attributed to famous church fathers These texts were composed following the Council of Chalcedon as part of the attempt of the emerging Coptic church to mold its identity after the schism

The Oxford Handbook of Egyptology Ian Shaw, Elizabeth Bloxam, 2020 The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological philological and cultural sub disciplines authored by recognized experts in their respective fields it highlights

the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Authoritative yet accessible, it is an invaluable resource for scholars, students, and general readers alike. Personal Religion in Domestic Contexts during the New Kingdom Iria Souto Castro, 2023-06-08. This study has three main themes: the definition of personal religion and religious domestic practices from a theoretical perspective; the description and analysis of the main archaeological and anthropological evidence; and on that basis, the study of the impact of the Amarna period in the development of personal religion during the New Kingdom.

Studies in Coptic Culture Mariam Ayad, 2016-05-02. Coptic contributions to the formative theological debates of Christianity have long been recognized. Less well known are other equally valuable Coptic contributions to the transmission and preservation of technical and scientific knowledge and a full understanding of how Egypt's Copts survived and interacted with the country's majority population over the centuries. *Studies in Coptic Culture* attempts to examine these issues from divergent perspectives. Through the careful examination of select case studies that range in date from the earliest phases of Coptic culture to the present day, twelve international scholars address issues of cultural transmission, cross-cultural perception, representation, and interfaith interaction. Their approaches are as varied as their individual disciplines, covering literary criticism, textual studies, and comparative literature, as well as art history, archaeology, botany, and historical research methods. The divergent perspectives and methods presented in this volume will provide a fuller picture of what it meant to be Coptic in centuries past and prompt further research and scholarship into these subjects. **Current Research in**

Egyptology 2024 John Rogers, Catherine Bishop-Allen, Henry Bohun, Reuben G. Hutchinson-Wong, Marina Sartori, 2025-09-04. 23 selected papers from the twenty-fourth Current Research in Egyptology conference cover topics including discussion of material culture, society, religion, reception studies, findings from archaeological excavations, and methodological issues, collecting a wide range of recent research in Predynastic, Pharaonic, and Graeco-Roman Egyptology. *Ancient Egypt Transformed* Adela Oppenheim, Dorothea Arnold, Dieter Arnold, Kei Yamamoto, 2015-10-12. The Middle Kingdom (ca. 2030-1650 B.C.) was a transformational period in ancient Egypt during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. *Ancient Egypt Transformed* presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms, and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works, including sculpture, relief, decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief, decoration, and stela explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that

followed the return to Egypt's traditional capital in the north and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices such as the pilgrimage to Abydos are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource. *Desert road archaeology in ancient Egypt and beyond* Heiko Riemer, 2013-01-01

Politics and Rhetoric in the Corinthian Epistles L. L. Welborn, 1997 *Egyptianizing Figurines from Delos* Caitlín Barrett, 2011-09-20 This book investigates Hellenistic popular religion through an interdisciplinary study of terracotta figurines of Egyptian deities mostly from domestic contexts from the trading port of Delos. A comparison of the figurines' iconography to parallels in Egyptian religious texts, temple reliefs, and ritual objects suggests that many figurines depict deities or rituals associated with Egyptian festivals. An analysis of the objects' clay fabrics and manufacturing techniques indicates that most were made on Delos. Additionally, archival research on unpublished notes from early excavations reveals new data on many figurines' archaeological contexts, illuminating their roles in both domestic and temple cults. The results offer a new perspective on Hellenistic reinterpretations of Egyptian religion as well as the relationship between popular and official cults.
